Executive Summary

ES-05 Executive Summary - 24 CFR 91.200(c), 91.220(b)

1. Introduction

Arapahoe County is eligible to receive annual allocations of HOME Investment Partnerships Program (HOME) and Community Development Block Grant (CDBG) from the U.S. Department of Housing and Urban Development (HUD). This document is the Arapahoe County 2025–2029 Consolidated Plan (Con Plan) for the Arapahoe County HOME Consortium (Consortium) and Urban County. The Con Plan is a five-year plan that addresses strategic goals and program objectives for the future use of HOME and CDBG. The goals and objectives of the Con Plan were developed based on stakeholders and community feedback.

HOME is a federal housing grant that assists communities in addressing low-income residents' housing needs. The HOME Consortium includes the Urban County, as defined below, as well as the city of Centennial. Arapahoe County is the lead agency for the Consortium's HOME funds.

CDBG funds are used to address community development and housing needs of the residents of the Urban County, which includes the cities of Englewood, Sheridan, Littleton, and the town of Deer Trail and unincorporated Arapahoe County. The City of Aurora receives CDBG directly and, as such, does not receive CDBG funds from the County.

In 2025, Arapahoe County is eligible to receive \$1,283,130.00 in CDBG funds and \$557,253.33 in HOME funds. Future funding is determined on an annual basis.

2. Summary of the objectives and outcomes identified in the Plan Needs Assessment Overview

Arapahoe County's new funding priorities were informed by stakeholder consultation, resident input, and the market analysis and needs assessment conducted for this Consolidated Plan. These priorities were discussed with key community members, Urban County and the Consortium members, and are used to evaluate applications for CDBG and HOME funding for the 2025-2029 program years.

Goal 1. Affordable Housing Preservation and Development - The intent of the strategic plan goal of affordable housing is to increase Arapahoe County's affordable housing stock and preserve the existing affordable housing stock. Based on both quantitative and qualitative data gathered, there is a strong need to expand the supply of affordable housing units in the County, especially given the rising housing costs in the Denver metro area.

Priority needs and priority populations identified include:

- Affordable rental housing

- Low-income renters
- Persons at risk of homelessness
- Youth aging out of foster care
- Seniors
- Special needs residents

Goal 2. Community Public Services - Arapahoe County will support various agencies providing a wide range of community based public services to residents including, but not limited to activities like food assistance, rent/mortgage/utility assistance, public services enrollment and navigation, homeless prevention services, and shelter supportive services. Public service activities focus on vulnerable and underserved populations and provide support to organizations serving those populations.

Goal 3. Tenant Based Rental Assistance (TBRA) – In an effort to address homelessness and provide affordable housing, the County provides TBRA to families at risk of becoming homeless, as well as to families in need of immediate shelter after experiencing homelessness. The County currently operates two separate TBRA programs utilizing HOME funds, with additional CDBG funds to support administering these programs, which includes supportive case management.

Goal 4. Public Facility Improvements - Arapahoe County provides assistance to other units of local government, non-profit organizations, and public housing authorities for public facility improvement projects, which typically replace integral components of their facilities and/or provide greater accessibility by removing architectural barriers.

Priority needs/priority populations addressed:

- Persons at risk of homelessness
- Special needs populations
- Youth aging out of foster care
- Renters facing eviction

Goal 5. Public Infrastructure Improvements - The CDBG program generally restricts infrastructure improvements to qualified census tracts and primarily residential areas that will predominantly benefit Low- to Moderate-Income (LMI) persons. Infrastructure improvement projects funded with CDBG will continue to focus on removing architectural barriers, providing access to residents regardless of their mobility, e.g. replacing deteriorated, narrow sidewalks with five feet wide sidewalks with ADA compliant curb ramps and crossings. Municipalities with aging infrastructure also require updating of sewage and plumbing in order to support affordable development projects.

Priority needs/priority populations addressed:

- Neighborhoods with aging infrastructure and/or poverty concentrations
- Seniors aging in place
- Persons with disabilities
- Communities without Internet access
- Low and moderate-income owners and renters

3. Evaluation of past performance

Arapahoe County has successfully focused its use of CDBG and HOME to meet housing and community development needs, targeted to LMI residents, neighborhoods, and developments. Arapahoe County plans to continue to focus federal resources on meeting the needs of the community.

Additionally, Arapahoe County maintains positive relationships with organizational partners, including the Urban County and HOME Consortium members, local housing authorities, and non-profit organizations. Past project and program successes with these partners who support community needs contributed to the development of the County's goals for the 2025-2029 program years.

Arapahoe County is committed to effectively managing HOME and CDBG. Arapahoe County works closely with the subgrantees and subrecipients to ensure that realistic and viable projects are selected for funding. All projects must meet the goals and objectives defined in the Con Plan, be considered feasible and meet all federal regulations. The County is committed to ensuring compliance with all federal regulations.

There has been considerable progress made by the housing and community development programs in Arapahoe County; however, improvements to public infrastructure, public facilities, public services, and the need for more affordable housing opportunities remain prolific issues within the County, as documented by the current Consolidated Plan and the most recent Consolidated Annual Performance and Evaluation Report (CAPER). The CAPER provides an assessment of progress towards the five-year goals and the one-year goals of HUD entitlement grants CDBG and HOME. The most recent PY 2023 CAPER reports these following highlights:

Affordable Housing: This priority was addressed with both CDBG and HOME funds. With CDBG funds, the County assisted 16 Low-to-Moderate Income (LMI) households with minor home repairs through the Brothers Redevelopment Home Modification and Repair program (#1546) and the Centennial Universal Design Homeowner Rehab program (#1570). There were also 22 LMI renters assisted with housing rehabilitation activities with the Prentice Place Lofts Rehab (#1514). The GRID Alternatives' Energy For All program (#1575) assisted 10 LMI households with energy efficiency improvements. Additionally, the Energy Efficient Englewood (E3) program assisted 13 LMI households with energy efficiency improvements. Finally, South Metro Housing Options created 51 new units of affordable senior housing at the Overlook at Powers development. The HOME program assisted 14 LMI renter households with TBRA assistance (#1614). The HOME program has several activities in various stages of development; HOME accomplishments are only reported when an activity is completed. For more details on HOME

activities in development see the CR-20, page 19.

Community Public Services (including Homeless Services): The County supports various agencies providing a wide range of community based public services to residents. In PY 2023, there were a total of 18,706 LMI persons assisted with senior services, services for persons with a disability, health services, food banks, and housing information and referral services. These also include LMI persons assisted with CDBG-CV programs such as subsistence payments to help with rental assistance for those who remain impacted by the pandemic. Finally, there were 106 persons assisted with homeless services at Family Tree's House of Hope. House of Hope helps women with children with coordinated services that help stabilize their families and support them on the path toward self-sufficiency.

Public Facility Improvements: The County is committed to providing assistance to local governments and entities as well as key local nonprofit agencies to improve and increase access to public facilities. While the County did not complete any of these activities in PY 2023, there are several activities underway and/or completed that will be reflected in the 2024 CAPER, such as the Family Tree GOALS youth center (#1621), House of Hope (#1623) and the Integrated Family Community Services facility improvements (#1618). Improvements to public infrastructure such as the City of Littleton Crestline Avenue Sidewalk Improvements (#1620) was also completed in 2024. These public improvements will help increase opportunities to LMI residents in the area and help to improve their quality of life.

4. Summary of citizen participation process and consultation process

Citizen participation in development of this plan was primarily achieved through stakeholder meetings, focus groups and a resident/stakeholder survey.

Offered in English and Spanish and in a 508-compliant format, the survey was available online and a postage-paid mail version. The survey instrument included questions about residents' current housing and financial situation, housing and community development priorities, and neighborhood needs.

A total of 166 Arapahoe County residents participated in the survey. Residents who commonly face disproportionate housing needs were well-represented by respondents, including:

- 27 households with children;
- 57 residents 55 and older;
- 31 had a household member with a disability;

- 32 renters;
- 5 residents who were precariously housed (living in their cars, shelters, or temporarily staying with family or friends);
- 19 households with an annual income of less than \$25,000; and
- Another 14 households with an annual income of between \$25,000 and \$50,000.

In preparation of this plan, housing and community development staff from Arapahoe County held 16 interviews with 22 stakeholders including local and regional institutions, affordable housing developers, community and faith-based organizations, and public and nonprofit agencies providing health and human services and 3 resident focus groups facilitated by community organizations representing specific subgroups of the County population. Arapahoe County staff also offered 3 public community meetings in person at 3 locations representing the varied geography of the County in the evening. A public hearing was held with the Board of County Commissioners before and after the 30-day public comment period on June 17, 2025 and July 22, 2025.

A total of 220 residents participated in conversations and activities to identify top community needs; prioritize community development and housing investments; and pinpoint gaps in access to resources and institutional structures.

Stakeholders engaged throughout the process included economic development officials from the Tri-Cities (Sheridan, Englewood, Littleton) and Centennial, unhoused service providers, workforce development organizations, faith communities, food provision organizations, health organizations, McKinney Vento liaisons, affordable housing developers and public housing representatives.

5. Summary of public comments

No comments were received during the minimum 30-day public comment period for the draft Consolidated Plan and Annual Action Plan (June 20th through July 20th).

6. Summary of comments or views not accepted and the reasons for not accepting them

All comments received were considered in preparation of this Consolidated Plan.

The Process

PR-05 Lead & Responsible Agencies 24 CFR 91.200(b)

1. Describe agency/entity responsible for preparing the Consolidated Plan and those responsible for administration of each grant program and funding source

The following are the agencies/entities responsible for preparing the Consolidated Plan and those responsible for administration of each grant program and funding source.

Agency Role	Name	Department/Agency
Lead Agency	ARAPAHOE COUNTY	Elizzebeth Loomis, Community Resources Department
CDBG Administrator	ARAPAHOE COUNTY	Jeremy Fink, Community Resources Department
HOME Administrator	ARAPAHOE COUNTY	Nancy Sonnenfeld, Community Resources Department

PR-10 Consultation – 91.100, 91.110, 91.200(b), 91.300(b), 91.215(I) and 91.315(I)

1. Introduction

Provide a concise summary of the jurisdiction’s activities to enhance coordination between public and assisted housing providers and private and governmental health, mental health and service agencies (91.215(I)).

Arapahoe County's Community Resources Department has a strong connection and partnership with many public and private housing providers through its work in supporting housing development projects, assisting with emergency rental assistance, and providing tenant based rental assistance programs. Through those partnerships, County staff communicates with housing providers on potential projects and emerging trends and needs. By actively participating in the Change the Trend Network, the Tri-Cities Homelessness Initiative and Policy Committee, the Aurora@Home initiative, and the County’s Homeless Coordinating Committee, County staff is able to coordinate activities and services with a wide range of organizations addressing community needs, particularly unmet needs and trends related to community homelessness, including mental health service needs. County staff has also supported and will continue to support a range of healthcare related service agencies, including AllHealth Network and Doctors Care.

Describe coordination with the Continuum of Care and efforts to address the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans, and unaccompanied youth) and persons at risk of homelessness

Arapahoe County is the lead agency for the Point in Time (PIT) Count/Survey conducted by our Continuum of Care, Metro Denver Homeless Initiative (MDHI). The PIT is an annual, unduplicated count of people experiencing homelessness on a single night in January. As the lead agency, Arapahoe County staff coordinates and manages groups/teams to conduct the annual PIT count at various locations throughout the County, utilizing existing partnerships and relationships with local municipalities, law enforcement agencies, service providers and interested parties to account for various groups and locations of homeless individuals across the County. These efforts by the County contribute to a more accurate count which facilitates a more robust and comprehensive approach to addressing the needs of unhoused residents in the County.

Arapahoe County also participates in the Tri-Cities Homelessness Policy Committee to coordinate regional stakeholders, local government agencies, the Lived Experience Board, and service providers around policy initiatives that align with the Built for Zero systematic approach to ending homelessness.

The Tri-Cities Homelessness Policy Committee's work since 2018 has culminated in the development of a navigation center in Englewood for people experiencing homelessness which will provide emergency housing, resource navigation, support services and workforce development.

On April 26, 2021, the Arapahoe County Board of Commissioners established the Homeless Coordinating Committee (HCC) to address the crisis of homelessness within Arapahoe County. The HCC was established through the coordinated efforts of a varied group of local partners. The primary goal of the HCC is to develop and implement a plan to address homelessness and address housing needs in the region, in partnership with over 100 local organizations and governmental agencies. This document summarizes the strategies that will guide efforts to build a more comprehensive and coordinated response to homelessness in the County and to build lasting solutions.

Arapahoe County participates in the Aurora@Home collaborative to enhance community services and support for residents in The City of Aurora. This partnership aims to address various social issues, including housing stability, mental health resources, and access to essential services. By combining resources and expertise, numerous entities work together to create a more integrated approach to community well-being. Through this collaboration, Arapahoe County and Aurora@Home can implement programs that provide assistance to families and individuals in need, ensuring they have access to vital resources such as food, shelter, and healthcare. The partnership also focuses on outreach efforts to raise awareness about available services and to engage with the community effectively. Additionally, this collaboration may involve joint initiatives, workshops, and events designed to foster community engagement and empower residents. By leveraging the strengths of both organizations, Arapahoe County and Aurora@Home strive to create a supportive environment that promotes resilience and improves the overall quality of life for all community members.

Over the years, Arapahoe County's CDBG and HOME programs have actively supported organizations, programs and projects that address the needs, particularly unmet needs, of our unhoused populations, including financial support for shelters, case management, supportive services, navigation assistance, health care services, food and meal programs and emergency and tenant based rental assistance programs. Arapahoe County has established a partnership with the Metro Denver Homeless Initiative (MDHI) to enhance their efforts in addressing homelessness through the Built for Zero initiative and case conferencing strategies. This collaboration aims to create a more coordinated and effective response to homelessness in the region. The Built for Zero initiative is a data-driven approach that focuses on ending homelessness by utilizing real-time data to track the number of individuals experiencing homelessness and their specific needs. By working together, Arapahoe County and MDHI can identify trends, allocate resources more efficiently, and implement targeted interventions that address the root causes of homelessness.

In addition to the Built for Zero initiative, the case conferencing efforts involve regular meetings where service providers, community organizations, and stakeholders come together to discuss individual cases of homelessness. This collaborative approach allows for the sharing of information and resources, ensuring that individuals receive comprehensive support tailored to their unique circumstances. By coordinating services and developing personalized action plans, Arapahoe County and MDHI aim to facilitate quicker transitions into stable housing and improve overall outcomes for those experiencing homelessness.

Describe consultation with the Continuum(s) of Care that serves the jurisdiction's area in determining how to allocate ESG funds, develop performance standards and evaluate outcomes, and develop funding, policies and procedures for the administration of HMIS

Arapahoe County does not receive ESG funds; however the County does financially support organizations which utilize the HMIS system. In fact, CDBG-CV funds are currently supporting efforts by HAAT Force to register clients in HMIS and update existing registrations, which would facilitate a more efficient, up-to-date, and accurate system, helping to minimize duplication of efforts and services. Arapahoe County partners with many entities serving County residents that do receive ESG funding, and the County reviews and signs certificates of consistency each year, at application time, that the projects and funding requested is in alignment with the County's Consolidated Plan goals and the Homeless Coordinating Committee's Strategic Plan.

2. Describe Agencies, groups, organizations and others who participated in the process and describe the jurisdictions consultations with housing, social service agencies and other entities

---	---

Identify any Agency Types not consulted and provide rationale for not consulting

Arapahoe County Community Development, Housing and Homeless Services staff consulted with a variety of agency types, including municipalities, public housing authorities, non-profit agencies, affordable housing developers, faith-based service providers, and working groups for homelessness, and focus groups of residents with public housing and unhoused lived experience. For future program grant years, additional agency types will likely be added to the consultation process to gather more detailed information on specific activities and needs, especially if a gap in agency consultations is identified. Based on the agencies consulted with for the most recent Consolidated Plan and corresponding Annual Action Plans, no specific agency type was omitted from the consultation process and extensive outreach was performed for stakeholder interview requests with at least 3 invitations to each organization on a county-wide list of 50+ contacts.

Other local/regional/state/federal planning efforts considered when preparing the Plan

Name of Plan	Lead Organization	How do the goals of your Strategic Plan overlap with the goals of each plan?
Continuum of Care	Metro Denver Homeless Initiative	The County works closely with MDHI to coordinate and assist with the annual Point-In-Time survey.
Tri-Cities Homeless Action Plan	Tri-Cities Policy Committee	The Tri-Cities Homelessness Policy Committee is comprised of the cities of Englewood, Littleton and Sheridan and is focused on a comprehensive regional approach to address homelessness using the Built for Zero framework.
Arapahoe/Douglas Workforce Board, Strategic Planning Cycle 2021-2024	Arapahoe/Douglas Works	Arapahoe/Douglas Works strategic plan includes outreach initiatives to low-income populations with housing insecurity due to income/job mismatch with rising housing costs with a specific focus on protected populations and justice involved residents.
Arapahoe County Comprehensive Plan 2018 (amended 2022)	Arapahoe County Board of County Commissioners	The Comprehensive Plan includes extensive goals related to fair housing, prioritization of affordable housing, and infrastructure improvement.
Englewood Economic Development Strategic Plan 2022	City of Englewood	Englewood's strategic plan provides municipality specific information related to workforce development and housing needs.
City of Littleton Economic Benchmark Report, Littleton Comprehensive Economic Development Strategy 2023	City of Littleton	Littleton's benchmark report provides municipality specific information related to accomplishments in economic development projects, workforce development and housing needs.

Metro Denver Homeless Initiative State of Homelessness 2025	Metro Denver Homeless Initiative	The State of Homelessness by MDHI provides a snapshot of homelessness in the County, including demographic information and characteristics of residents who are unhoused (sheltered, chronic, etc.)
Arapahoe County Homeless Coordinating Committee Strategic Plan: 2024-2026	Arapahoe County Board of County Commissioners	The County's strategic plan outlines goals specifically related to addressing gaps in housing in the County and increasing more affordable housing opportunities as well as coordinated services for the homeless population.
Arapahoe County Housing and Urban Development Consolidated Plan, 2019-2024	Arapahoe County Community Resources Department	The previous Consolidated Plan allows for continuity of outlined goals, strategies and projects to be funded going into the next funding cycle and accountability to prior commitments.
HOME-ARP PLAN 2023	Arapahoe County Community Development, Housing and Homeless Services (CDHHS) Division	This plan outlines how the County will use funds received through HOME-ARP
Arapahoe County 2023 Annual Action Plan (HUD)	Arapahoe County Community Resources Department	The 2023 Strategic Plan details the projects that will be funded in the next funding cycle
Arapahoe County, Colo. Recovery Plan. State and Local Fiscal Recovery Funds 2022 Report	Arapahoe County Board of County Commissioners.	The recovery plan outlines how the County will utilize HOME-ARP funds for post COVID-19 economic recovery identifying any overlap or identification of critical needs to be addressed in this Consolidated Plan.
Arapahoe County 2019 Housing Needs Assessment, (expanded from the HUD 2019-2024 Consolidated Plan)	Arapahoe County Community Resources Department (Housing)	The Housing Needs Assessment provides detailed data on housing inventory, gaps, barriers and needs in the County.
Envision Littleton Comprehensive Plan 2019	City of Littleton	The City of Littleton Comprehensive Plan outlines overall economic development goals indicating

Watkins/Bennett Area Vision Study 2020	Arapahoe County	Economic Development plan with community outreach including housing preference survey to incorporate rural/eastern Arapahoe County resident perspectives and needs.
--	-----------------	---

Table 3 – Other local / regional / federal planning efforts

Describe cooperation and coordination with other public entities, including the State and any adjacent units of general local government, in the implementation of the Consolidated Plan (91.215(l))

Municipal economic and community development offices were interviewed, including Littleton, Englewood, Sheridan and Centennial, for a comprehensive understanding of past and future projects related to housing, including affordable housing development, potential for displacement, homelessness strategies, county and regional coordination for housing and homelessness strategies and community needs. The Tri-Cities of Englewood, Littleton and Sheridan form a coalition for coordination on large scale developments impacting residents in the region and all participate in the Tri-Cities Homelessness Initiative and Policy Group working closely with the Arapahoe County Community Resources Department.

PR-15 Citizen Participation – 91.105, 91.115, 91.200(c) and 91.300(c)

1. Summary of citizen participation process/Efforts made to broaden citizen participation Summarize citizen participation process and how it impacted goal setting

Citizens were provided with an opportunity to participate in the review, planning and funding decisions as they relate to CDBG and HOME programs. Opportunities to participate included a resident and stakeholder survey, community meetings in 3 public libraries across the County for fair geographic representation, focus groups and stakeholder interview invitations. The County notified citizens of these opportunities through multiple social media posts (4 posts on Facebook, 4 posts on Twitter and 1 post in Instagram). Additionally, flyers were circulated by stakeholders and service providers at locations throughout the County. The meetings and survey were also publicized weekly through the Change the Trend network comprising 80 area nonprofit organizations.

At the time of this Consolidated Plan preparation, Arapahoe County was also engaged in a public outreach campaign to address a significant budget shortfall for 2025, that included a survey and public meetings on housing and community needs. Stakeholders and focus group participants for this Consolidated Plan indicated some fatigue with participation in the many venues for gathering similar information from the community which impacted response and participation for this Consolidated Plan. Additionally, the majority of stakeholders contacted for this plan recently participated in outreach related to public feedback on use of the HOME-ARP funds that the County received, a community needs assessment, and a public health plan with similar partners adding to the potential likelihood of reduced participation. Attempts at stakeholder interview and focus group scheduling included at minimum 3 contacts (in many cases substantially more).

Table 4 – Citizen Participation Outreach

Needs Assessment

NA-05 Overview

To ensure the efficient and effective use of resources, the County of Arapahoe within Colorado must first assess the jurisdiction's needs. This section describes and analyzes various demographic and economic indicators to provide a foundation for grant management. By using data gathered from state, local, and federal sources, the County can identify needs based on broad trends in population, income, and household demographics. Primary data sources include the U.S. Census Bureau, the Bureau of Labor Statistics, and HUD. Once gathered, the data will be analyzed more closely to explore how family and household dynamics, race, and housing problems are interconnected. A key objective of this Needs Assessment is to identify the nature and extent of housing problems experienced by Arapahoe County residents.

In addition to demographic analysis, this section examines factors that influence, or are influenced by, the housing market. These include public housing needs, the needs of individuals facing homelessness, and non-homeless special needs populations such as the elderly and persons with a disability. Furthermore, non-housing development needs, such as public services and infrastructure, are also evaluated to guide resource allocation decisions.

Each of these issues is analyzed alongside economic and demographic indicators to determine if certain groups are disproportionately affected. By understanding the scale and prevalence of housing challenges within Arapahoe County, the County can set evidence-based priorities for entitlement programs. This approach ensures that resources are directed toward the areas and populations that need them most, promoting fairer outcomes across the community.

This report will focus on the information for Arapahoe County which includes its collaboration ratified in September 2024 with the cities of Centennial, Englewood, Littleton, Sheridan and the Town of Deer Trail to form a HOME Consortium for the HOME Investment Partnerships (HOME) and Community Development Block Grant (CDBG) Fiscal Years 2025 through 2027. This consortium ensures that these communities within the County benefit from the investment of HOME and CDBG grant funds through programs for low-income households such as multifamily housing development and rehab, support for public service organizations, improving public facilities, and rehabilitation of single-family homes within the communities.

The data sets in this report focus on Arapahoe County, Colorado, including county-level data and its communities, except for the City of Aurora, an entitlement community that submits a separate Consolidated Plan.

NA-10 Housing Needs Assessment - 24 CFR 91.205 (a,b,c)

Summary of Housing Needs

The housing needs of a community, like all market economy items, are influenced by supply and demand. However, the factors that impact housing supply and demand are far more complex than simply matching one house to one household. Variables such as population growth, household size, availability of rental housing, income levels, and property conditions all contribute to shaping the community's housing needs.

The following section highlights that the most significant housing challenge in Arapahoe County is the lack of affordable housing. According to the 2019-2023 American Community Survey (ACS) 5-Year Estimates, approximately 22,132 households in the County are cost burdened, representing 36.3% of the population. Both Renters and Homeowners are notably affected, with 13,439 rental households and 8,693 homeowner households paying more than 30% of their income on housing costs. This data suggests that the current housing supply is either insufficient or too expensive to meet the needs of the community.

Demographics	Base Year: 2013	Most Recent Year: 2023	% Change
Population	115,645	145,543	25.9%
Households	50,281	62,035	23.4%
Median Income	\$61,546	\$97,179	57.9%

Table - Housing Needs Assessment Demographics

Data Source: 2009-2013 ACS (Base Year), 2019-2023 ACS (Most Recent Year)

Since 2013, Arapahoe County's population has increased by approximately 25.9%, reflecting a strong and sustained growth trend. During this same period, the number of households increased by around 23.4%, suggesting a decline in average household size. This shift may be attributed to demographic changes, such as an increase in young adults and seniors living independently, as well as economic factors, including housing affordability and availability, which influence household formation patterns.

Over the same timeframe, Arapahoe County's Median Household Income (MHI) grew by 57.9%. While this outpaces inflation, the impact on housing affordability remains limited. Rising home prices and rental costs have outstripped income growth, leading to ongoing affordability challenges for many residents. This trend underscores the need for continued investments in affordable housing, rental assistance, and homeownership support programs to ensure that economic gains translate into improved housing stability for households across the County.

Population

The map illustrates population distribution in Arapahoe County by census tract. The U.S. Census Bureau aims for approximately 4,000 residents per tract, though some areas indicated by darker shading exceed 4,000 residents per tract. In contrast, many areas indicated by lighter shading have fewer than 4,000 residents, with some below 2,000. These variations suggest population shifts influenced by urban migration, housing development, and demographic changes. *The areas in the eastern portion of the*

County that are not shown on this map fall within the same census tract as the easternmost area displayed, with no variation data or tract boundaries.

Change in Population from 2018-2023

This map depicts population changes in Arapahoe County since 2018, highlighting significant demographic shifts across the region. Many areas have experienced population declines, with several tracts exceeding 10%, while other sections of the County have seen notable growth, with several tracts experiencing increases surpassing 20%. These trends reflect evolving population dynamics, signaling potential shifts in residential density, urbanization patterns, and community composition. Understanding these changes is essential for planning infrastructure, housing, and services to accommodate the County's evolving needs. *The areas in the eastern portion of the County that are not shown on this map fall within the same census tract as the easternmost area displayed, with no variation data or tract boundaries.*

Median Household Income

Arapahoe County displays a wide range of income levels across its geography. The majority of median household incomes (MHI) remain below \$100,000 throughout much of the County, as indicated by lighter-shaded areas on income distribution maps. In contrast, areas with higher income are indicated by darker shading, where MHIs exceed \$100,000, with some areas surpassing \$125,000. These income disparities highlight distinct housing markets and economic conditions across different areas of the County, influencing housing affordability, access to resources, and overall economic opportunities. *The areas in the eastern portion of the County that are not shown on this map fall within the same census tract as the easternmost area displayed, with no variation data or tract boundaries.*

Poverty

The map of Arapahoe County illustrates the varying prevalence of households living below the poverty line across different areas. Overall, the County exhibits relatively low poverty rates, with most areas showing rates below 6%, including many areas with rates below 3% represented by lighter shading. However, several central areas of the County experience higher concentrations of poverty, with some census tracts exceeding 12%, indicated by darker shading. These disparities affect housing stability, access to essential services, and economic mobility throughout the County. Addressing these disparities through targeted affordable housing initiatives, workforce development programs, and strategic infrastructure investments is critical to fostering long-term community stability and expanding economic opportunities. *The areas in the eastern portion of the County that are not shown on this map fall within the same census tract as the easternmost area displayed, with no variation data or tract boundaries.*

Number of Households Table

	0-30% HAMFI	>30-50% HAMFI	>50-80% HAMFI	>80-100% HAMFI	>100% HAMFI

Table 5 - Total Households Table

Data 2017-2021 CHAS
Source:

In the above table, data from HUD's 2017-2021 Comprehensive Housing Affordability Strategy (CHAS) provides a detailed look at households in Arapahoe County, using the HUD Area Median Family Income (HAMFI) as a baseline. This document will use the following income group definitions:

- **Extremely Low Income:** 0-30% HAMFI
- **Very Low Income:** 30-50% HAMFI
- **Low Income:** 50-80% HAMFI
- **Moderate Income:** 80-100% HAMFI
- **Above Moderate Income:** >100% HAMFI

According to 2017-2021 CHAS data, approximately 32.3% (22,110) of Arapahoe County's households earn below 80% of the Area Median Income (AMI), classifying them as low-income. Among the low-income households earning below 80% AMI, small households make up 41.2%, while large households represent only 7.4%. There is a strong link between household composition and income level: nearly 43% of elderly households (those with at least one member aged 62 or older) fall within lower-income brackets, and around 34% of households with children under six are also low-income. These trends emphasize varied housing and service needs across age and income groups, highlighting the need for targeted support for these demographics in Arapahoe County.

Table 7 – Housing Problems Table

Data Source: 2017-2021 CHAS

Housing Needs Summary

The table above summarizes housing issues in Arapahoe County by income group and tenure (renter or homeowner) using 2017-2021 CHAS data. Among the households in Table 7, the primary issues are cost-burden and overcrowding. Specifically, amongst households earning between 0% and 100% AMI, 15,045 renters and 6,930 homeowners in Arapahoe County are cost-burdened, spending 30% or more of their income on housing. Of these, 46.4% of renters and around 49.9% of homeowners are severely cost-burdened, with housing expenses consuming more than 50% of their income. Additionally, overcrowding affects a significant number of households, with approximately 1,030 renters and 221 homeowners living in conditions exceeding 1.01 persons per room. This high prevalence of cost-burdened households highlights the financial strain of housing costs on Arapahoe County residents, particularly for renters who also experience higher rates of overcrowding.

2. Housing Problems 2 (Households with one or more Severe Housing Problems: Lacks kitchen or complete plumbing, severe overcrowding, severe cost burden)

Table 8 – Housing Problems 2

Data Source: 2017-2021 CHAS

Severe Housing Problems

Severe housing problems are prevalent amongst all lower-income households in Arapahoe County. Among households earning between 0% and 100% of the Area Median Income (AMI), around 70.2% of the 24,020 renter households and around 45% of the 16,350 owner households experience at least one documented housing issue. These challenges are especially acute for those with extremely low incomes, with 88.9% of renter households and approximately 85.9% of homeowners earning between 0-30% of AMI facing at least one housing problem. Data from Table 7 indicates that cost burden remains the most widespread housing issue in Arapahoe County, as many households struggle to meet housing expenses. This underscores the urgent need for targeted efforts to improve housing affordability, particularly for lower-income households.

3. Cost Burden > 30%

	Renter				Owner			
	0-30% AMI	>30-50% AMI	>50-80% AMI	Total	0-30% AMI	>30-50% AMI	>50-80% AMI	Total

Table 9 – Cost Burden > 30%

Data Source: 2017-2021 CHAS

Housing Cost-Burdened

The 2017-2021 CHAS data provide a detailed analysis of cost-burdened households in Arapahoe County across income levels up to 80% of the Area Median Income (AMI), highlighting variations by household type. Small households make up 33.8% of cost-burdened renter households, while large households account for only 4.1%. Among homeowners, 30.9% of small households and 7.7% of large households experience cost burdens, indicating relatively similar rates amongst renters and homeowners.

Elderly households display distinct housing cost challenges, with 13.2% of rental households and 45.4% of homeowner households that are facing cost burdens are considered elderly. While elderly homeowners are more likely to experience financial strain from housing costs, both groups face persistent affordability challenges, underscoring the need for targeted housing support for Arapahoe County's low-income elderly residents.

Homeowner Cost Burden

The distribution of cost-burdened homeowners varies across Arapahoe County. Overall, the County reports cost burden rates below 20% as indicated by lighter shading. In contrast, many areas face higher rates exceeding 12%, with several census tracts west of the city surpassing 30% and a few surpassing 40% as indicated by darker shading. This pattern underscores the widespread nature of housing cost burdens, emphasizing that affordability remains a significant challenge in multiple parts of the County. *The areas in the eastern portion of the County that are not shown on this map fall within the same census tract as the easternmost area displayed, with no variation data or tract boundaries.*

Cost Burdened Renters

Cost-burden rates for renters in Arapahoe County are relatively higher than shown in the previous map for homeowners, with most census tracts showing over 30% of renters spending more than 30% of their income on housing. In some areas, this percentage exceeds 60%, highlighting a significant affordability challenge. This widespread cost burden underscores the financial strain on renters and the ongoing need for affordable housing solutions across the County. *The areas in the eastern portion of the County that are not shown on this map fall within the same census tract as the easternmost area displayed, with no variation data or tract boundaries.*

4. Cost Burden > 50%

	Renter				Owner

Table 10 – Cost Burden > 50%

Data Source: 2017-2021 CHAS

Severe Cost Burden

In Arapahoe County, a significant portion of cost-burdened households are classified as severely cost-burdened, spending over 50% of their income on housing, leaving them highly vulnerable to financial instability. Among renters with severe cost burdens, small, related households constitute approximately 25.3%, while large households account for only 5.3%. For homeowners facing severe cost burdens, small, related households represent approximately 24%, and large households make up only 5.6%. Elderly households are notably impacted, with a higher ratio of severe cost burden among homeowners than renters in this age group.

Households experiencing severe cost burdens are at increased risk of instability, where minor, unexpected expenses—such as rising utility bills or medical costs—can threaten housing stability, raising the risk of displacement or homelessness. These vulnerable residents may benefit from additional resources, including financial aid or housing subsidies, to support stable housing. Addressing the needs of severely cost-burdened households is essential for preventing housing crises and promoting long-term stability for at-risk residents in Arapahoe County.

5. Crowding (More than one person per room)

Table 11 – Crowding Information – 1/2

Data Source: 2017-2021 CHAS

Overcrowding

HUD defines an overcrowded household as one with 1.01 to 1.50 occupants per room, with overcrowding patterns differing significantly by housing tenure. In Arapahoe County, renters constitute a majority of overcrowded households, with 1,036 renter households compared to 224 homeowner households. This issue is particularly prevalent among lower-income households; approximately 65.7% of overcrowded renter households and 57.6% of overcrowded homeowner households fall below 80% of the Area Median Income (AMI), classifying them as low-income. These findings highlight the disproportionate impact of overcrowding on low-income households, with a higher prevalence among renter households, underscoring the need for targeted strategies to address both space and affordability constraints for these residents.

	Renter				Owner			
	0-30% AMI	>30-50% AMI	>50-80% AMI	Total	0-30% AMI	>30-50% AMI	>50-80% AMI	Total
Households with Children Present	335	480	405	1,220	25	0	490	497

Table 12 – Crowding Information – 2/2

Data Source:

2017-2021 CHAS

The presence of children varies significantly between renter and homeowner households in Arapahoe County. Among renters, the prevalence of children varies amongst households regardless of income. Conversely, for homeowners, children are more prevalent in households with higher incomes levels. This pattern illustrates how income levels and housing tenure may influence family structure and living conditions, highlighting the impact of economic status on household composition across the County.

Describe the number and type of single person households in need of housing assistance.

Single-persons account for 21,313 households in Arapahoe County and face heightened housing instability risks due to lower income levels and limited resources. According to ACS 2019-2023 data, the median income for a single-person household is \$52,034, nearly half the median income for a two-person household, which is \$106,998. Single-person households also have reduced transportation options, as they are less likely to own a vehicle, complicating commuting and access to essential services. Based on Median Contract Rent of \$1,692, a household would need to earn \$67,680 annually to afford rent without being considered cost burdened. These findings highlight the vulnerability of single-person households, particularly in terms of housing affordability and transportation access. It is safest to assume that most 1-person households will likely need some type of housing assistance.

Estimate the number and type of families in need of housing assistance who are disabled or victims of domestic violence, dating violence, sexual assault and stalking.

Disability

An estimated 48,300 households in Arapahoe County, including the City of Aurora, include at least one resident with a disability, representing approximately 20 percent of all households in the County. According to HUD’s Comprehensive Housing Affordability Strategy (CHAS) data, about 43 percent of these households—approximately 20,767—experience at least one housing problem, such as cost burden, overcrowding, or lacking kitchen or plumbing facilities.

Over the next five years, the number of households in need of housing assistance that include individuals with disabilities is projected to grow by approximately 200. These households include persons experiencing hearing, vision, cognitive, ambulatory, self-care, or independent living

difficulties. The projected increase underscores the importance of expanding accessible and affordable housing options to meet the evolving needs of residents with disabilities.

Survivors of Domestic Violence, Dating Violence, Sexual Assault, and Stalking

Accurate crime statistics for incidents such as domestic violence, dating violence, sexual assault, and stalking are challenging to collect due to significant underreporting. Many survivors choose not to report incidents due to fears of retaliation, concerns over child custody, or financial and housing instability. Ensuring accessible resources for safety and stability is crucial for those who come forward and seek assistance.

Based on data from the Arapahoe County Sheriff's Department and reported by the FBI Crime Data Explorer, there were 16 victims of rape or criminal sexual contact between January 2023 and December 2023. The majority of these victims were females under the age of 29 who were assaulted in their homes by someone known to them. This represents a decrease from 2022 when 19 victims of rape and/or criminal sexual contact were reported by the Sheriff's Department.

Assessing the prevalence of criminal domestic violence (CDV) and intimate partner violence (IPV) remains challenging due to significant underreporting and inconsistencies in documentation. According to the Bureau of Justice Statistics, many domestic violence cases go unreported due to fear of retaliation, financial dependence, or social stigma, leading to an incomplete representation of the issue in official crime reports.

Data from the Arapahoe County Sheriff's Office indicates that there were 307 reported victims of domestic violence in 2023, an increase from 293 cases in 2022. Additionally, 23 of these cases included kidnapping or abduction. Among domestic violence victims in 2023, the majority were females between the ages of 25 and 34 who were assaulted by a male offender. Half of these victims were assaulted by a boyfriend or girlfriend. These figures emphasize the ongoing challenge of domestic violence in Arapahoe County, highlighting the need for continued intervention, support services, and policy efforts to address IPV at both the county and state levels.

What are the most common housing problems?

Arapahoe County faces ongoing housing challenges, including cost burden, low vacancy rates, overcrowding, aging housing stock, and housing instability. Lower-income households are particularly affected, with many spending over 30% of their income on housing, and a substantial portion allocating more than half, placing them at high risk of financial strain and housing insecurity. Overcrowding is also prevalent, especially among lower-income renters, due to the shortage of affordable, family-sized units, further limiting housing options for vulnerable populations.

Homeownership opportunities remain constrained, with an overall homeowner vacancy rate of just 0.6% compared to 5.6% for rental properties throughout all of Arapahoe County (2019–2023 ACS data), including Aurora. This scarcity contributes to overcrowding and instability, particularly for single-person households, elderly residents, and low-income families who struggle to secure stable

housing and essential services. Additionally, Arapahoe County's aging housing stock presents safety concerns, with 40,034 units built before 1980 including 4,686 constructed prior to 1950, increasing risks related to lead-based paint hazards (LBPHs) and asbestos exposure, as identified by HUD guidelines. This includes housing units in Aurora and throughout the County.

Are any populations/household types more affected than others by these problems?

Arapahoe County faces significant housing challenges, including cost burden, low vacancy rates, overcrowding, aging housing stock, and housing instability. Lower-income households are particularly affected, with many spending over 30%, and in some cases, more than 50%, of their income on housing costs. This financial strain limits access to other essential needs and underscores the critical demand for affordable housing options. Overcrowding, largely driven by a shortage of affordable family-sized units, disproportionately impacts lower-income renters who struggle to find suitable accommodations.

The low vacancy rates of all housing throughout the County exacerbates housing instability, particularly for single-person households, elderly residents, and lower-income families seeking stable housing and essential services. Additionally, the County's aging housing stock raises safety concerns, with nearly 36% of housing units built before 1980 and 4,686 units constructed before 1950. According to HUD guidelines, older homes pose lead-based paint and asbestos exposure risks, requiring ongoing monitoring, mitigation, and rehabilitation efforts to ensure safe living conditions. Addressing these challenges necessitates expanded affordable housing development, targeted rehabilitation programs, and stronger housing stability measures to support vulnerable residents in Arapahoe County.

Describe the characteristics and needs of Low-income individuals and families with children (especially extremely low-income) who are currently housed but are at imminent risk of either residing in shelters or becoming unsheltered 91.205(c)/91.305(c)). Also discuss the needs of formerly homeless families and individuals who are receiving rapid re-housing assistance and are nearing the termination of that assistance

Low-income individuals and families with children in Arapahoe County, particularly those classified as extremely low-income (earning at or below 30% of the area median income (AMI)), face persistent financial instability that places them at risk of homelessness. Many of these households allocate over 50% of their income to housing costs, making them severely cost-burdened and vulnerable to eviction following unexpected expenses such as medical emergencies, job loss, or childcare disruptions. According to data from regional housing reports, a lack of affordable rental housing and rising rents in Arapahoe County have further strained these households, particularly in areas where wages have not kept pace with housing costs. The need for rental assistance, eviction prevention programs, and case management services remains high, as these families often struggle with transportation access, food insecurity, and limited childcare options, which are critical to maintaining employment and stable housing.

Additionally, formerly homeless families and individuals in Arapahoe County who have received rapid re-housing assistance and are nearing the termination of that support often continue to face economic and housing insecurity. While rapid re-housing programs provide short-term rental assistance and supportive services, many beneficiaries still encounter difficulty securing long-term stable housing due to insufficient incomes, poor credit histories, and limited availability of affordable units. Without continued case management, some of these households risk falling back into homelessness once assistance ends. Supportive services, such as employment assistance, financial literacy programs, and access to permanent affordable housing options, are critical in ensuring these individuals and families do not experience housing instability again. Expanding transitional support, extended rental assistance for the most vulnerable populations, and increased landlord engagement efforts would help mitigate the risk of recurrent homelessness for these households in Arapahoe County.

If a jurisdiction provides estimates of the at-risk population(s), it should also include a description of the operational definition of the at-risk group and the methodology used to generate the estimates:

Two definitions for at-risk populations are included in the estimates provided above.

Severely cost burdened households. Households spending 50 percent or more of their income on housing are considered at risk of homelessness. These households have limited capacity to adjust to rising home prices and are vulnerable to even minor shifts in rents, property taxes, and/or incomes.

Precariously housed households. “Precariously housed” includes residents who are currently homeless or living in transitional or temporary/emergency housing and residents who are “staying with friends/family” —people who live with friends or family but are not themselves on the lease or property

title. These residents may (or may not) make financial contributions to pay housing costs or contribute to the household exchange for housing (e.g., childcare, healthcare services).

Specify particular housing characteristics that have been linked with instability and an increased risk of homelessness

The characteristics most commonly linked with housing instability and an increased risk of homelessness include prior history of eviction or foreclosure; being precariously housed; difficulty paying utilities or property taxes; negative credit history; criminal history; mental illness; prior episodes of homelessness; domestic violence in all its forms which includes but is not limited to: physical abuse, financial abuse, sexual abuse, technological abuse, and emotional abuse; LGBTQ youth; and/or extremely low-income households.

Stakeholders interviewed for this Consolidated Plan overwhelmingly identified residents with criminal histories as being particularly impacted by homelessness and this coupled with mental illness creates an extraordinary challenge to securing housing with no permanent supportive housing options in the County. Additionally, stakeholders indicated that most unhoused residents with whom they work lost their housing due to financial constraints and that the physical and mental health consequences of living on the street significantly compounds barriers to securing safe and permanent housing for these residents.

NA-15 Disproportionately Greater Need: Housing Problems – 91.205 (b)(2)

Assess the need of any racial or ethnic group that has disproportionately greater need in comparison to the needs of that category of need as a whole.

Introduction

To understand community needs, it's essential to identify whether any racial or ethnic groups face greater housing challenges. This section compares housing problems across racial and ethnic groups within each income category, using HUD guidelines that define a disproportionately greater need when a group experiences housing problems at a rate at least 10 percentage points higher than the County's average highlighting whether certain groups in Arapahoe County are more affected by these housing problems.

A housing problem is defined as:

1. Lacks complete kitchen facilities
2. Lacks complete plumbing facilities
3. More than one person per room
4. Cost Burden greater than 30%

0%-30% of Area Median Income

Housing Problems	Has one or more of four housing problems	Has none of the four housing problems	Household has no/negative income, but none of the other housing problems

*The four housing problems are:

1. Lacks complete kitchen facilities, 2. Lacks complete plumbing facilities, 3. More than one person per room, 4. Cost Burden greater than 30%

Discussion

Extremely Low Income (0-30% AMI): The jurisdiction-wide rate of households with a housing problem in this income group is 83.2%. Asian households in this income range are considered disproportionately in greater need.

Very Low Income (31-50% AMI): In this income group, 75.4% of households report a housing problem. Black / African American households in this income range are considered disproportionately in greater need.

Low Income (51-80% AMI): The jurisdiction-wide rate of households with a housing problem in this income group is 49.4%. No racial or ethnic households are disproportionately impacted.

Moderate Income (81-95% AMI): In this income group, 26.7% of households report a housing problem. American Indian and Alaska Native households in this income range are considered disproportionately in greater need.

NA-20 Disproportionately Greater Need: Severe Housing Problems – 91.205 (b)(2)

Assess the need of any racial or ethnic group that has disproportionately greater need in comparison to the needs of that category of need as a whole.

Introduction

To understand community needs, it's essential to identify whether any racial or ethnic groups face greater housing challenges. This section compares housing problems across racial and ethnic groups within each income category, using HUD guidelines that define a disproportionately greater need when a group experiences housing problems at a rate at least 10 percentage points higher than the County's average, highlighting whether certain groups in Arapahoe County are more affected by these housing problems.

The following series of tables looks at the existence of severe housing problems amongst different racial and ethnic groups across the 0% -30%, 31%-50%, 51%-80%, and 81%-100% AMI cohorts.

0%-30% of Area Median Income

Severe Housing Problems*	Has one or more of four housing problems	Has none of the four housing problems	Household has no/negative income, but none of the other housing problems

Table 20 – Severe Housing Problems 81 - 100% AMI

Data Source: 2017-2021 CHAS

*The four severe housing problems are:

1. Lacks complete kitchen facilities, 2. Lacks complete plumbing facilities, 3. More than 1.5 persons per room, 4. Cost Burden over 50%

Discussion

Extremely Low Income (0-30% AMI): The jurisdiction-wide severe housing problem rate in this income group is 72.7%. Asian households in this income range are considered disproportionately in need.

Very Low Income (31-50% AMI): In this income group, 33.8% of households report a severe housing problem. None of these groups are disproportionately impacted.

Low Income (51-80% AMI): The jurisdiction-wide severe housing problem rate in this income group is 9.5%. No racial or ethnic households are disproportionately impacted.

Moderate Income (81-95% AMI): In this income group, 7.7% of households report a severe housing problem. None of these groups are disproportionately impacted.

NA-25 Disproportionately Greater Need: Housing Cost Burdens – 91.205 (b)(2)

Assess the need of any racial or ethnic group that has disproportionately greater need in comparison to the needs of that category of need as a whole.

Introduction:

To understand community needs, it's essential to identify whether any racial or ethnic groups face greater housing challenges. This section compares housing problems across racial and ethnic groups within each income category, using HUD guidelines that define a disproportionately greater need when a group experiences housing problems at a rate at least 10 percentage points higher than the County's average highlighting whether certain groups in Arapahoe County are more affected by these housing problems.

Housing Cost Burden

Housing Cost Burden	<=30%	30-50%	>50%	No / negative income (not computed)
Jurisdiction as a whole	58,150	14,485	11,340	580
White	45,315	10,100	8,190	405
Black / African American	2,145	1,130	760	25
Asian	2,725	590	370	10
American Indian, Alaska Native	200	75	45	14
Pacific Islander	0	0	0	0
Hispanic	6,315	2,140	1,490	120

Table 21 – Greater Need: Housing Cost Burdens AMI

Data Source: 2017-2021 CHAS

Discussion:

Cost Burden: The jurisdiction-wide housing cost burden rate (30% to 50% of household income) is 17.1%. Black / African American households are disproportionately impacted.

Severe Cost Burden: The jurisdiction-wide rate of severe housing cost burden (over 50% of household income) is 13.4%. No racial or ethnic households are disproportionately impacted.

NA-30 Disproportionately Greater Need: Discussion – 91.205(b)(2)

Are there any income categories in which a racial or ethnic group has disproportionately greater need than the needs of that income category as a whole?

The following provides a summary of households in Arapahoe County that experience disproportionately greater housing needs compared to other populations based on housing problems and income. Across Arapahoe County, several demographic groups face elevated housing burdens, highlighting the need for interventions to address these disparities in housing stability and affordability.

Housing Problems

- Extremely Low Income: Asian households
- Very Low Income: Black/African American households
- Low Income: No racial or ethnic groups
- Moderate Income: American Indian and Alaska Native households

Severe Housing Problems

- Extremely Low Income: Asian households
- Very Low Income: No racial or ethnic groups
- Low Income: No racial or ethnic groups
- Moderate Income: No racial or ethnic groups

Housing Cost Burden

- Cost Burden: Black/African American households
- Severe Cost Burden: No racial or ethnic groups

If they have needs not identified above, what are those needs?

An additional analysis of the relationship between race and ethnicity, income, and housing problems is included in section MA-50.

Are any of those racial or ethnic groups located in specific areas or neighborhoods in your community?

The relationship between racial and ethnic groups with specific neighborhoods and low-income areas is discussed in MA-50

NA-35 Public Housing – 91.205(b)

Introduction

The Consolidated Plan must include a summary of the needs of public housing residents. The following table, provided by HUD and populated with data provided by Arapahoe County public housing authorities, shows that in Arapahoe County, there are 142 public housing units, 776 tenant-based vouchers and 196 project based vouchers currently being used in Arapahoe County. Vouchers are administered through Innovative Housing Concepts (Englewood Housing Authority), South Metro Housing Options (Littleton Housing Authority), and Aurora Housing Authority, and three special needs providers serving residents with disabilities. There are currently 1,000 people on the waiting list with Innovative Housing Concepts, and 1,200 people on the waiting list with South Metro Housing Options. *Note: Aurora Housing Authority is not included in the data and narrative for this section as Aurora is an entitlement city and submits their own Consolidated Plan.*

Totals in Use

	Program Type								
	Certificate	Mod-Rehab	Public Housing	Vouchers					
				Total	Project - based	Tenant - based	Special Purpose Voucher		
							Veterans Affairs Supportive Housing	Family Unification Program	Disabled *

Table 6 - Public Housing by Program Type

***Includes Non-Elderly Disabled, Mainstream One-Year, Mainstream Five-year, and Nursing Home Transition**

Data Source: PIC (PIH Information Center)

Arapahoe County is served by 3 public housing agencies: Littleton Housing Authority (dba South Metro Housing Options), Aurora Housing Authority and Englewood Housing Authority (dba Innovative Housing Concepts). HUD REAC scores show that the public housing units located in

Arapahoe County are not in poor condition. Scattered units owned and operated by South Metro Housing Options (Littleton Housing Authority) get an average score of 90.

Innovative Housing Concepts (Englewood Housing Authority) units received an average score of 98. Englewood is designated as a “High” performer by HUD and Sheridan is designated as “Standard”.

Innovative Housing Concepts is repositioning the only public housing facility that they own and operate to RAD section 18 blend housing and will only manage housing vouchers and scattered duplex/triplexes including several in Sheridan and Englewood going forward. They oversee a total of 110 public housing units, 100 of which are high rise elderly and disabled residents (which will be transitioned), 5 duplexes for working families of 2-4 bedrooms and 5 multifamily senior and family high rise. They administered 345. Innovative Housing Concepts serves residents in Englewood, Sheridan, Centennial and unincorporated Arapahoe County.

South Metro Housing Options manages 3 Project Based Rental Assistance locations, scattered single family and duplex units, one assisted living site for a total of 400 units in Littleton. The agency also administers the Housing Choice Voucher program.

Public housing agency stakeholders indicated a shortage of vouchers in general (years long waiting lists), reluctance of landlord acceptance of vouchers (despite this being illegal in Colorado), shortage of larger units for families, and high cost of housing as barriers to sufficient provision of public housing assistance in Arapahoe County. There is also an increase in tenants who need supportive services for drug addiction and mental/behavioral health which exceeds the capacity of the resident services coordinator who is responsible for medical appointment transportation and coordination.

Characteristics of Residents

# of DV victims								

Characteristics of Public Housing Residents

The table above shows that tenants who live in public housing and have vouchers use the assistance for an average of 4 years in public housing units and 4 years for voucher holders.

Section 8 voucher holders have an average family size of two, close to the average household size throughout Arapahoe County.

Housing authorities serve many residents who have a disability, and who have requested accessibility features. While many public housing units serve seniors, Public Housing Information Center (PIC) data below shows that many families accessing rental assistance also need accessibility features for family members.

Race of Public Housing Residents Narrative

Public housing tenants, the majority of whom are seniors, are 82 percent non-Hispanic white, six percent African American and 10 percent Asian. This racial breakdown is similar to Arapahoe County's overall household population (excluding Aurora). Voucher holders, however, are more likely to be a racial minority. Only 68 percent of voucher holders are non-Hispanic white, 28 percent are African American, and approximately 2 percent are Asian. Asian, Pacific Islander and American Indian or Alaska Native residents, who had higher incidences of housing problems than other racial groups, are underrepresented in the assistance programs.

Ethnicity of Residents

Program Type: INNOVATIVE HOUSING CONCEPTS									
Ethnicity	Certificate	Mod-Rehab	Public Housing	Vouchers					
				Total	Project - based	Tenant - based	Special Purpose Voucher		
							Veterans Affairs Supportive Housing	Family Unification Program	Disabled *

Table 9 – Ethnicity of Public Housing Residents by Program Type

Data Source: PIC (PIH Information Center)

Program Type: SOUTH METRO HOUSING OPTIONS									
Ethnicity	Certificate	Mod-Rehab	Public Housing	Vouchers					
				Total	Project - based	Tenant - based	Special Purpose Voucher		
							Veterans Affairs Supportive Housing	Family Unification Program	Disabled *
Hispanic				86	10	74		2	
Not Hispanic				543	55	483		5	

Ethnicity of Residents Narrative

Eighteen percent (18%) of public housing and 7 percent (7%) of voucher holder residents in Arapahoe County (excluding Aurora Housing Authority clients) are Hispanic. The overall share of Hispanic residents in public housing or using a housing voucher is higher than the percentage of Hispanic households in Arapahoe County overall of 6 percent (6%, excluding Aurora).

Section 504 Needs Assessment: Describe the needs of public housing tenants and applicants on the waiting list for accessible units:

Neither Innovative Housing Concepts nor South Metro Housing Options has reportable information on the needs of tenants on their wait lists.

However, public housing tenants and applicants with disabilities typically face significant challenges in securing accessible housing. Section 504 of the Rehabilitation Act requires public housing authorities (PHAs) to provide reasonable accommodations and accessible units, but demand far exceeds supply. As a result, many applicants experience long wait times before they can secure appropriate housing.

Key needs include physical accessibility features such as wheelchair-friendly designs, lower counters, roll-in showers, and widened doorways. Many applicants also require reasonable accommodations, such as grab bars, visual alarms for the hearing impaired, and allowances for service animals. These modifications are critical to ensuring safety and independence.

Access to supportive services is another pressing need. Many tenants require integrated healthcare, personal assistance, and accessible transportation to maintain their quality of life. The shortage of accessible housing, combined with the need for additional support services, leads to prolonged instability for those waiting for housing that meets their physical and medical requirements.

What are the number and type of families on the waiting lists for public housing and section 8 tenant-based rental assistance?

Innovative Housing Concepts and South Metro Housing Options currently have a combined 2,200 people on waiting lists for vouchers and public housing. Neither organization was able to provide demographic details on waiting list applications. Stakeholders indicated a general shortage of housing for larger families given the HUD maximum allowance per room and the limitation of housing available with sufficient number of rooms (3+) to meet this requirement.

Based on the information above, and any other information available to the jurisdiction, what are the most immediate needs of residents of public housing and Housing Choice voucher holders?

Public Housing Authority stakeholders shared concerns about landlords not accepting vouchers and market rent rates being too high for voucher use. Although Colorado law prohibits discrimination against voucher holders ("source of income" protections), stakeholders indicated that landlords find other methods to refuse rental to voucher holders, or prioritize applicants without vouchers. Stakeholders added that residents often face other obstacles getting housed including criminal history, evictions on their record, negative credit, and application fees and deposits required to move into a unit. Stakeholders also indicated that the majority of voucher holders rent apartments in LIHTC properties as they are friendlier to low-income residents and more likely to accept vouchers. The rent is also more accessible to use with the voucher as private market rental units exceed the amount allowed. As such,

ensuring that LIHTC and similar affordable rental units are built within Arapahoe County is critical for successful utilization of housing choice vouchers.

Residents from public housing participating in a focus group expressed significant concerns about the condition of public housing units and process for submitting complaints as complaints and requests are seemingly not documented. Focus group participants indicated significant insecurity in their housing situation with not knowing if they will be able to continue to live in their current unit due to changes in public housing management, and/or voucher qualification changes.

How do these needs compare to the housing needs of the population at large?

Affordable housing is a prevalent issue in Arapahoe County and the needs of housing authority residents are further exacerbated (due to lack of financial resources, loss of employment, illness, etc.) to pay rents (i.e., priced at less than \$600/month to serve the County's lowest income renters) in a tight economy. Private housing market factors combined with a lack of federal funding for public housing create extra challenges for housing authorities. Focus group participants expressed significant insecurity with keeping their vouchers as income qualification metrics change and can result in loss of benefits. This is consistent with lower income residents with cost burden in general facing a "benefits cliff" if accepting additional hours of employment or a raise. The cost of private market housing coupled with a potential loss of food and/or health benefits is not sustainable and locks lower income residents into a fixed state of public dependency.

NA-40 Homeless Needs Assessment – 91.205(c)

Introduction:

In Arapahoe County, homelessness reflects complex and overlapping challenges. The Metro Denver Homeless Initiative (MDHI) serves as the Continuum of Care (CoC) for the seven-county Denver metro region, including Arapahoe County. MDHI conducts the annual Point-in-Time (PIT) Count and coordinates regional efforts to address homelessness. This data provides valuable insights into the scope of homelessness in the County and helps shape targeted strategies to meet the needs of individuals and families experiencing homelessness. Understanding these trends and service gaps allows for more effective resource allocation and program development to support those in need.

The Point in Time (PIT) count, conducted nationally, provides a snapshot of those experiencing homelessness on a single night. A total of 725 residents in Arapahoe County (including Aurora) were experiencing homelessness in January 2025, a considerable increase from 650 residents in January 2024. Of these residents, 76 were newly homeless and 106 were chronically homeless. This represents about a 7% decrease in newly homeless cases and a 68% increase in chronic homeless cases. The majority of persons counted, 411 (56.7%), were sheltered and 314 persons (43.3%) were unsheltered; 364 persons (89% of the sheltered) were housed in emergency shelter, and 47 (12% of the sheltered) were housed in transitional housing

Homeless Needs Assessment. The following table is the most accurate and up-to-date estimate of people experiencing homelessness in the County in 2025 from the Metro Denver Homeless Initiative. The data presented in this section includes Aurora.

Population	Estimate the # of persons experiencing homelessness on a given night		Estimate the # experiencing homelessness each year	Estimate the # becoming homeless each year	Estimate the # exiting homelessness each year	Estimate the # of days persons experience homelessness
	Sheltered	Unsheltered				
Persons in Households with Adult(s) and Child(ren)	117	14	41	0	12	139
Persons in Households with Only Children	11	21	68	0	0	81
Persons in Households with Only Adults	283	279	1,770	298	18	145

Population	Estimate the # of persons experiencing homelessness on a given night		Estimate the # experiencing homelessness each year	Estimate the # becoming homeless each year	Estimate the # exiting homelessness each year	Estimate the # of days persons experience homelessness
	Sheltered	Unsheltered				
Chronically Homeless Individuals	106	156	755	0	0	462
Chronically Homeless Families	0	0	0	0	0	462
Veterans	19	28	105	0	0	198
Unaccompanied Child	0	0	0	0	0	42
Persons with HIV	8	0	11	0	0	380

Table 10 - Homeless Needs Assessment

Data Source

Comments: Metro Denver Homelessness Initiative 2025.

Indicate if the homeless population is: ☐ Has No Rural Homeless

If data is not available for the categories "number of persons becoming and exiting homelessness each year," and "number of days that persons experience homelessness," describe these categories for each homeless population type (including chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth):

A common misconception of the Point-in-Time (PIT) Homeless Count is that it provides a total yearly estimate of all the individuals experiencing homelessness within the community—for example, approximating the total number of individuals who fall into homelessness or access shelters across the span of the year. As the name implies, however, the PIT count provides only a snapshot of one night of homelessness in a community.

During a year, different individuals enter, exit, and return to a state of homelessness in the community. In other words, the homeless population is in constant flux as different individuals enter and exit homelessness each week.

Taking into consideration this dynamic of homelessness, researchers can use the results of the PIT Count to approximate the total number of individuals who will likely experience homelessness or access shelters at least once during the year. These annualized estimates are typically calculated as two to three times the nightly estimate of homelessness. The 2025 Homeless Count suggests that approximately 1,450 to 2,175 residents in Arapahoe County will experience homelessness during the next year.

The Tri-Cities Homelessness Initiative has implemented a validation of the PIT yearly data by conducting a monthly sampling of service requests through agencies using the Homeless Management Information System (HMIS), however, and has found consistency with the annual PIT data.

The 2024 State of Homelessness report by Metro Denver Homeless Initiative provides detailed profiles of each county in the metro Denver Continuum of Care and shows that Arapahoe, Douglas and Jefferson Counties have significantly higher percentages of unsheltered residents compared to the other counties in the region). This is consistent with stakeholder interviews and research for this report revealing a significant gap in emergency and transitional housing in Arapahoe County, with most services in the County being in Aurora. Unhoused residents in the western communities of Arapahoe County are therefore likely to either remain unhoused or travel to Denver to seek assistance. Stakeholders working with unhoused residents in Littleton indicated, however, that residents have significant safety concerns with accessing emergency or transitional housing in Denver and therefore often opt to stay unsheltered in the Tri-cities area.

The new navigation center in Englewood will provide an additional 50 transitional housing units and emergency beds which will alleviate some of the existing need in the Tri-cities, however, the location is remotely located in an industrial area in Englewood not easily accessible by foot, nor public transit which stakeholders cited as a barrier to adequately serving the unhoused community. The transitional units will only serve the population that is “ready to work”. Additionally, the County has contributed ARPA funds in partnership with the State of Colorado to the redevelopment of the Ridgeview Campus near Watkins, Colorado in unincorporated eastern/rural Arapahoe County for an additional 195 units of transitional housing anticipated to serve 315 unhoused residents needing supportive services per year, however, this location is in rural east Arapahoe County, 32 miles from the Tri-Cities area where currently the unhoused are concentrated. [FAQs | Ridge View Supportive Residential Community | Engage DOLA](#). Lastly, Arapahoe County provided ARPA funds for the Aurora Navigation Center and Shelter which holds 300+ beds.

Approximately 314 residents were unsheltered in the 2025 Point in Time, and nearly 1200 residents over the year, based on data provided by MDHI, indicated a critical need for more emergency and transitional housing services coupled with pathways to permanent affordable housing and jobs in the County and within closer proximity to resources and public services the Tri-cities area.

Chronic Homelessness: The National Alliance to End Homelessness reports that the chronically homeless are among the most vulnerable of persons experiencing homelessness. According to the Colorado Health Institute, chronically homeless individuals live an average of 30 years less than

individuals who have never experienced homelessness. HUD classifies individuals as chronically homeless if they have experienced homelessness for a year or longer, or if they have experienced four or more episodes of homelessness in the past three years and have a disability.

More than one in three homeless individuals are chronically homeless in Arapahoe County. The percentage of individuals experiencing chronic homelessness (36%) compared to the total population experiencing homelessness is about 8% percent higher than in 2025. Individuals experiencing chronic homelessness make up 24 percent of the unsheltered population in the 2025 Point-in-Time Count. According to Point in Time data, adults without children are most likely to be unsheltered and chronically homeless, while families with children are more likely to be newly homeless. Newly homeless is defined as a person who has been experiencing homelessness for less than one year and this was their first episode of homelessness.

A 2020 study on chronic homelessness in Arapahoe County, by the University of Denver Center for Housing and Homelessness Research commissioned by the Tri-Cities Homelessness Policy Group, found the top 5 reasons for homelessness in Arapahoe County are economic related: loss of job, rent increase or not able to afford rent, change of employment status, and unexpected/emergency expense with more social and physical factors rounding out the top 10 reasons including relationship issues, mental health, loss of family or friend, and disability.¹

Stakeholders from across all services and geographic areas of the County indicated a particular barrier to housing and likelihood of chronic homelessness for justice involved residents. Despite having served time, having consistent employment post-release and having saved the requisite funds for security deposit and rent, these residents are barred from using vouchers in the public housing system and landlords decline their applications following a background check. Arapahoe County has been leading the effort to fund a Permanent Supportive Housing project specifically focused on unhoused individuals exiting the justice system, with 60 units and operational services provided by AllHealth and a variety of other partners. Brothers Redevelopment has received \$3 million in ARPA funds for this initiative and additional awarded funds through the State of Colorado: Department of Local Affairs.

County HOME-ARP and ARPA funding has been allocated to the acquisition of a motel and land currently providing approximately 20 housing units on 2 floors for expansion to 100 shelter beds and supportive mental health and legal services in partnership with Project SAFER, the 18th judicial district courts, the Arapahoe County Pretrial Mental Health program, Diversion clients of the 18th Judicial District Attorney's Office, the Probation Mental Health Program. The program is geared towards residents exiting the justice system needing substance abuse, chronic and persistent mental health and legal supportive services.²

Families with Children: The National Coalition for the Homeless reports that poverty, the lack of

¹ University of Denver Center for Housing and Homelessness Research. 2020. "Tri-Cities Chronic Homelessness Assessment Results Report".

² [ArapahoeCounty_2022RecoveryPlan_SLT-0680.pdf \(treasury.gov\)](#)

affordable housing, decreasing government support, and domestic violence are the primary causes of family homelessness. Unlike the chronically homeless, family homelessness tends to be shorter term—ending a single episode of homelessness within three to six months. In 2025, 131 individuals in families were experiencing homelessness in Arapahoe County. Of these, 117 were in emergency shelters, 14 were unsheltered at the time of the count.

Typically, families become homeless after a period of housing instability characterized by eviction or moving from a housing unit due to inability to pay, doubling up with other households, couch surfing, and finally living in cars or motels before entering a shelter system. Most homeless families are single mothers, under age 30, with two young children. Many are fleeing domestic violence. Nationally, more than 90 percent of homeless mothers' report being physically or sexually abused in their life. In Arapahoe County 153 individuals were victims of domestic violence in the 2025 Point in Time count. The PIT count, however, does not include families staying in hotels/motels and doubling up with family and friends, and therefore McKinney Vento data captured through school district liaisons provide a more accurate landscape of families experiencing homelessness or at risk of being homeless.

The figure below shows the increase in students identified by school districts as experiencing homelessness from the 2006-2007 school year to the 2020-2021 school year (the most recent data reported). While all districts except Cherry Creek have recently trended downward, the majority of districts have similar if not higher rates than the 2006-2007 school year indicating the persistence of homelessness for families in Arapahoe County. Additionally, the numbers are considerably higher than the PIT data would suggest as previously indicated. In the 2020-2021 school year, between 65-80 percent of the students reported as unhoused were living in doubled up housing situations and between 12-20 percent were living in motels with the exception of Byers which reported 45 percent of unhoused

students living in motels.

McKinney Vento Homeless Student Data 2006-2021

Homelessness can impact the education, health, sense of safety, and overall development of young children. Compared to low-income families not experiencing homelessness, unhoused children have higher levels of emotional and behavioral problems, increased risk of serious health problems, are more likely to experience family separation, and are more likely to face education stability issues such as high mobility, dropping out, or repeating a grade. Homeless children are sick at twice the rate of other children and one in three unhoused children develop a major mental disorder by age eight.³ Stakeholders working with unhoused families indicated a concern that the only transitional housing available to families in the County is currently through Family Promise and necessitates families moving weekly from one faith congregation to another across the County with an inevitable significant disruption to children’s school attendance. Arapahoe County has invested CDBG funding in the GOALS and Family Tree House of Hope program with Family Tree which provides housing and wraparound services for families and contributed ARPA funds to the childcare center.

Veterans: Eleven percent of homeless individuals in the United States in 2023 were Veterans. In Arapahoe County, 60 percent or 28 veterans out of 47 experiencing homelessness were unsheltered.

In June 2018, the U.S. Interagency Council on Homelessness released the report, “Homelessness in America: Focus on Veterans,” which summarizes the most relevant data and research to inform policy

³ <https://endhomelessness.org/homelessness-in-america/who-experiences-homelessness/children-and-families/>

for addressing homelessness among veterans. This report is part of the Homelessness in America series which will include reports which focus on subgroups of the homeless population including unaccompanied youth, families with children, individual adults, and people experiencing chronic homelessness.

Services for homeless veterans nationwide are provided through homeless services programs for emergency shelter and transitional housing, the Department of Veterans Affairs' Supportive Services for Veteran Families (SSVF) program for rapid rehousing assistance, and through the HUD-VASH program which provides permanent supportive housing opportunities for veterans and their families. None of Aurora Housing Authority currently has VASH vouchers and indicated a very limited number of these vouchers are available through the state.

According to the report, from 2010 to 2017 the number of veterans experiencing homelessness nationwide was reduced by an estimated 46 percent and the number of unsheltered veterans experiencing homelessness was reduced by an estimated 50 percent. According to the Homelessness Screening Clinical Reminder responses through the VA health system, 0.8 percent of veterans are currently experiencing homelessness and 1 percent are at risk of homelessness.

Post 9/11 veterans, typically serving in Operation Enduring Freedom (OEF), Operation Iraqi Freedom (OIF), and Operation New Dawn (OND), have higher rates of service-connected disability, are more likely to receive public assistance, and have lower incomes compared to older veterans. Experiences before, during, or after military service have an impact on an individual's risks of experiencing homelessness including, "poverty, unemployment and economic hardships, trauma, mental health conditions (including but not limited to PTSD), substance use disorders, family or relationship conflicts, disruptions in connections to social support networks, social isolation, and incarceration." ⁴

Arapahoe County is actively participating in the Built for Zero methodology to achieve functional zero homelessness starting with veterans and has built a "by name" list of unhoused veterans in an effort to understand the needs of each unhoused person in the County; effectively matching them with services and potential housing. Data from Metro Denver Homeless Initiative indicate that 105 veterans each year in Arapahoe County are experiencing homelessness for approximately 150 days of the year.

Youth: At the time of the 2025 PIT count, there were 11 unaccompanied youth living in emergency shelter and 21 unsheltered. Unaccompanied or Transition Age Youth are defined as single youth who are under the age of 25 and not accompanied by a parent or guardian. Transition age youth are specifically those between 18-24 years old. Parenting youth are defined as those in the household that are under 25 years of age and are the guardian of a child under the age of 18.

The National Alliance to End Homelessness estimates that approximately 550,000 unaccompanied youth and young adults (age 24 and younger) experience an episode of homelessness for a week or more

⁴ Homelessness in America: Focus on Veterans (2018). U.S. Interagency Council on Homelessness.

annually.⁵ Youth homelessness is primarily caused by family conflict, but can also arise from circumstances like poverty, housing insecurity, racial disparities, mental health disorders, and substance use disorders.

Movement 5280 is an emergency sheltering model in Arapahoe County specifically focused on youth aging out of foster care and recently received ARPA funding to bolster accommodations and services. The organization currently provides mental health services and navigation services to the larger Tri-cities unhoused community. Stakeholders indicated that Movement 5280 could have the capacity to expand its available housing for youth significantly, but as a small nonprofit, will require additional funding and staffing to meet the expansion of housing and services. Some community concerns have arisen, however, Movement 5280 is currently creating a good neighbor agreement with residents in the community to ensure that voiced concerns by residents in the community are resolved.

⁵ <https://endhomelessness.org/homelessness-in-america/who-experiences-homelessness/youth/>

Nature and Extent of Homelessness: (Optional) data updated w/Arapahoe County

Race:	Sheltered:	Unsheltered (optional)

Pacific Islander	7	0
Ethnicity:	Sheltered:	Unsheltered (optional)
Hispanic	185	0
Not Hispanic	540	0

Data Source Metro Denver Homelessness Initiative 2025. The IDIS table above does not have a
Comments: category for Other Multiple Races of which reported 161persons. Disaggregation by sheltered/unsheltered was not available.

Estimate the number and type of families in need of housing assistance for families with children and the families of veterans.

According to the 2025 PIT count, as discussed above, there were 131 persons in families and 47 veterans (178 total residents) experiencing homelessness excluding the City of Aurora. According to 2022 five-year ACS estimates, there are approximately 1,700 families and 500 veterans living in poverty in Arapahoe County. Both families and Veterans need deeply subsidized housing units with onsite supportive services.

Describe the Nature and Extent of Homelessness by Racial and Ethnic Group.

According to the Point in Time data, the greatest number of people experiencing homelessness are white, non-Hispanic; however, as compared to the overall Arapahoe County (excluding Aurora) demographics, People of Color are overrepresented in the unhoused population. People of Color make up a greater percentage of those experiencing homelessness than their race/ethnicity in the general population. This is especially the case for people who identify as African American and Hispanic/Latino.

In the 2025 PIT, African American residents made up 22.2 percent of the unhoused population compared to only 5 percent countywide. Likewise, 25.5 percent of Hispanic/Latino residents are experiencing homelessness in Arapahoe County compared to the Hispanic/Latino population of 13 percent.

The Corporation for Supportive Housing (CSH) recently created a Racial Disparities and Disproportionality Index that measures whether a racial and/or ethnic group's representation in a particular public system is proportionate to, over or below their representation in the overall population. The index is currently only available at the state level. In Colorado, disparities in chronic homelessness are highest for American Indian/Native American and African American residents. The index suggests that American Indian/Native American residents are more than 5 times more likely to experience homelessness than non-Hispanic White residents; African American residents are more than 4 times more likely. Asian residents are much less likely than any other group to experience homelessness, and Hispanic residents have rates that are just slightly higher than non-Hispanic white residents.

Similarly, the Continuum of Care Analysis Tool for race and ethnicity indicates that for the Denver Metropolitan Statistical Area, which includes Arapahoe County, African American residents are 4 times more likely to experience homelessness and twice as likely to be in poverty. For families with children, African American residents have the same rate of homelessness as non-Hispanic white residents.

Describe the Nature and Extent of Unsheltered and Sheltered Homelessness.

According to the 2025 PIT count, 314 adults and children were unsheltered (e.g., on the street, under a bridge, or in a car) and 411 were sheltered. The number of unsheltered and unhoused residents in Arapahoe County is substantially higher than surrounding counties and consistent with the lack of sufficient emergency shelter. Currently, Arapahoe County only has services through nonprofit organizations for severe weather offering motel vouchers through HAAT Force and congregate shelter in a nonprofit location, Movement 5280 available for approximately 43 people and only during specific hours. Stakeholders interviewed for this Consolidated Plan shared that the majority of unsheltered homeless are middle to older single men and women and that families are more likely to be taken in by the community as McKinney Vento representatives at the schools assist them and community residents and relatives are more likely to provide shelter for them through temporary "doubling up".

Stakeholders also indicated the majority of unsheltered and chronically homeless were increasingly suffering from mental illness after exposure to trauma from living on the street. Many of the newly homeless have experienced a health emergency or job loss resulting in losing housing. Stakeholders expressed an urgency to quickly house the newly homeless before these residents become more difficult to place requiring more services due to the development of mental and physical illness from prolonged exposure to homelessness. For many chronically homeless, the co-existence of mental illness and being formerly incarcerated requires specific intervention involving partnerships across the criminal justice and health sectors to create a pathway to housing stability and prevent recidivism that exacerbates the challenge of finding permanent housing pathways. These services are being offered and expanded by Project SAFER in Arapahoe County, however, given the complicated nature of providing multiple forms of assistance simultaneously, more is needed. Multiple stakeholders observed that a significant share of unhoused residents in Arapahoe County are justice involved.

Residents and stakeholders through a variety of engagement venues expressed the critical nature of Arapahoe's County's lack of shelter for unhoused residents with specific concern focused on the Englewood and Littleton area. Resident focus group participants from public housing in Littleton were concerned that unhoused residents were seeking shelter through unlocked church and apartment exterior doors and sleeping outdoors on the streets. Additionally, a stakeholder from an organization in Littleton serving residents with disabilities had significant security concerns for her clients with unhoused residents regularly breaking into dormitories and the organization's facilities. AllHealth has a mobile response unit and 2/3 of the calls are related to homelessness. Currently the police departments of each municipality are at the forefront of assistance to the unhoused including providing transportation to service providers.

Stakeholders providing services and severe weather shelter to the unhoused population in Arapahoe County have seen increasing numbers of chronically unsheltered, unhoused residents from years in the past. HAAT Force has nearly doubled the number of vouchers during inclement weather over the past 3 years. Many unhoused residents seeking motel voucher shelter during inclement weather are living in cars. Stakeholders also indicated that unhoused residents in Arapahoe County feel safer on the streets than they do in congregate shelter settings in Denver.

NA-45 Non-Homeless Special Needs Assessment - 91.205 (b,d)

Introduction:

The non-homeless special needs assessment includes the elderly, developmentally disabled, persons with disabilities, persons with HIV/AIDS, and persons with drug and alcohol addictions. Services for these populations are critical in the prevention of homelessness. Common special needs populations identified in the County's consolidated plan public/stakeholders' forums included ex-offenders, and persons in need of non-traditional childcare (nights, evening, weekends).

Describe the characteristics of special needs populations in your community:

Elderly: The elderly population in Arapahoe County faces significant challenges, emphasizing the need for decent, affordable housing to support their health, independence, and emotional well-being. Remaining in familiar settings is particularly important for this group, but limited incomes and disabilities often place financial strain on elderly residents, reducing their independence. Rising costs in the community further exacerbate these challenges, as this population generally cannot increase their income to keep pace.

A resident focus group comprising low-income seniors at a public housing facility in the County revealed that stability of housing is a major concern, i.e. not knowing if they will continue to have their current housing situation. A low-income senior homeowner shared the inability to keep up with house maintenance and a severe issue with plumbing resulting in not having water for over a month. Senior participants also expressed significant concerns over end of life and financial planning, and navigation of public resources. Most residents in the focus group rely on social security and disability, however, these funds are insufficient to cover monthly expenses. The majority of seniors in the focus group did not own a car and have extreme difficulty finding transportation to medical appointments and to the grocery store. The group indicated an interest in living in a group home format in a residential area allowing them to share tasks and expenses.

According to the 2017-2021 CHAS data, Arapahoe County has 24,616 households with at least one person age 62 or older, accounting for nearly 36% of the total number of households. Elderly residents have a higher rate of homeowners who are cost burdened compared to renter-occupied housing highlighting the need for targeted housing solutions that address affordability, accessibility, and stability for Arapahoe County's aging population.

Persons with mental, physical, and/or developmental disabilities: In Arapahoe County, 24,816 persons live with a mental, physical, and/or developmental disability, accounting for 9 percent of all residents.

A stakeholder from Colorado Center for the Blind indicated a severe need for housing for students graduating from the nine-month program. Lack of adequate information on resources available to find affordable housing and often a reluctance for landlords to rent to visually impaired or blind residents is an issue. Additionally, accessing employment is a barrier to qualifying for apartment rentals as employers do not want to give an opportunity to residents who are blind and usually not even an interview creating a major barrier to finding housing. Many students who graduate from the Colorado Center for the Blind program live with family or friends as they are unable to access housing.

Persons with alcohol or other drug addiction: Rates of alcohol and illicit drug dependence in Colorado (11%) are higher than the national rate (7%). Similarly, the rate of those who need but are not receiving treatment for alcohol use (8%) is higher than the national rate (5%), as is the rate of those needing but not receiving treatment for illicit drug use (4%) in Colorado compared to the national rate (2.5%).

Persons with HIV/AIDS and their families: The Biannual Colorado HIV Surveillance Report, reports on the size of the population with HIV/AIDS in 21 Regions in Colorado. This report estimates that as of June 30, 2023, 1,925 people were living with HIV in Arapahoe County including Aurora and 70 percent (1352) are engaged in care.

Victims of domestic violence, dating violence, sexual assault, and stalking: Jurisdiction-specific data is not available for the number of victims of domestic violence. Based on the 2015 National Intimate Partner and Sexual Violence Survey by the CDC and 2022 ACS estimates, it is estimated that 13,325 persons, or four percent of the total population, are victims of domestic violence, dating violence, sexual assault, and stalking in Arapahoe County.

Although the supportive and housing services needed by IPV victims vary, generally, all need health care and counseling immediately following the event and continued mental health support to assist with traumatic stress disorder related to the event. Victims may also require assistance with substance abuse and mental health services, both of which are common among IPV victims. Affordable housing is also critical: the National Alliance to End Homelessness argues that a “strong investment in housing is crucial [to victims of domestic violence] so that the family or woman is able to leave the shelter system as quickly as possible without returning to the abuse.” The Alliance also reports that studies on homelessness have shown a correlation between domestic violence and homelessness.

Arapahoe County stakeholders shared that there are insufficient providers of domestic violence shelter or service provision within the County, and that rising housing costs have created a major obstacle for women experiencing domestic violence coming out of the COVID-19 pandemic which forced many victims to remain with their abuser. In 2020, 64 people were killed across Colorado in domestic violence related cases according to a 2021 report by the Colorado Domestic Violence Fatality Review Board.⁶ Another 15 cases were attempted murder related to domestic violence. Arapahoe County currently has 2 service providers with limited availability for families fleeing domestic violence. In addition to immediate care and response, there is an ongoing need for mental health support for families and individuals who have experienced domestic violence.

⁶ <https://coag.gov/app/uploads/2022/01/CDVFRB-report-2020.pdf>

What are the housing and supportive service needs of these populations and how are these needs determined?

Elderly: Housing options for the elderly range from independent living to assisted living, nursing homes, and support facilities like adult day care. Key considerations include location, affordability, proximity to healthcare and essential services, and ease of upkeep. As health issues become more common with age, elderly individuals benefit from access to healthcare and assistance with daily activities such as shopping and housekeeping. Proximity to essential services and reliable transportation is critical as mobility decreases, and safety becomes a growing concern for those living alone.

Providing secure, affordable housing for the elderly is vital. Access to healthcare, shopping, social networks, and public transportation supports seniors in maintaining independence. Additionally, housing may require modifications to address disabilities that often arise with aging, further ensuring a safe and supportive living environment.

Alcohol and Drug Addiction: Individuals with substance abuse problems require a comprehensive support system to achieve and maintain sobriety. Housing needs often include sober living environments that provide structure and a substance-free atmosphere conducive to recovery. Proximity to health facilities for ongoing medical and psychological treatment, access to employment support services, and connections to family and social networks for emotional stability are also crucial. Stable housing and employment are key factors in reducing relapse risks and supporting long-term recovery.

Detoxification facilities play a vital role in the initial stages of treatment, providing medical supervision during withdrawal, while rehabilitation centers offer the foundation for recovery. Access to these resources, combined with stable housing and integrated support services, is essential for individuals to break the cycle of addiction and rebuild their lives.

HIV/AIDS: See discussion below.

Disability: Individuals with disabilities represent a varied population with varying levels of independence and abilities. While they face many of the same housing challenges as the general population, they also have unique needs based on their capabilities. Many individuals with disabilities rely on a fixed income, limiting their housing options. Those with greater independence often utilize subsidized housing, while individuals requiring more support typically reside in community homes funded by public welfare or privately-owned personal care settings. Some adults with disabilities continue to live with their families throughout adulthood.

Regardless of the type of housing, continuous support services are crucial and must be tailored to each individual's abilities. These services may include assistance with daily living activities, transportation, or medical care. The availability of these support systems is essential to ensure that individuals with disabilities can maintain a stable and comfortable living environment, promoting independence and improving their quality of life.

Discuss the size and characteristics of the population with HIV/AIDS and their families within the Eligible Metropolitan Statistical Area:

According to the Biannual Colorado HIV Surveillance Report, as of June 30, 2023, an estimated 1,925 individuals were living with HIV in Arapahoe County, including Aurora, with 70% (approximately 1,352 individuals) engaged in care. These statistics are vital for public health planning and resource allocation within the County, aiming to enhance support systems and healthcare access for individuals living with HIV.

Engagement in care is crucial for managing HIV effectively, as it leads to better health outcomes and reduces the risk of transmission. The reported engagement rate indicates that a significant portion of individuals living with HIV in Arapahoe County are receiving necessary medical attention. However, it also highlights that 30% of this population may not be adequately connected to care services, underscoring the need for targeted interventions to improve linkage to and retention in care.

If the PJ will establish a preference for a HOME TBRA activity for persons with a specific category of disabilities (e.g., persons with HIV/AIDS or chronic mental illness), describe their unmet need for housing and services needed to narrow the gap in benefits and services received by such persons. (See 24 CFR 92.209(c)(2) (ii))

Arapahoe County does not have a preference for any specific category of disability when receiving an application for rental assistance for the first time. If the need for assistance remains, for a second application to be accepted the County includes a preference for families with children, seniors and disabled individuals for these households to receive assistance a second time.

In general, Arapahoe County will process applications with the following priorities:

- Households that have received a summons from the Arapahoe County Court showing a date for an eviction hearing.
- Households that are applying for the first time.
- Households with income less than 80% of area median income at the time of applying.
- All other households at risk of housing instability.

NA-50 Non-Housing Community Development Needs – 91.215 (f)

Describe the jurisdiction's need for Public Facilities:

In November 2024, Arapahoe County voters approved Ballot Measure 1A, effectively exempting the County from the TABOR (Taxpayers' Bill of Rights) revenue cap. This action restored the full mill levy, allowing the County to retain funds that previously had been refunded due to state limitations. This additional revenue underpins the County's \$570 million 2025 budget, marking an expansion of the general fund and allowing for renewed investment in essential services such as roads, public safety, housing and homelessness solutions.

Transparency and community involvement were emphasized throughout the process. Beginning in February 2025, Arapahoe County held over 110 community events and conducted two surveys to gather resident input, informing both the ballot language and budget priorities. In April 2025, the Board of County Commissioners formally established a 10-member Resident Advisory Committee (RAC) representing all five districts with members seated in Summer 2025. The RAC oversees the strategic allocation of TABOR funds, ensuring that spending aligns with voter intent and remains transparent. Despite growing property tax revenue from rising home values, the County still faces a \$316.6 million backlog in deferred maintenance and infrastructure improvements including roads, bridges, and transportation systems. Crucially, the restored TABOR funding allows the County to continue providing and enhancing vital services such as public safety, housing supports, and road maintenance without relying on expiring federal ARPA dollars. With stable, voter-authorized revenue and a dedicated oversight body, Arapahoe County is well-positioned to tackle its infrastructure needs and sustain critical public services in 2025 and beyond.

Respondents to the public survey and stakeholder meetings tailored to this Consolidated Plan indicated a prioritization of mental and behavioral health services, transportation for seniors and emergency housing with support services for the unhoused population. Individual stakeholder interviews with service providers also indicated an ongoing need for food for vulnerable population in the County and resource (including housing) navigation services.

To address this need, the County has incorporated the following goal into its Strategic Plan for the next five years as part of the Consolidated Plan: Public Facility Improvements.

Arapahoe County will provide assistance to entities, primarily other units of local government, non-profit organizations, and public housing authorities for public facility improvement projects, which typically replace integral components of their facilities and/or provide greater accessibility by removing architectural barriers.

How were these needs determined?

These needs were determined through a survey, resident focus groups, and stakeholder interviews conducted for the Arapahoe County Consolidated Plan.

Describe the jurisdiction's need for Public Improvements:

As the County's infrastructure ages and as needs change, priorities must be adjusted. New construction may be required to accommodate increased demand or replace aging streets and walkways while existing infrastructure requires periodic rehabilitation, replacement, or other improvements to protect the County's previous investments. The County may use CDBG where appropriate and available to address community concerns particularly at park and recreational facilities in low-mod areas.

To address these pressing needs, the County has incorporated the following goal into its Strategic Plan for the next five years as part of the Consolidated Plan: Public Infrastructure improvements

The transition from a rural to a more urbanized County presents a variety of infrastructure needs that exist in the unincorporated areas of the County as well as in some of the older neighborhoods of the municipalities. The County works with a variety of government agencies to address these needs which have been identified at the local level as well as the public participation process.

How were these needs determined?

These needs were determined through a survey, resident focus groups, and stakeholder interviews conducted for the Arapahoe County Consolidated Plan.

Describe the jurisdiction's need for Public Services:

The Needs Assessment points out non-housing issues that display a need for public services. For this reason, Arapahoe County will support various agencies providing a wide range of community based public services to residents including, but not limited to activities like food assistance, meals on wheels, rent/mortgage/utility assistance, youth services, health care enrollment and navigation, homeless prevention services, shelter supportive services.

To meet this need the County has added a goal in its Strategic Plan over the next five years of the Consolidated Plan: Community Public Services.

How were these needs determined?

These needs were determined through a survey, resident focus groups, and stakeholder interviews conducted for the Arapahoe County Consolidated Plan.

Housing Market Analysis

MA-05 Overview

Housing Market Analysis Overview:

This section provides an overview of Arapahoe County’s housing market, examining key factors such as housing stock composition, tenure patterns, pricing trends, and affordability. The assessment considers both rental and ownership markets, identifying challenges related to housing availability, cost burdens, and the condition of existing units. As Arapahoe County continues to experience population growth and economic expansion, understanding these housing dynamics is essential for shaping development strategies and housing policies that address the needs of residents.

Beyond traditional housing, this analysis evaluates the availability of homeless shelters, special needs housing, and supportive services for vulnerable populations. Additionally, non-housing community development factors—including infrastructure, public services, and neighborhood amenities—play a critical role in shaping the overall quality of life. Geographic Information System (GIS) mapping is utilized to provide a spatial analysis of housing needs and disparities, supporting targeted approaches to addressing infrastructure gaps and enhancing community resilience.

Arapahoe County’s strong economy and varied job market make it an attractive place to live and work. The County is home to key employment sectors, including healthcare, aerospace, advanced manufacturing, and financial services, all of which contribute to regional economic stability. A well-developed transportation network—including major highways such as Interstate 25, E-470, and US-85—enhances connectivity and facilitates commerce. Additionally, Arapahoe County benefits from proximity to Denver International Airport, which supports economic development and business growth. The County's extensive parks and open space system, cultural attractions, and vibrant business hubs make it a desirable destination for families, professionals, and retirees alike.

Historically, Arapahoe County has been an important economic center within Colorado, benefiting from its strategic location within the Denver metro area. Over time, the County has successfully diversified its economy, attracting major corporations in aerospace, telecommunications, and technology. This economic transformation has positioned Arapahoe County as one of the most economically resilient regions in the state. With ongoing investments in affordable housing, infrastructure, and public services, the County continues to support sustainable growth while balancing economic development with community needs.

The data sets in this report focus on Arapahoe County, Colorado, including county-level data and its communities, except for the City of Aurora

MA-10 Number of Housing Units – 91.210(a)&(b)(2)

Introduction

This section examines Arapahoe County’s housing stock in terms of housing type and tenure, detailing the number of units per structure, the distribution of multifamily housing, and unit sizes. It also analyzes the balance between owner-occupied and renter-occupied housing, providing a clearer understanding of the County’s housing landscape and the availability of different housing options across the jurisdiction.

All residential properties by number of units

Property Type	Number	%
1-unit detached structure	33,763	51.3%
1-unit, attached structure	6,121	9.3%
2-4 units	2,632	4.0%
5-19 units	8,118	12.3%
20 or more units	13,790	21.0%
Mobile Home, boat, RV, van, etc	1,332	2.0%
Total	65,756	100%

Table 31 – Residential Properties by Unit Number

Data Source: 2019-2023 ACS

Residential Properties by Number of Units

The table above outlines Arapahoe County's housing stock by structure type and unit count. Traditional single-family detached homes make up 51.3% of all housing units, while multifamily housing, defined by HUD as buildings with more than four units, represents 33.3% of the total.

Multifamily housing is divided by size: small buildings (3-19 units), medium buildings (20-49 units), and large developments (50+ units), with larger buildings concentrated in urban areas to address housing needs in densely populated neighborhoods. This varied housing mix accommodates a range of household sizes and preferences, reflecting the County’s efforts to meet varied community needs.

Multifamily Development Distribution

Arapahoe County has a total of 23,670 units within multifamily housing developments with three or more units, according to 2019-2023 ACS data. Of these, the majority, 13,790 units are within large multifamily buildings with 20 or more units. The remaining 9,880 units are within small multifamily developments with 3 to 19 units. These figures highlight the County’s varied multifamily housing stock, with a significant portion comprising smaller-scale developments.

Unit Size by Tenure

	Owners		Renters	
	Number	%	Number	%
No bedroom	78	0.2%	1,563	6.1%
1 bedroom	1,023	2.8%	9,429	37.0%
2 bedrooms	6,721	18.4%	9,373	36.8%
3 or more bedrooms	28,718	78.6%	5,130	20.1%
Total	36,540	100%	25,495	100%

Table 32 – Unit Size by Tenure

Data Source: 2019-2023 ACS

Unit Size by Tenure

In Arapahoe County, unit size varies considerably between owner-occupied and rental properties. Homeowner units are generally larger, with approximately 78.6% having three or more bedrooms, compared to just 20.1% of rental units. Conversely, only 2.9% of homeowner units are one bedroom or smaller, while this size category accounts for 43.1% of rental units.

Describe the number and targeting (income level/type of family served) of units assisted with federal, state, and local programs.

According to HUD's Office of Policy Development and Research (PD&R) Picture of Subsidized Households database, there are 5,120 subsidized housing units in Arapahoe County, with 98% of family households receiving housing assistance classified as very low-income. Minority households represent approximately 66% of family households receiving assistance, while 20% of assisted households include individuals with disabilities. These figures highlight the significant need for affordable housing across the County.

Arapahoe County participates in the Arapahoe County HOME Consortium, which includes the cities of Centennial, Englewood, Littleton, Sheridan, and the Town of Deer Trail. This consortium administers federal HOME Investment Partnerships Program (HOME) funding to expand and preserve affordable housing options for low-income residents throughout these communities. This collaboration plays a crucial role in supporting housing development, rental assistance, and rehabilitation programs that benefit vulnerable populations.

Innovative Housing Concepts (Englewood Housing Authority) is authorized for 427 housing vouchers and administers 345 vouchers across Sheridan, Englewood, Centennial, and unincorporated Arapahoe County, with most being tenant-based. The agency also manages 110 public housing units, including 100 high-rise units designated for elderly and disabled residents, 5 duplexes for working families (2-4 bedrooms), and 5 multifamily high-rise units for seniors and families.

South Metro Housing Options (Littleton Housing Authority) manages three project-based voucher properties, scattered-site single-family and duplex units, and one assisted living facility, totaling 196 units in Littleton. The agency also administers the Housing Choice Voucher (HCV) program, managing 275 vouchers to assist low-income households in securing stable housing.

Through the combined efforts of these housing agencies and the Arapahoe County HOME Consortium, subsidized housing programs help address affordability challenges, provide stability to low-income households, and support the development of additional housing resources for residents in need.

Provide an assessment of units expected to be lost from the affordable housing inventory for any reason, such as expiration of Section 8 contracts.

HUD's Multifamily Assistance and Section 8 Contracts Database identifies 10 Section 8 assisted housing developments in Arapahoe County, excluding Aurora. Altogether, these properties contain 572 assisted units.

In the next five years (between 2022 and 2027), 15 percent (86 assisted units) have contracts that are expiring, which means these units could be at-risk of being lost from the assisted housing inventory. These units are all located within Littleton.

Does the availability of housing units meet the needs of the population?

As outlined in NA-10, Arapahoe County faces a shortage of all affordable housing, but particularly in the homeowner housing categories that would accommodate both growing families and first-time homebuyers. This shortage is evident in the very low homeowner vacancy rate of 0.6% and the high rate of cost-burdened households.

Additionally, the County is experiencing gaps in the number of units that are affordable for both renters and homeowners.

Renter Affordability Gap

The following table displays the current affordability gap or surplus in rental units based on income. This graph only takes into account current renters. Overall, there is a need for over 13,000 units for residents earning less than 80% HAMFI and there is a surplus of approximately 13,500 units for higher income residents.

The affordable rent is based on what a household could afford without being cost burdened.

Income Group	Affordable Rent	Number of Households	Rental Units	Difference
Less than 30% HAMFI	Up to \$250	5,410	289	-5,121
Between 30% and 50% HAMFI	\$250 to \$600	4,845	981	-3,864
Between 50% and 80% HAMFI	\$600 to \$1150	7,030	2,616	-4,414
Between 80% and 100% HAMFI	\$1150 to \$1500	4,675	5,581	906
Above 100% HAMFI	\$1500 and greater	12,685	25,259	12,574

Homeownership Affordability Gap

The following table displays the current affordability gap or surplus in owner occupied units based on income. This graph only takes into account current homeowners and current renters. Overall, there is a need for over 40,000 units for residents earning less than 100% HAMFI, but this would lead to 100% homeownership (something that is both impractical and not necessarily a positive thing).

The affordable mortgage is based on what a household could afford without being cost burdened.

Income Group	Affordable Mortgage	Number of Households	Owner Units	Difference
Less than 30% HAMFI	Up to \$85,000	8775	955	-7,821

MA-15 Housing Market Analysis: Cost of Housing - 91.210(a)

Introduction

This section analyzes the cost of housing in Arapahoe County for both homeowners and renters. It includes a review of current home values and rental rates, along with an assessment of recent changes in these costs. Additionally, the section provides an in-depth examination of housing affordability for residents, evaluating how well the existing housing stock meets the financial needs of the County's population. This analysis is crucial for understanding the housing market's impact on residents and identifying affordability challenges within the community.

Cost of Housing

	Base Year: 2013	Most Recent Year: 2023	% Change
Median Home Value	\$227,417	\$516,951	127.3%
Median Contract Rent	\$862	\$1,692	96.2%

Table 33 – Cost of Housing

Rent Paid	Number	%
Less than \$500	\$775	3.1%
\$500-999	\$1,379	5.5%
\$1,000-1,499	\$5,858	23.5%
\$1,500-1,999	\$7,982	32.0%
\$2,000 or more	\$8,930	35.8%

Table 34 - Rent Paid

Data Source: 2019-2023 ACS

Housing Costs

Housing costs in Arapahoe County have significantly increased, with home values rising by 127.3% and rents increasing by 96.2% since 2013. The table above shows that 67.8% of renters pay \$1,500 or more per month for rent, representing the majority of renters in the County. Later in this section, rental rates are analyzed as a percentage of household income to evaluate the affordability of housing and assess the impact of these rising costs on residents.

Median Home Values

The map illustrates median home values by census tract in Arapahoe County, highlighting significant variance in affordability. Higher home values, exceeding \$600,000 and surpassing \$800,000 in some tracts, are indicated by darker shading, while areas shaded lighter indicate relatively lower median home values where many areas, particularly in the northwestern portion of the County fall below \$400,000 including several tracts falling under \$200,000. These variations in home values emphasize differences in affordability, access to amenities, and economic opportunities across the County. *The areas in the eastern portion of the County that are not shown on this map fall within the same census tract as the easternmost area displayed, with no variation data or tract boundaries.*

Median Rent

The map illustrates median gross rent by census tract in Arapahoe County, highlighting significant rent variations across different regions. Higher rental costs are more widely dispersed, where median rents exceed \$2,000, and some tracts surpass \$2,500. In contrast, lighter-shaded areas throughout the County represent lower median rents, with most tracts ranging between \$1,000 and \$1,500, and a few falling below \$1,000. This distribution reflects differences in housing demand, affordability, and development trends, underscoring the growing cost burden on renters in higher-cost areas while also indicating the availability of relatively lower-cost rental housing in select parts of the County. *The areas in the eastern portion of the County that are not shown on this map fall within the same census tract as the easternmost area displayed, with no variation data or tract boundaries.*

Housing Affordability

Number of Units affordable to Households earning	Renter	Owner
30% HAMFI	1,435	No Data
50% HAMFI	5,089	1,359
80% HAMFI	17,762	6,642
100% HAMFI	No Data	14,212

Table 35 – Housing Affordability

Data Source: 2013-2017 CHAS

Housing Affordability

Monthly Rent

Monthly Rent (\$)	Efficiency (no bedroom)	1 Bedroom	2 Bedroom	3 Bedroom	4 Bedroom
Fair Market Rent	\$1,658	\$1,835	\$2,201	\$2,874	\$3,225
High HOME Rent	\$1,464	\$1,569	\$1,886	\$2,170	\$2,401
Low HOME Rent	\$1,141	\$1,223	\$1,467	\$1,695	\$1,891

Table 36 – Monthly Rent

Data Source: HUD FMR and HOME Rents 2024

Data Comments: Denver-Aurora-Lakewood, CO MSA

HUD FMR and HOME Rent Limit

Fair Market Rents (FMRs), set annually by the U.S. Department of Housing and Urban Development (HUD), are used to determine payment standards for HUD programs. These estimates are calculated for metropolitan areas defined by the Office of Management and Budget (OMB), HUD-defined subdivisions of OMB metropolitan areas, and nonmetropolitan counties. Arapahoe County is part of the Denver-Aurora-Lakewood, CO Metropolitan Statistical Area (MSA).

HOME Rent Limits, derived from HUD-published FMRs, establish the maximum allowable rent for units assisted through the HOME program. These limits apply to new leases for HOME-assisted rental units, ensuring affordability for low-income households while aligning with local market conditions.

Is there sufficient housing for households at all income levels?

As outlined in NA-10, Arapahoe County faces a shortage of affordable housing, particularly in the small to medium-sized housing categories that would accommodate both growing families and elderly households. This shortage is evident in the high rate of cost-burdened households.

How is affordability of housing likely to change considering changes to home values and/or rents?

Predicting changes in home values in Arapahoe County is complex, as both home values and population have grown at a substantial rate over the past decade. While rising rental housing costs may slow in the near future, a complete reversal is unlikely without significant shifts in the housing market. To mitigate cost burdens and reduce the risk of homelessness, a substantial increase in affordable housing units is essential. Without these efforts, housing affordability challenges will persist, leaving many households vulnerable to instability and financial strain.

How do HOME rents / Fair Market Rent compare to Area Median Rent? How might this impact your strategy to produce or preserve affordable housing?

In 2023, Arapahoe County's median contract rent was \$1,692, which remained below all HOME Fair Market limits except for efficiency units and below High Rental Limits for efficiency and 1-Bedroom units. This median rent fell below Low Rental Limit for units with two bedrooms or less. This suggests that while overall rental costs appear relatively affordable compared to the maximum allowable limits for HOME-assisted units, affordability challenges persist, particularly for low-income households in certain areas of the County. As rising housing costs continue to outpace income growth, these affordability concerns are expected to potentially become more widespread and increase financial strain on renters.

Discussion

N/A

MA-20 Housing Market Analysis: Condition of Housing – 91.210(a)

Introduction

The tables and maps in this section offer insights into the condition of housing units across Arapahoe County by examining factors such as age, vacancy rates, and the occurrence of housing issues. HUD identifies four key housing conditions as problematic:

1. Homes lacking complete or adequate kitchen facilities.
2. Homes lacking complete or adequate plumbing facilities.
3. Overcrowding which is defined as more than one person per room.
4. Households that are cost burdened, spending more than 30% of their income on housing costs.

These factors provide a comprehensive overview of housing quality and affordability challenges throughout the County.

Describe the jurisdiction's definition of "standard condition" and "substandard condition but suitable for rehabilitation":

In Arapahoe County, housing units are evaluated based on their compliance with established building and property maintenance codes to ensure they meet health, safety, and structural integrity standards. The County has adopted various codes, including the International Property Maintenance Code, to regulate the condition and maintenance of residential properties.

Housing classifications in the County are generally categorized as follows:

1. **Standard Condition:** Units that fully comply with the applicable building and property maintenance codes, providing safe and habitable living conditions for occupants.
2. **Substandard Housing:** Units with one or more significant code violations that compromise safety or livability, such as lacking complete plumbing or kitchen facilities, structural deficiencies, or other hazards that render the dwelling unsafe or unsanitary.
3. **Substandard but Suitable for Rehabilitation:** Units with violations that are financially and structurally feasible to repair, making them viable for restoration rather than demolition.
4. **Dilapidated Housing:** Dwellings considered unfit for human habitation due to dangerous or hazardous conditions that threaten the health, safety, or well-being of occupants or the community to include:
 - o Structural deficiencies such as compromised walls, floors, or foundations that create safety hazards.
 - o Fire, wind, or water damage that renders the structure unstable or hazardous.
 - o Missing or damaged windows, doors, stairs, porches, or railings, posing risks to residents.
 - o Conditions that present health risks, including exposure to disease, pests, or unsafe environmental factors.

These classifications guide Arapahoe County's efforts to enforce housing standards, ensuring that resources are allocated effectively for property maintenance, rehabilitation, or demolition when necessary, thereby preserving the overall integrity of its communities.

Condition of Units

Condition of Units	Owner-Occupied		Renter-Occupied	
	Number	%	Number	%
With one selected Condition	8,282	22.7%	13,038	51.1%
With two selected Conditions	87	0.2%	712	2.8%
With three selected Conditions	36	0.1%	8	0.0%
With four selected Conditions	0	0.0%	0	0.0%
No selected Conditions	28,135	77.0%	11,737	46.0%
Total	36,540	100%	25,495	100%

Table 37 - Condition of Units

Data Source: 2019-2023 ACS

Housing Conditions

The table above highlights the number of owner and renter households in Arapahoe County that face at least one housing condition issue. Renters are significantly more likely to experience housing problems, with approximately 54% of renters affected, compared to only 23% of homeowners. Very few households face multiple housing issues, and based on the analysis in this document, it is clear that the most common housing problem is cost burden. This indicates that many households are struggling to afford their housing costs, which remains a critical issue for the County.

Year Unit Built

Year Unit Built	Owner-Occupied		Renter-Occupied	
	Number	%	Number	%
2000 or later	14,924	40.8%	10,021	39.3%
1980-1999	1,721	4.7%	5,829	22.9%
1950-1979	16,388	44.8%	7,670	30.1%
Before 1950	3,507	9.6%	1,975	7.7%
Total	36,540	100%	25,495	100%

Table 38 – Year Unit Built

Data Source: 2019-2023 ACS

Year Unit Built

In Arapahoe County, a notable portion of the housing stock was built before 1980, placing many units at risk for lead-based paint hazards due to the widespread use of lead paint before its ban in 1978. Approximately 54.4% of owner-occupied units and 37.8% of renter-occupied units fall into this category, potentially exposing an estimated 29,540 households to lead hazards. This presents a significant public health concern, particularly for vulnerable populations such as young children, emphasizing the importance of targeted mitigation efforts to reduce exposure risks.

To address this issue, Arapahoe County has established long-term initiatives to address the challenges associated with its aging housing stock, particularly homes built before 1980 that pose higher risks for lead-based paint (LBP) hazards and structural deficiencies. These initiatives are further explained later in this section.

Age of Housing

The map illustrates the distribution of older housing units across Arapahoe County, emphasizing areas with a high concentration of homes built before 1980. Many census tracts show over 40% of the housing stock predating 1980, with some areas exceeding 80% as indicated by darker shading, highlighting a widespread presence of aging homes. This underscores the need for targeted maintenance, modernization, and mitigation of potential health risks, such as lead-based paint hazards. As these homes continue to age, ensuring structural integrity, energy efficiency, and overall habitability will be essential for housing stability and public health efforts throughout Arapahoe County. *The areas in the eastern portion of the County that are not shown on this map fall within the same census tract as the easternmost area displayed, with no variation data or tract boundaries.*

Housing Units Built Before 1980

Risk of Lead-Based Paint Hazard

Risk of Lead-Based Paint Hazard	Owner-Occupied		Renter-Occupied	
	Number	%	Number	%
Total Number of Units Built Before 1980.	19,895	54.4%	9,645	37.8%
Housing units built before 1980 with children present	2,936	14.8%	1,715	17.8%

Table 39 – Risk of Lead-Based Paint

Data Source: 2019-2023 ACS (Total Units) 2017-2021 CHAS (Units with Children present)

Lead-Based Paint Hazard

As mentioned previously, any housing unit built prior to 1980 may contain lead-based paint in portions of the home. The most common locations are window and door frames, walls, and ceilings, and in some cases throughout the entire home. Thus, it is generally accepted that these homes at least have a risk of lead-based paint hazards and should be tested in accordance with HUD standards. Within the County there are approximately 29,540 total units built prior to 1980 according to 2019-2023 ACS Data. Based on the 2017-2021 CHAS data, there are around 4,651 units at risk of having a Lead-Based Paint Hazard that have children under the age of 6 present.

Vacant Units

	Suitable for Rehabilitation	Not Suitable for Rehabilitation	Total
Vacant Units	3,721	-	3,721
Abandoned Vacant Units	-	-	-
REO Properties	-	-	-
Abandoned REO Properties	-	-	-

Table 40 - Vacant Units

Data Source: 2019-2023 ACS

Vacancy Rate

The following map illustrates housing vacancy rates across Arapahoe County. Overall, the County reports very low vacancy rates with most tracts reporting below 6% and many of those below 3% as indicated by lighter shading. Areas with darker shading, while scarce, indicate higher vacancy rates several areas reporting more than 9% vacancy and a couple of tracts exceeding 12%. This distribution reflects that while the overall prevalence of vacant housing is low, there are still several areas with slightly higher rates. *The areas in the eastern portion of the County that are not shown on this map fall within the same census tract as the easternmost area displayed, with no variation data or tract boundaries.*

Need for Owner and Rental Rehabilitation:

The county of Arapahoe County has a growing need for housing rehabilitation due to the prevalence of aging housing units. As these homes continue to age, maintaining safe and secure housing becomes increasingly important, particularly for low-income households residing in older properties. Financial constraints often prevent these residents from making essential repairs, leading to potential safety hazards and deteriorating living conditions. Addressing this need is essential for preserving the housing stock and ensuring long-term livability for residents.

Estimated Number of Housing Units Occupied by Low or Moderate Income Families with LBP Hazards

Housing units built before 1980 in Arapahoe County may contain lead-based paint (LBP) in areas such as window and door frames, walls, ceilings, or even throughout the entire structure. These homes are considered at risk for LBP hazards and should be tested according to HUD standards. As indicated by the Age of Housing table and maps based on 2019-2023 ACS data, nearly 47% of housing units in Arapahoe County were built before 1980. Given the potential risks, it is safest to assume that all homes with LBP hazards are occupied by low- and moderate-income (LMI) households, affecting over 29,500 units. This underscores the need for targeted interventions to mitigate potential health risks for these residents, particularly vulnerable populations.

Discussion

In Arapahoe County, addressing lead-based paint (LBP) hazards in housing units built before 1978 is a significant concern, as nearly half of the County's housing stock predates this year. The County's Housing and Community Development programs aim to improve housing conditions for low- to moderate-income residents, which may include addressing LBP hazards.

While current County-led initiatives targeting LBP hazards have not been identified in available sources, homeowners and landlords in Arapahoe County can access private services to address potential lead-based paint issues in pre-1978 housing units. Private sector firms in the Denver-Aurora-Littleton area, such as Mile High Environmental Services and Rex Environmental, offer lead paint abatement and remediation services. These companies provide professional lead-based paint removal services, helping to mitigate LBP risks in older housing units.

MA-25 Public and Assisted Housing – 91.210(b)

Introduction

Applicable Federal Law and HUD regulations require that each public housing authority (PHA) develop and adopt a PHA Plan and update it on an annual basis. The PHA Plan provides details about Housing Authority programs, services, and general operations. In addition, the Plan focuses on implementation strategies designed to address residents' needs and issues, as well as outlining ways to improve operational efficiencies for the upcoming fiscal year. This planning mechanism requires that the Housing Authority examine its existing operational needs and design short and long-term strategies to address those needs.

In total, the County has three housing authorities: Aurora Housing Authority, Innovative Housing Concepts (Englewood and Sheridan), South Metro Housing Options (formerly Littleton Housing Authority). The Arapahoe County Housing Authority does not manage any vouchers nor housing developments at this time. Aurora Housing Authority data is not included as Aurora is an entitlement city and submits their own Consolidated Plan.

Totals Number of Units

Program Type: INNOVATIVE HOUSING CONCEPTS									
	Certificate	Mod-Rehab	Public Housing	Vouchers					
				Total	Project -based	Tenant -based	Special Purpose Voucher

# of accessible units									
*includes Non-Elderly Disabled, Mainstream One-Year, Mainstream Five-year, and Nursing Home Transition									

Table 11 – Total Number of Units by Program Type

Data Source: Innovative Housing Concepts

Totals Number of Units

Program Type: SOUTH METRO HOUSING OPPTIONS									
	Certificate	Mod-Rehab	Public Housing	Vouchers					
				Total	Project -based	Tenant -based	Special Purpose Voucher		
							Veterans Affairs Supportive Housing	Family Unification Program	Disabled *
# of units vouchers available				479	196	275	0	0	0
# of accessible units									
*includes Non-Elderly Disabled, Mainstream One-Year, Mainstream Five-year, and Nursing Home Transition									

Table 12 – Total Number of Units by Program Type

Data Source: South Metro Housing Options

Describe the supply of public housing developments:

The City of Littleton Housing Authority (dba South Metro Housing Options “SMHO”) owns and/or administers 196 affordable housing units (including 71 public housing units that were converted to Housing Choice Voucher assistance through Section 22 streamlined voluntary conversion). Additionally, 72 units at Bradley House were converted through RAD in 2019. South Metro Housing Options also administers 275 tenant-based vouchers.

Innovative Housing Concepts manages public housing for Englewood Public Housing. They oversee a total of 110 Public housing units, 100 of which are high rise units for elderly and disabled residents, 5 duplexes for working families of 2-4 bedrooms and 5 multifamily senior and family high rise. Authorized 427 vouchers and administered 345. Public Housing is located at Orchard Place in Englewood, South Sherman and Girard (downtown Englewood). Duplexes are scattered throughout Englewood. Orchard Place has always been public housing and is currently undergoing repositioning to RAD section 18 blend housing ([RAD/Section 18 Blends | HUD.gov / U.S. Department of Housing and Urban Development \(HUD\)](#)). Innovative Housing Concepts will continue to manage the high rise building as well as other developments. The change will only be the structure for the high-rise apartments. The future of the duplexes is currently undecided but if tenants are displaced, they will be given vouchers to find new housing. Innovative Housing Concepts is currently in the process of investigating different scenarios including home ownership opportunities or conversions of duplex into triplex.

Describe the number and physical condition of public housing units in the jurisdiction, including those that are participating in an approved Public Housing Agency Plan:

Public Housing Condition

Public Housing Development	Average Inspection Score
South Lowell Apartments	82b
Englewood	93c

Table 13 - Public Housing Condition

Describe the restoration and revitalization needs of public housing units in the jurisdiction:

As Innovative Housing Concepts is repositioning Orchard Place, they will no longer own any public housing units and therefore will not be involved in restoration or revitalization.

South Metro Housing Options was contacted about restoration and revitalization needs and did not provide information or data.

Describe the public housing agency's strategy for improving the living environment of low- and moderate-income families residing in public housing:

South Metro Housing Options' 5-year PHA Plan for 2019 to 2024 can be found on their webpage (<https://smho.co/wp-content/uploads/2020/09/SMHO-5-year-plan-final.pdf>). The goals and strategic objectives outlined below demonstrate the authority's strategy for improving the living environment of low- and moderate-income families.

1. Establish and/or strengthen partnerships.
2. Promote and publicize SMHO programs, projects, and accomplishments.
3. Encourage volunteerism from staff to further strengthen and improve community relations and engender community spirit in employees
4. Increase the number of affordable housing units in Littleton
5. Assess existing housing stock/programs
6. Explore previously untapped forms of funding
7. Build staff knowledge/expertise and teamwork
8. Improve organizational processes, technology and infrastructure

Innovative Housing Concept's five-year plan from 2020-2025 identified the following agency goals:

1. Expand the housing opportunities for lower-income families beyond traditional programs and at the same time reduce dependency on federal funding;
2. Enhance the image of affordable housing in our community;
3. Manage the public housing and Housing Choice Voucher programs in an efficient and effective manner thereby qualifying as at least a standard performer under PHAS and SEMAP; and
4. IHC shall explore new opportunities.

Discussion:

N/A

MA-30 Homeless Facilities and Services – 91.210(c)

Introduction

Arapahoe County is a member of the Metro Denver Homeless Initiative (MDHI) Continuum of Care. MDHI is an independently funded, non-profit organization whose mission includes the prevention and ending of homelessness in the seven county, Metro Denver Region and Continuum of Care provider for the Denver region.

Navigation of housing services. Individuals and families can access services throughout Arapahoe County at a variety of agencies and facilities that coordinate with the larger continuum of care. Navigation services for housing and basic resources are provided by Arapahoe County through County housing resource navigators; available for drop-in appointments at various sites in the County including public libraries, non-profit locations and the schedule is provided on the County website. Stakeholders expressed concern over sustainability of these navigators as they were funded by Emergency Rental Assistance (ERA) and the American Rescue Plan Act funding and therefore their future is uncertain. Assistance can also be provided by telephone or email, which are provided on the County website. These services are not considered case management and can only be utilized for 3 or more follow-up sessions.

Emergency Shelter. Emergency shelter beds are provided only by Family Promise, Family Tree, Salvation Army and and Comitis in Aurora. Emergency motel vouchers during severe weather can be accessed through HAAT Force. A small amount of congregate transitional housing is provided across faith congregations in the Tri-Cities (Littleton, Englewood, Sheridan) by Bridge House Navigation Center, however, residents are only allowed to stay between specific hours and must rotate across congregations. Project SAFER provides transitional supportive shelter for approximately 50 people who are both criminal justice involved and have severe and persistent mental illness. Family Tree has a limited number of scattered emergency shelter sites across the County and Gateway provides 30 day emergency and 90 day extended shelter for victims of domestic violence.

More than half of Arapahoe County's unhoused residents are unsheltered according to the most recent PIT report available at the time of this report from 2023. This is in contrast with surrounding counties whose unhoused population is the majority sheltered. Recognizing the urgent need for emergency and transitional housing with the growing population of unhoused residents, Arapahoe County has led and contributed funding to the development of the Tri-Cities Homeless Initiative's Navigation Center in Englewood opening in 2025 which will provide 50 beds per year of emergency and transitional housing, navigation services and workforce development by the Boulder Bridge House Ready to Work program.

Additionally, through ARPA and ARPA-HOME funds, Project SAFER will expand its operations through the purchase of the hotel and land from which it currently operates on 2 floors of the hotel in Centennial. Stakeholder interviews have indicated a strong recognition by the County that addressing the unhoused is a top priority across jurisdictions in the County.

The table below summarizes the number of emergency shelter beds and units that are available within Arapahoe County, however, excludes the City of Aurora.

Facilities and Housing Targeted to Homeless Households

	Emergency Shelter Beds		Transitional Housing Beds	Permanent Supportive Housing Beds	
	Year Round Beds (Current & New)	Voucher / Seasonal / Overflow Beds	Current & New	Current & New	Under Development
Households with Adult(s) and Child(ren)	149			141	
Households with Only Adults	52	40	50	164	
Chronically Homeless Households					
Veterans				137	
Unaccompanied Youth					

Table 14 - Facilities and Housing Targeted to Homeless Households

Data source: Metro Denver Homeless Initiative 2023, includes Aurora.

Describe mainstream services, such as health, mental health, and employment services to the extent those services are used to complement services targeted to homeless persons

Mainstream benefits play an important role in supplementing household income and serve as a safety net for vulnerable households. Arapahoe County Department of Human Services administers Temporary Assistance to Needy Families (TANF), Medicaid, SNAP, Adult Financial Assistance, the Child Care Assistance Program and a complete list and interactive map (source: <https://gis.arapahoegov.com/arapasource/#&ui-state=dialog>) of organizations that support homeless and low-income populations.

Arapahoe County Department of Community Resources administers workforce development, veteran services, senior resources, weatherization, community corrections oversight, housing and community development, homeless services, and pre-trial case management.

Intensive case management services from Continuum of Care providers within Arapahoe County including AllHealth Network and Doctors Care assist people experiencing homelessness in applying for and maintaining various types of assistance. Additionally, Arapahoe County has enlisted the public library system to provide navigation assistance in local branch libraries.

In addition to mainstream public services provided by the County, the following non-profit and faith organizations provide complementary supportive services which cover four major areas of need: economic support, housing, health, and support services. This is not a comprehensive list of all services; however, it is representative of key programs.

The key programs and services in place to provide support to residents are:

AllHealth Network: Mental and behavioral health services for low-income residents with multiple locations. AllHealth Network has a 24-hour walk-in crisis clinic, a short-term stay clinic and a longer supportive care facility in Littleton (Bridge House). They have partnered with local police departments to provide a mental health trained co-responder to accompany police in responding to emergency calls. Clients determined to be unhoused are entered into the HMIS system.

Aurora Mental Health: Community mental health provider serving residents in Aurora and across Arapahoe County.

Boulder BridgeHouse-Ready to Work: Provides transitional housing and workforce development for adults who are unhoused, some exiting incarceration with operations in Aurora. Boulder Bridge House will be the workforce development partner for the new navigation center in Englewood.

Cross Purpose: Provides free life skills training and workforce development including trade certifications through programming at multiple locations across the metro Denver area including Englewood.

Developmental Pathways: Assistance for adults and children with disabilities to address gaps in services provided through public sources.

Doctors Care: Clinic for low-income residents and recipient of Arapahoe County CDBG funds for healthcare navigation assistance program.

Englewood BridgeHouse-Ready to Work: Provides transitional housing and workforce development for unhoused adults supporting the tri-cities region. The new facility can support up to fifty individuals in a transformative setting with housing, case management, workforce development through a 9 to 12-month program, as well as connected navigation center with an additional twenty short-term beds and supportive services.

Family Tree: Support services for families at risk of experiencing homelessness. Currently operates a small quantity of scattered single-family residences as transitional housing and has been a recipient of CDBG funding.

Giving Heart Englewood: Provides access to computers and resources for getting documentation (ID's). Issues vouchers for basic needs in exchange for work in the resource room.

Family Tree GOALS: Two-Generation (2Gen) housing program for families experiencing homelessness from Aurora and Arapahoe County. GOALS provides families a private room while they develop long-term goals for stability through Family Tree.

Cafe 180: Provides free meals, showering and laundry facilities to residents experiencing homelessness or at risk of homelessness.

HAAT Force: Fills gap in emergency shelter space through providing motel vouchers to families, people with disabilities, pregnant women, people with pets or service animals, and older adults, on severe weather nights. Works with unhoused residents in navigating housing resources and participates in educating the public about homelessness. Recipient of CDBG funding in 2023.

Housed, Working and Healthy: Provides job training and housing navigation support to formerly unhoused residents participating in the program.

Integrated Family Community Services: Operates a market to address food insecurity in Englewood, supporting residents throughout Arapahoe County and surrounding areas. Also provides resource navigation for low-income residents in Arapahoe County. Received CDBG funding for ADA renovation to market in 2023.

Life Center Littleton offers resource navigation services, a food bank, showers, and job training opportunities. Located adjacent to public housing in Littleton.

Love, Inc. Faith based organization of the United Methodist Church that provides basic needs (supplies such as diapers), transportation services to residents in need. Operate a connection center for residents to connect with basic needs and run the Impact program for single moms to attain financial literacy and life skills.

Movement 5280: Operates a center for navigation of services targeted to the unhoused. Offers services focused on youth exiting foster care.

Project SAFER: Transitional housing and supportive mental health and legal services for residents with mental illness exiting incarceration.

Wellspring in partnership with Cross Purpose: Faith organization that has implemented a pilot workforce development program with Cross Purpose.

List and describe services and facilities that meet the needs of homeless persons, particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth. If the services and facilities are listed on screen SP-40 Institutional Delivery Structure or screen MA-35 Special Needs Facilities and Services, describe how these facilities and services specifically address the needs of these populations.

The following emergency shelters, transitional housing, and permanent housing with supportive services operate to meet the needs of persons experiencing homelessness:

Emergency Shelters: Arapahoe County currently offers emergency shelter during severe weather through HAAT Force, utilizing emergency hotel/motel vouchers, Movement 5280 for youth and young adults experiencing or at-risk-of homelessness, and Family Tree's House of Hope shelter for families.

Transitional Housing: A small number of unhoused residents with mental illness or behavioral health challenges who are referred through the One Home CoC system can access short term housing with supportive services through AllHealth. Additionally Project SAFER offers transitional housing with supportive services including legal aid to residents with severe and persistent mental illness after release from incarceration.

Permanent Supportive Housing: Permanent supportive housing units are operated by the Colorado Coalition for the Homeless outside of Arapahoe County. With ARPA funding, Arapahoe County also assisted in funding a 60-unit permanent supportive housing development program that is planned to be open in 2026.

MA-35 Special Needs Facilities and Services – 91.210(d)

Introduction

This section provides a summary of facilities and services that assist persons who are not homeless but who require supportive housing and programs to ensure that those persons returning from mental and physical health institutions receive appropriate supportive housing.

The primary housing need of many of these households is cost burden. Many people with special needs require supportive housing and services to enable them to live independently and to avoid homelessness or institutionalization. This is particularly true for elderly, frail elderly, persons with physical, mental or developmental disabilities, persons with HIV/AIDS, victims of domestic violence, veterans, and people with substance use disorders.

The supportive housing and services needed by these subpopulations are often like needs of people experiencing homelessness. Given this, the County does not identify specific priorities and objectives for non-homeless special needs populations but rather includes them with the array of services offered throughout the County.

Including the elderly, frail elderly, persons with disabilities (mental, physical, developmental), persons with alcohol or other drug addictions, persons with HIV/AIDS and their families, public housing residents and any other categories the jurisdiction may specify, and describe their supportive housing needs

NA-45 contains estimates of the number of special needs residents in Arapahoe County. These residents' supportive housing needs are varied but most include mental health support and counseling, job training and employment. Many of the services needed by special populations are available in the County yet funding to support them is limited.

There are several agencies serving Arapahoe County special needs populations that provide housing and services, including Section 8 rental assistance vouchers, and group homes. There are other group homes located within the County that also serve persons with developmental disabilities, and small designated assisted living facilities that serve frail elderly individuals. Good Shepherd of Colorado has private group homes serving persons with mental disabilities. A few of the group homes and assisted living facilities operating in Arapahoe County are listed below.

Name of Housing	City	Type	# of Units	Type
AllHealth Network	Littleton	PWD-Mental Health	12	Nonprofit
Creating Possibilities	Littleton	PWD	9	PHA

Simon Center	Englewood	Seniors/PWD	104	PHA
Developmental Pathways	Centennial	PWD	12	Nonprofit
Good Shepherd Lutheran Home	Littleton	Seniors/PWD	17	Private
Libby Bortz Assisted Living	Littleton	Assisted Living	111	PHA
Terraces on Pennsylvania	Englewood	Seniors	112	PHA

Table 15 - Group Homes and Assisted Living Facilities

Frail Elderly/Elderly:

Most seniors desire to age in place but may need accessibility modifications as they age and may need additional support services to properly maintain their home and property. Many may also require transportation services and in-home health care at certain stages. One stakeholder identified transportation as a major gap in senior services, as public provided transportation and uber services are not trained to transport seniors with mobility and physical challenges. The faith community has attempted to fill some of this need. There is currently one assisted living LIHTC community in Littleton with 111 units, Libby Bortz. Terraces on Pennsylvania Avenue and Simon Center in Englewood, in addition to Kings Point in Sheridan are LIHTC properties tailored to seniors and have 216 units combined.

Persons with Disabilities:

Accessible and adaptable housing is a primary housing need for people with disabilities and their families. Affordable housing with supportive services is needed to serve these populations effectively. Many people with disabilities are best served in an independent living environment and some need higher levels of support and supervision. Access to affordable, accessible, efficient public transportation is a critical need for residents with disabilities to access employment, medical care, mental health care, and supportive services. Currently there are two LIHTC properties that have units tailored to people with disabilities in Englewood, Canterbury Apartments and Simon Center. Developmental Pathways provides navigation and supportive services to people with disabilities and 12 transitional housing units.

Substance Use Disorders:

People with serious mental illness, substance use disorders or co-occurring disorders require coordinated and accessible treatment and support. Permanent supportive housing, particularly for those who have experienced homelessness is critical to prevent future episodes of homelessness. Peer supports and case management support can be effective services for this population. AllHealth Network provides lower income residents at risk of or currently homeless in Arapahoe County with 3 levels of support ranging from case management, entry into HMIS and resource navigation if the client presents as unhoused, short term stay with support and longer term stay when additional support is needed. Arapahoe County currently does not have any permanent supportive housing, although a project is currently in the development phases, anticipated to begin construction in 2026.

Public Housing – Self Sufficiency:

The supportive housing needs of families include financial education, home ownership and employment/training, and other supports geared toward assisting families toward self-sufficiency while in subsidized housing.

HIV/AIDS:

Arapahoe County has an ongoing need for stable, affordable housing for individuals living with HIV/AIDS, as housing security directly impacts health outcomes. Supportive housing that combines affordable living options with access to healthcare is essential, particularly for residents who cannot afford market-rate housing. Accessible housing options are also necessary to address the healthcare needs of aging residents. Comprehensive community services, including culturally competent healthcare, mental health support, substance use services, and case management, are vital for effectively managing their condition and supporting high-risk groups.

Describe programs for ensuring that persons returning from mental and physical health institutions receive appropriate supportive housing

Arapahoe County currently is not funding programs that focus specifically on ensuring that persons returning from mental and physical health institutions receive appropriate supportive housing; however, the County has worked to develop a comprehensive network of service providers for referrals to match clients at risk of homelessness or currently homeless with appropriate housing options through participation in One Home, the region's Coordinated Entry System. Programs that inherently support persons returning from institutions in finding supportive housing include SAFER and the County's resource navigators.

Specify the activities that the jurisdiction plans to undertake during the next year to address the housing and supportive services needs identified in accordance with 91.215(e) with respect to persons who are not homeless but have other special needs. Link to one-year goals. 91.315(e)

One of the major problems associated with meeting the needs of the underserved is the levels of funding. In today's economy, more and more Arapahoe County residents are requesting services, which places strains on the County's capacity to adequately provide appropriate care. One of the areas of weakness that the County continues to face is a fully functional referral system. This can be attributed to the recent funding uncertainties within all federally funded areas (TANF, SNAP, Medicaid, etc.) and the vast geographic parameters of service-delivery agencies. The County continues to increase the availability of information for service-providers to be carried on to residents and has interactive countywide resource information online through "ArapaSOURCE". Several stakeholders interviewed for the Consolidated Plan indicated that there is a shortage of funding to adequately address the needs of residents, so despite having a good referral relationship with the County and between service providers, residents cannot access the resources needed.

For entitlement/consortia grantees: Specify the activities that the jurisdiction plans to undertake during the next year to address the housing and supportive services needs

identified in accordance with 91.215(e) with respect to persons who are not homeless but have other special needs. Link to one-year goals. (91.220(2))

Please see above.

MA-40 Barriers to Affordable Housing – 91.210(e)

Negative Effects of Public Policies on Affordable Housing and Residential Investment

Arapahoe County has shown commitment to addressing land use and administrative barriers to affordable housing in the unincorporated area of the County, which is the only area it can implement land use policies related to housing (municipalities control land use within their boundaries). Recognizing the increasing need for additional housing, in 2021, Arapahoe County passed an ordinance allowing Accessory Dwelling Units on all single-family zoned parcels of at least 5,000 square feet resulting in a potential increase of 18,000 units in unincorporated areas. Public feedback initially indicated a desire to limit ADUs only to lots of 1 acre which would not yield a sufficient increase in units demonstrating NIMBYism as a barrier to housing in the County. Additionally, in December 2023, the Arapahoe County Department of Public Works and Development proposed multiple changes to the land use code and administrative processes to remove policies hindering affordable housing development and provide incentives to developers. These changes include: streamlined Planned Unit Development process that will reduce processing time by 15 days, substantially reduced planning division fees, reduced parking requirements, density bonuses, increased height allowance and reduced open space requirements. These efforts signal that the County understands the critical importance of dramatically increasing its affordable housing inventory and is positioned to take a leadership role in promoting affordable housing policies across the County's many municipalities and unincorporated areas.

Individual municipalities in recent years, namely Centennial, Littleton and Englewood, have conducted Housing Needs Assessments and were provided with strategies to increase affordable housing such as inclusionary housing programs, incentives for housing developers, upzoning to increase density, allowance of Accessory Dwelling Units, expedited approval processes, fee waivers, and land banking. These municipalities are all making steady progress in adopting some of these strategies. These efforts, however, have been met with considerable resistance from residents, most notably in Englewood, particularly the strategy of increasing density through upzoning. As is the case across the country, the abundance of single-family housing stock relative to the need for higher density housing types remains a barrier to increasing affordable housing. Inclusionary housing policies have been slightly less controversial although set aside amounts that are palatable to city governments and residents are very low and not likely to create the volume of units needed to address the current shortage of affordable housing.

Individual municipalities that have recently approved ADUs including Littleton, Englewood, Sheridan and Cherry Hills Village. Resident focus group participants for the Centennial Housing Needs Assessment in 2022 expressed a concern, however, that ADUs would be eligible for short-term housing or vacation rentals therefore negating any progress towards increasing affordable housing. Nevertheless, an ordinance allowing ADU's in Centennial became law in May 2024.

Stakeholders interviewed for this Consolidated Plan indicated that while efforts at coordination between municipalities, agencies and the County exist, and affordable housing has been elevated to high priority (particularly through the Tri-Cities Homelessness Policy Group), inconsistencies in strategies

to increase affordable housing and prevent homelessness across municipalities are a barrier to maximizing collective power and funding to have the type of impact needed. This, coupled with strong local control in the State of Colorado, complicates strategic coordination efforts for maximum impact. Stakeholders in affordable housing development organizations also expressed an interest in the County taking a proactive approach to identifying affordable housing opportunities.

Stakeholders working in service provision for unhoused residents also identified a need to provide more customized housing products such as transitioning smaller buildings across the County into housing for specific target populations instead of focusing on large scale developments. They also indicated a need to change local ordinances to allow more unrelated family members to share a residence with a caregiver, which would increase affordability and maintain support systems particularly needed by previously unhoused, foster care youth, and individuals with behavioral/mental health challenges. At the state level, Colorado HB24-1007, the Prohibit Residential Occupancy Limits bill has been signed into law in April 2024 and takes effect on July 1, 2024. This bill eliminates discriminatory occupancy limits in Colorado and expands housing opportunities for Coloradans.

Housing development stakeholders interviewed for the 2022 Englewood Housing Needs Assessment identified a multitude of local barriers to building affordable housing including cumbersome and time-consuming approval, parking requirements, and substantial residential power of a few groups in preventing dense housing projects from occurring.

One stakeholder expressed concern with Colorado's construction defect law that protects condominium homeowners from faulty construction but some feel disincentivizes builders due to higher insurance costs thereby reducing the stock of condominiums which are often the most affordable housing type for first time home buyers.⁷ Construction of new condominiums in all counties of the Denver region have declined significantly particularly in suburban areas such as Arapahoe County where this housing type could provide an affordable entry into the housing market for many buyers.

⁷ [r23-1138_create_construction_defects_ip_memo_from_legislator_memo_.pdf \(colorado.gov\)](#)

MA-45 Non-Housing Community Development Assets – 91.215 (f)

Introduction

Arapahoe County has evolved into a dynamic and multifaceted economic center, hosting a variety of industries that drive its growth and resilience.

Economic Evolution and Variation:

Historically, Arapahoe County's economy was rooted in agriculture and manufacturing. Over the years, the County has successfully expanded its economic base, embracing sectors such as aerospace, healthcare, information technology, and financial services. This transition has enhanced the County's economic stability and adaptability to changing market conditions.

Key Industries and Major Employers:

- **Aerospace and Defense:** The County is home to significant aerospace and defense operations, including Buckley Space Force Base, which is among the nation's fastest-growing military installations.
- **Healthcare and Biosciences:** The healthcare sector has seen substantial growth, with institutions like Swedish Medical Center and Craig Hospital serving as major employers in the region.
- **Information Technology and Telecommunications:** Companies such as Arrow Electronics and Comcast have established substantial operations within the County, contributing to its reputation as a technology hub.
- **Financial Services:** The presence of firms like Charles Schwab and Fidelity Investments underscores the County's strength in the financial sector.

The Denver Technological Center (DTC), partially located within Arapahoe County, exemplifies the region's commitment to fostering business development and innovation across these sectors.

Economic Indicators:

As of 2023, Arapahoe County's Gross Domestic Product (GDP) reached approximately \$64.3 billion, reflecting consistent growth over the past decade. The largest industries by employment include Health Care & Social Assistance, Professional, Scientific, & Technical Services, and Retail Trade, indicating a well-rounded and robust economic landscape.

This expanded economic portfolio positions Arapahoe County as a resilient and attractive environment for businesses and residents alike, contributing to its status as a key player in the broader Colorado economy.

Table 45 - Business Activity

Data Source: 2019-2022 ACS (Workers), 2022 Longitudinal Employer-Household Dynamics (Jobs)

As shown in the previous table, Arapahoe County has a substantial surplus of local jobs compared to available jobs, with 159,191 local jobs compared to 78,826 local residents in the workforce. This disparity is likely reported due to two cities, Aurora and Centennial, not being included in this report because they are entitlement cities that have their own separate Consolidated Plans. This reported information does indicate that it is unlikely to have an abundance of local workers commuting outside of the County for employment.

Labor Force

Total Population in the Civilian Labor Force	83,155
Civilian Employed Population 16 years and over	79,392
Unemployment Rate	2.6%
Unemployment Rate for Ages 16-24	12.4%
Unemployment Rate for Ages 25-65	5.3%

Table 46 - Labor Force

 Data Comments: All data except Unemployment Rate from 2019-2023 ACS

Unemployment

There are several methods for measuring unemployment, each with distinct advantages and limitations. The U.S. Census collects annual unemployment data by census tract, enabling geographic comparisons of unemployment rates across smaller areas. However, this data is typically two or more years old, making it less useful for real-time analysis. In contrast, the Bureau of Labor Statistics (BLS) provides monthly unemployment data, which is more current but only available at the county level, limiting its ability to reflect localized trends within specific neighborhoods or tracts. These statistics do include all of Arapahoe County including the two entitlement cities of Aurora and Centennial.

Jan	Feb	March	April	May	June	July	Aug	Sept	Oct	Nov	Dec
3.1	3.4	3.0	2.7	3.0	3.5	3.3	3.5	3.3	3.4	3.4	3.6

Table 1 - Unemployment Rate in 2023, BLS – Arapahoe County, CO

Jan	Feb	March	April	May	June	July	Aug	Sept	Oct	Nov	Dec
4.0	4.1	3.7	3.7	3.8	4.2	4.5	4.5	4.2	4.3	4.6	4.4

Table 2 - Unemployment Rate in 2024, BLS – Arapahoe County, CO

Arapahoe County's overall unemployment rate remained consistently low throughout 2023 and 2024, demonstrating a stable and resilient labor market. Rates were slightly higher in 2024. The year started with a 4.0% unemployment rate in January, reached its lowest point at 3.7% in March and April 2024, and ended at 4.4% in December. These figures remained right in line with the national average of 4.1% for 2024, highlighting the County's strong economic foundation and workforce stability. The sustained low unemployment rate reflects continued job growth, a varied economy, and a strong demand for labor across key industries, reinforcing Arapahoe County's position as an economic leader in the region.

Unemployment Rate

The map illustrates the variations in unemployment rates by census tract across Arapahoe County, showing that most areas maintain rates below 6%, reflecting a generally strong job market. However, a few tracts, particularly in the northern regions, exhibit higher unemployment levels exceeding 8% as indicated by darker shading. This distribution suggests a varied and resilient employment sector, with localized variations likely influenced by industry presence, workforce skill levels, and economic conditions in specific neighborhoods. Despite these disparities, the overall low unemployment rates highlight the County's stable economy and continued job opportunities across various sectors. *The areas in the eastern portion of the County that are not shown on this map fall within the same census tract as the easternmost area displayed, with no variation data or tract boundaries.*

Occupations by Sector	Number of People
Management, business and financial	42,811
Farming, fisheries and forestry occupations	105
Service	10,185
Sales and office	14,188
Construction, extraction, maintenance and repair	5,058
Production, transportation and material moving	7,045

Table 47 – Occupations by Sector

Data Source: 2019-2023 ACS

Occupations by Sector

The "Occupations by Sector" table illustrates the distribution of job types across various industries in Arapahoe County, differing from a previous table that focused on the distribution of jobs within specific sectors. For instance, managerial positions, whether in corporate offices or retail, are classified under "Management, Business, and Financial" in this table but would be categorized by industry in the earlier table.

In Arapahoe County, the largest occupational group is the Management, Business, and Financial sector, with over 42,811 jobs. The second-largest group is the Sales and Office sector, comprising 14,188 jobs. These sectors encompass vital roles such as managers, financial analysts, business professionals, retail workers, administrative staff, and customer service representatives, emphasizing the importance of professional and office-related occupations in the County's workforce.

Travel Time

Travel Time	Number	Percentage
< 30 Minutes	39,068	63.8%
30-59 Minutes	19,555	31.9%
60 or More Minutes	2,624	4.3%
Total	61,246	100%

Table 48 - Travel Time

Data Source: 2019-2023 ACS

Commute Travel Time

In Arapahoe County, most residents experience short to medium commutes, with 63.8% of commuters, or 39,068 individuals, traveling less than 30 minutes each way to work. An additional 31.9%, or 19,555 people, commute between 30 and 59 minutes. In contrast, only 4.3%, or 2,624 commuters, face longer

commutes of 60 minutes or more. The following map illustrates the low prevalence of workers with commute times longer than one hour, emphasizing that the majority of Arapahoe County's workforce benefits from relatively short travel times to their places of employment, contributing to an accessible and convenient work-life balance for many residents. The areas with the darker shades have a higher percentage of workers with longer travel times, while those with lighter shading indicate lower percentages. *The areas in the eastern portion of the County that are not shown on this map fall within the same census tract as the easternmost area displayed, with no variation data or tract boundaries.*

Commute Travel Time Greater Than One Hour

Education:

Educational Attainment by Employment Status (Population 16 and Older)

Educational Attainment	In Labor Force		Not in Labor Force
	Civilian Employed	Unemployed	
Less than high school graduate	2,895	242	1,343
High school graduate (includes equivalency)	9,456	723	2,549
Some college or Associate's degree	15,311	657	3,024
Bachelor's degree or higher	38,931	1,384	5,003

Table 49 - Educational Attainment by Employment Status

Data Source: 2019-2023 ACS

The table above details educational attainment by employment status for persons 16 years of age and older within the County. Unemployment rates are lower and labor force participation is generally higher for residents who have achieved a higher level of educational attainment.

Educational Attainment by Age

	Age				
	18–24 yrs	25–34 yrs	35–44 yrs	45–65 yrs	65+ yrs
Less than 9th grade	306	245	875	890	278
9th to 12th grade, no diploma	1,086	397	863	1,147	516
High school graduate, GED, or alternative	3,521	3,982	2,853	5,752	4,575
Some college, no degree	2,730	4,352	3,465	6,168	4,199
Associate's degree	409	1,715	1,264	2,443	1,308
Bachelor's degree	2,202	9,487	7,841	11,250	5,445
Graduate or professional degree	171	3,934	4,689	8,117	5,240

Table 50 - Educational Attainment by Age

Data Source: 2019-2023 ACS

Educational Attainment by Age

The previous table outlines educational attainment by age for individuals aged 18 and older in Arapahoe County. It highlights the varying levels of education achieved across different age groups, providing

insights into the County's educational landscape and its potential impact on workforce development and economic opportunities.

Educational Attainment – Median Earnings in the Past 12 Months

Educational Attainment	Median Earnings in the Past 12 Months
Less than high school graduate	\$34,968
High school graduate (includes equivalency)	\$43,409
Some college or Associate's degree	\$49,774
Bachelor's degree	\$72,790
Graduate or professional degree	\$88,001

Table 51 – Median Earnings in the Past 12 Months

Data Source: 2019-2023 ACS

Median Earnings by Educational Attainment

Educational attainment is a key determinant of potential earnings and financial stability. In Arapahoe County, individuals with higher education levels experience significantly greater median earnings. For instance, a person with a bachelor's degree typically earns nearly double the income of someone without a high school diploma, while those with a graduate or professional degree can also expect to earn just over twice what someone earns with a high school education. Over the span of a career, this income disparity becomes even more pronounced. An individual with a bachelor's degree working from age 23 to 62 can expect to earn around \$2.8 million, compared to approximately \$1.9 million for someone with a high school diploma working from age 18 to 62—an earnings difference of around \$900,000. This gap in lifetime earnings contributes significantly to wealth accumulation, further supported by the higher likelihood of home ownership, investments, and retirement savings often associated with higher salaries.

Based on the Business Activity table above, what are the major employment sectors within your jurisdiction?

In Arapahoe County, the Education and Health Care Services sector plays a pivotal role in the County's economy, employing approximately 14,837 individuals, nearly 19% of the local workforce. This same sector also represents the largest source of employment opportunities in the County, with 31,282 local job positions. Based on the overall low unemployment rates for the entire County, it is likely that additional workers from the entitlement cities fill many of the remaining 16,445 jobs in this sector. These industries are essential to Arapahoe County's economic stability, providing a wide range of job opportunities and addressing critical community needs in education and healthcare.

Describe the workforce and infrastructure needs of the business community:

Arapahoe County's 2023 update to the Strategic Plan reference the following economic development goals that will impact workforce needs in the community:

- Focus on green / environmentally focused business development including incentivizing alternative energy businesses to relocate to the County
- Encourage community based economic development and revitalization
- Promote tourism activities and businesses, with some efforts focused on rural Arapahoe County

Multimodal transportation will continue to be a major infrastructure need in the County with improved connectivity. In rural areas of the County, consistent, reliable and affordable broadband access is of great importance with many jobs continuing remote work opportunities.

Describe any major changes that may have an economic impact, such as planned local or regional public or private sector investments or initiatives that have affected or may affect job and business growth opportunities during the planning period. Describe any needs for workforce development, business support or infrastructure these changes may create.

Individual municipality economic development initiatives and impacts on workforce development and infrastructure are addressed individually later in this report.

The County has recently approved the rezoning and residential development of a 32.2 acre site that was formerly a church in the unincorporated area of Four Square Mile. The site will feature 345 apartment units, 168 paired homes, a five-acre park and a wireless communication facility to replace cellular antennas. Increasing population in an already densely populated and low to middle income unincorporated area with decreasing funds available for infrastructure improvement and community resources could pose considerable strain to existing public services provided by the County in Four Square Mile.

How do the skills and education of the current workforce correspond to employment opportunities in the jurisdiction?

Based on the tables in this section including information that excludes the entitlement cities of Aurora and Centennial and considering a reported countywide unemployment rate of just 2.6% in 2023, the overall workforce in Arapahoe County appears to be closely aligned with employment demand. However, the available data shows notable mismatches between the number of workers and available jobs in specific sectors, particularly in high-skill industries such as Professional, Scientific, and Management Services, Information, and Finance and Insurance. For example, professional and scientific services show a 60% gap between jobs and workers, and the information sector reflects a 79% mismatch. These gaps suggest a shortage of workers with specialized training or credentials in those fields.

However, it is important to consider that this dataset does not include the labor force or employment centers located in Aurora or Centennial—two cities that account for a significant portion of Arapahoe County’s population and economic activity. It is likely that many residents of these cities are employed in the sectors showing shortages in the worksheet and that these cities host a concentration of jobs in

finance, healthcare, tech, and management services, which could help balance the sectoral gaps identified in the non-entitlement portion of the County.

The low overall unemployment rate supports the interpretation that, at a countywide level, labor supply and demand are largely in balance, even if the distribution across geographies and sectors is uneven. While industries such as transportation and warehousing and agriculture show a relative surplus of workers in the non-entitlement areas, these imbalances may also be offset by employment opportunities in the entitlement cities.

In summary, although the data excluding Aurora and Centennial shows localized sectoral gaps, the County's strong overall employment performance and the likely regional integration of its workforce indicate that Arapahoe County's labor market is functioning well. Nonetheless, ongoing workforce development efforts—particularly in technical fields, healthcare, and professional services—remain important to address skill mismatches and ensure continued economic resilience across all areas of the County.

Describe any current workforce training initiatives, including those supported by Workforce Investment Boards, community colleges and other organizations. Describe how these efforts will support the jurisdiction's Consolidated Plan.

Arapahoe/Douglas Works! has identified a gap in the jobs available and the requisite skills to fill those opportunities in Arapahoe County. The Arapahoe/Douglas Works! Workforce Development Board initiated a number of opportunities to provide workforce development services for lower income residents in the County, according to its most recent “Strategic Planning White Paper” for 2021-2023⁸:

- Partnership project with Family Tree and Arapahoe County Human Services, Arapahoe/Douglas Works! is co-located at the Oxford Vista campus, which is the site of a transitional housing program, designed to house 10 to 15 families and provide economic support, mental and substance abuse counseling, early childhood care and other services. Arapahoe/Douglas Works! has a small resource center onsite.
- The Colorado Works Subsidized Training and Employment Program (CW STEP), which funds on-the-job training for persons receiving assistance through the Temporary Assistance for Needy Families (TANF) program allows the Arapahoe/Douglas Works! Business Services team to assist employer.
- Apprenticeship programs in partnership with the leading industries in the County, and funding for on-the-job training for residents receiving Temporary Aid for Needy Families (TANF) through the Colorado Works Subsidized Training and Employment Program (CW STEP) as well as those that are WIOA eligible, which are our lowest income and highest barriered participants.

This work supports the County's goal of addressing wage and housing mismatch for residents in the County who are severely cost burdened and at risk of being unhoused in this Consolidated Plan. Arapahoe/Douglas Works! is systematically conducting outreach to underutilized sources of labor to

⁸ ARAPAHOE/DOUGLAS WORKFORCE DEVELOPMENT BOARD. Strategic Planning Cycle 2021-2023

develop skillsets needed to fill more technical fields in Arapahoe County through industry sectoral partnerships in Aerospace, Information Technology, and Health Systems including:

- Public assistance recipients;
- Low income persons;
- Justice involved individuals;
- Individuals with a disability;
- Those without a high school diploma or equivalency;
- Laid off workers;
- Displaced homemakers;
- Older individuals;
- Homeless individuals;
- Youth who are in or have aged out of the foster care system;
- English Language Learners;
- Veterans

Recognizing the need for skilled workers in specific industries that dominate the economic scene in the region, Littleton Public Schools recently launched the Explorative Pathways for Innovative Careers academy which provides technical certification for high school students in the aerospace, business / entrepreneurship, computer science, health sciences and natural science industries. Additionally, Cherry Creek Schools' Innovation Campus provides college ready and technical programs for seven in-demand and growing career pathways.

Littleton is also home to Arapahoe Community College (ACC) which provides opportunities for workforce development, some of which is funded by the Colorado First state program. ACC is located in central Littleton with direct access to the RTD light rail and also offers an abundance of online courses and a wide variety of technical training. ACC also offers on the job apprenticeship training through corporate sponsors in the Tri-Cities region. ACC has also partnered with Arapahoe/Douglas Works!, corporate sponsors and the Colorado Opportunity Scholarship Initiative (COSI) to provide no cost training for people who became unemployed due to COVID-19. This program gives an opportunity for hospitality and restaurant hourly workers disproportionately impacted by COVID-19 to transition to higher paying, more consistent employment.

The Colorado Center for the Blind workforce training program and residential housing facility is also located in Littleton and is a world-renowned destination for training the visually impaired for the workforce and independent living.

TACT (Teaching Autism Community Trades) Umatilla Warehouse was made possible by Urban Land Conservancy, a land banking organization, and provides technical job training to residents with autism. TACT opened in 2023 in Englewood and provides students with the skills to be independent. Autistic adults have an unemployment rate of roughly 90% despite being highly capable and creative. TACT is now attracting students statewide.

Lastly, the City of Englewood is investigating the development of a business incubator program with consideration of different models and industries including a food and beverage focus (such as Comal in

Globeville) or professional/technical incubator/collective as a medium range (3-5 years) goal in their 2023 Economic Development Action Plan.⁹

These efforts are consistent with the needs identified by many stakeholders and are directly related to the ability to secure stable housing in the County and should be undertaken in close partnership with community organizations currently serving displaced and unhoused residents. One stakeholder indicated a reluctance of area businesses to consider clients with visual disability despite these residents having high levels of technical skills. This directly impacts these residents' ability to secure housing in the County. Training corporate sponsors and partners on employing workers with a disability should be highly prioritized. According to Arapahoe/Douglas Works! strategic planning report, a significant barrier to providing adequate training programs in the volume and quality needed is federal government funding reductions and will continue to pose a significant obstacle in moving people into employment that is sufficient to secure stable housing in the County.

Does your jurisdiction participate in a Comprehensive Economic Development Strategy (CEDS)?

No; Arapahoe County has not yet participated in a Comprehensive Economic Development Strategy (CEDS). Recognizing the interrelated nature of housing and economic development, the County is committed to establishing a more robust planning framework with the economic development offices of individual municipalities to more effectively harness collective impact on housing and community development.

If so, what economic development initiatives are you undertaking that may be coordinated with the Consolidated Plan? If not, describe other local/regional plans or initiatives that impact economic growth.

The most populous municipalities of Arapahoe County undertake their own economic development and housing planning. These include Littleton, Englewood, Centennial, and Sheridan; therefore are addressed separately below.

Littleton's Comprehensive Economic Development Strategy 2023 [Littleton CEDS \(future-iq.com\)](https://future-iq.com/littleton-ceds) recognizes housing as being at the forefront of community concerns. Although population growth is slow, if not plateaued (having grown at half the rate of the overall Denver MSA), housing remains unaffordable for residents working in the area. Littleton has more inflow of people coming in to work than outflow of residents going to work (25 percent leave Littleton to work mostly in Denver) which could be indicative of a housing shortage.

There is currently a strong demand for industrial real estate and multifamily rental units with higher prices and lower vacancy rates. Littleton has a very strong retail market and half of Littleton residential spending is local.

⁹ [638279443962241793 \(englewoodco.gov\)](https://englewoodco.gov/638279443962241793)

Littleton is engaging in a number of economic development activities that could coordinate well with their committed effort to adopt affordable housing strategies over the past few years. Projects referenced in the 2023 strategy include:

- Downtown Mobility & Streetscape Improvements Plan (2024) is underway, helping to guide city investment decisions for public realm enhancements, mobility, and connectivity in Downtown Littleton;
- Retail and Mixed-Use Market Analysis (2023) explores citywide retail and mixed-use development conditions and opportunities to help inform future strategies for development;
- Envision Littleton identified the following as an economic development goal: Revitalized commercial centers and areas that alleviate obsolete conditions and vacant sites and that meet the contemporary shopping and service needs of Littleton residents and visitors;
- Broadway corridor project Englewood, Centennial, Denver, and Arapahoe, Douglas, and Denver Counties to improve connectivity and economic opportunities along the corridor. Looking at land use;
- Efforts to improve downtown with more connectivity. This item in particular presents danger of displacement of residents in older homes near downtown. Less opportunity then for voucher residents to live downtown close to amenities, jobs and transportation as rent will be too high. Littleton Preserve any affordable housing in downtown area.
- Littleton is researching development along its Mid Mod Mile area which has significant opportunity for affordable housing proposed by the county and South Metro Housing Options

Littleton's most recent Housing Needs Assessment provided the following strategies to consider related to housing which are being coordinated with the above economic development plans which have been implemented: Offsets and incentives for affordable unit construction; and Fee in lieu option (for those not building units) and deeper incentives for higher affordability set-asides to clear a path for majority affordable (e.g., LIHTC, SMHO, Habitat) and strategic affordable infill showing a considerable dedication to the development of affordable housing in the Littleton community.

The **Englewood Economic Development Strategic Plan 2023** (englewoodco.gov) identifies the following primary focus areas: local business support, infill and redevelopment, and place-based economic development. Englewood references geographic constraints that contribute to its housing and planning strategy which is focused on infill and local business retention and growth: "Englewood, like its neighbors, is largely built out with few large vacant development sites. Englewood has a mix of pre- and post-World War II development ranging from compact single-family neighborhoods to low density automobile-oriented commercial corridors including South Broadway and Hampden Avenue. Englewood's development pattern is important to consider in this Economic Development Strategic Plan. Communities with more "greenfield" sites and capacity to grow are often more active in recruiting and incentivizing major employers and retailers."

Higher density infill construction has increased slightly since 2010 where land values are rising, and Englewood acknowledges that high densities are needed to make housing development feasible. Nearly 90% of Englewood businesses are small businesses, less than 20 employees and industrial property

makes up a large portion of Englewood's nonresidential development, much of which is aging and obsolete. Englewood's industrial space cannot compete with larger firms needing more modern facilities and could be repurposed for housing as smaller firms are occupying industrial space that is significantly larger than what they need. Some industrial space has been transitioned to Transit Oriented Development, specifically at Oxford Station. Stakeholders from Englewood's economic development office indicated a need for resources to support small business development in distressed areas of the community, mainly for infrastructure improvements.

As Englewood is mature and landlocked with no new developable land, it must consider density to address housing. Englewood and Littleton both have slower job growth as they lack the land to attract new bigger investments with large amounts of jobs. The availability of industrial space in Englewood allowed the development of the new Navigation Center for homeless residents that is scheduled to open in 2025. One stakeholder indicated that its location in a predominantly industrial area made it less controversial than it would have been in a residential neighborhood and that the business community directly surrounding the new site has been unanimously in support of it operating there, some businesses offering job placements for future residents at the center. According to stakeholders from Englewood's economic development office, downtown Englewood could offer non-controversial infill opportunities for affordable housing with accessibility to transit.

Lastly, Englewood has planned a CityCenter redevelopment project which is a 24-acre redevelopment including approximately 1.3 million square feet. It will be mixed-used development in six new buildings and one redeveloped building that will include civic uses, new streets, green spaces, public gathering areas, structured parking, and 150 on-street parking spaces. Redevelopment is also facilitating joint planning meetings between Swedish Medical Center and Craig Hospital. Both facilities have current building and campus expansion projects under construction, and plans for continued growth.

Sheridan is part of the South Metro Colorado Enterprise zone (sheridan.co.us). Relevant opportunities for economic mobility and housing include:

- Tax credit for providing job training to enterprise zone employees;
- Vacant building rehabilitation tax credit for business, commercial only

Sheridan's City Council approved the rezoning of the Bonsai Nursery property which was redeveloped into a 4.77 acre affordable apartment complex with 149 below market-rate units. Colorado Housing and Finance Authority approved the request by Medici Consulting Group in 2021 and construction began in 2022. Some units are being developed in partnership with Sheridan Housing Authority and all units will be income qualified at 30-60 percent of the area median income. Sheridan also approved accessory dwelling units in 2021 allowable on all single property zoned parcels. Arapahoe County has provided partial funding for Sheridan housing projects.

A stakeholder from the city's economic development department indicated that Sheridan coordinates closely with developers and other public entities to facilitate affordable development in the city and is committed to balancing market development with affordable options. Their efforts assisted Habitat for Humanity in the purchase of land from Sheridan School District and redevelopment into duplexes. A

mobile park home will soon be sold to a market buyer, and the city will consider imposing requirements to provide alternative housing arrangements to residents who will be displaced. Lastly, Sheridan has partnered with Boulder Bridge House Ready to Work for projects to improve transit stops throughout the city.

Centennial has one major economic development project in process. The District-Centennial is a 42-acre area west of I-25 between IKEA and the Dry Creek light rail station owned by Denver-based [Brue-Baukol Capital Partners](#). The District-Centennial is envisioned as a dynamic, mixed-use area, similar to The Streets at SouthGlenn, featuring a network of walkable blocks, active streets, and public gathering spaces such as plazas. Currently, The District-Centennial has one new building, a 306-unit luxury apartment building named The Glenn, while the remaining 36 acres is vacant, undeveloped land.

A recent Housing Needs Assessment recommended an inclusionary zoning policy paired with incentives, land banking for future development and increased density that would generate more affordable units in mixed use and multi-family dwellings. A stakeholder from Centennial City Council indicated that the council is discussing the recommended initiatives and is optimistic that most in some form will be implemented.

Centennial economic development staff provided detail on the city's commitment to streamlining approval processes for affordable housing projects and are currently working with Denver on a major LIHTC housing development project with 100-200 units along the city's border which is a retrofit of an office building. They also indicated that additional significant potential for affordable housing infill development exists along the midtown Centennial corridor in former businesses but would need expansion of water infrastructure.

Four Square Mile is an unincorporated area of Arapahoe County that is nestled between Denver and Aurora and home to over 20,000 residents. This area is unique as it falls under the jurisdiction of Arapahoe County with therefore more opportunity for the County to influence future development. Four Square Mile also houses 35 percent of the LIHTC housing units in the County.

As previously mentioned, the County has recently approved the rezoning and residential development of a 32.2 acre site that was formerly a church. The site will feature 345 apartment units, 168 paired homes, a five-acre park and a wireless communication facility to replace cellular antennas. Rental levels have not been released publicly so it is uncertain at present whether any units will be accessible for lower to middle income households.

Eastern Rural Unincorporated is along the I-70 corridor with easy access to Denver's airport and the city. In 2021, the County conducted an Area Vision Study to develop its land use and development policy for the 42 square miles encompassing the Watkins/Bennett and unincorporated eastern rural area of the County. Based on survey responses, residents prioritized preservation of the current environment (open space and farm/ranch land), and large residential lots but also expressed a need to

address water infrastructure and road improvements. Rural unincorporated areas of the County including the municipality of Deer Trail currently have a considerable quantity of unpaved roads.

Discussion

Please see above.

MA-50 Needs and Market Analysis Discussion

Are there areas where households with multiple housing problems are concentrated? (include a definition of "concentration")

HUD defines “housing problems” based on four specific data points: cost burden, overcrowding, lack of complete plumbing facilities, and lack of complete kitchen facilities. In Arapahoe County, housing issues are infrequent overall, except for cost burden. According to the 2019-2023 ACS 5-Year Estimates, the countywide rates are as follows:

- Cost Burden Renters: 54.6%
- Cost Burden Homeowners: 23.9%
- Overcrowding: 2.4%
- Lack of Complete Plumbing Facilities: 0.3%
- Lack of Complete Kitchen Facilities: 0.6%

For an area to be considered "concentrated" with housing issues, it must exhibit two or more problems significantly above the countywide averages, using HUD's definition of “disproportionate.” This threshold in Arapahoe County is set at 10 percentage points higher than the county average, equating to: a cost burdened renter above 64.6%, a cost burdened homeowner above 33.9%, overcrowding above 12.4%, lack of plumbing facilities above 10.3%, and lack of kitchen facilities above 10.6%.

In Arapahoe County, there is one tract within the County (excluding the entitlement cities) that meets the criteria for having more than one concentrated housing problem:

Census Tract #08005086900 – Overcrowded Renters (13.88%); Cost Burdened Renters (64.69%)

Are there any areas in the jurisdiction where racial or ethnic minorities or low-income families are concentrated? (include a definition of "concentration")

For the purposes of this analysis a “racial or ethnic concentration” will be any Census Tract where a racial or ethnic minority group makes up 10 percent or more of the population than the county as a whole. According to the 2019-2023 ACS 5-Year estimates the racial and ethnic breakdown of Arapahoe County’s population is:

- White, non-Hispanic: 68.7%
- Black, non-Hispanic: 4.5%
- American Indian and Alaska Native, non-Hispanic: 0.2%
- Asian, non-Hispanic: 4.2%
- Native Hawaiian and Other Pacific Islander, non-Hispanic: 0.1%
- Other Race, non-Hispanic: 0.5%
- Two or More Races, non-Hispanic: 4.8%

- Hispanic or Latino: 17.0%

In Arapahoe County, White households have a majority amongst demographic groups, with significant concentrations throughout many areas of the most populous regions of the County. Certain areas also show higher-than-average concentrations of Black/African American households, Asian households and Hispanic/Latino households, where these populations form a substantial part of the community. Other racial or ethnic groups do not display notable concentrations based on the established analysis criteria. The maps below illustrate these racial and ethnic distributions across Arapahoe County, excluding populations without significant concentrations. *The areas in the eastern portion of the County that are not shown on these maps fall within the same census tract as the easternmost area displayed, with no variation data or tract boundaries.*

Concentration White (non-Hispanic) households over 78.7%

Concentration Black / African American (non-Hispanic) households over 14.5%

Concentration Asian (non-Hispanic) households over 14.2%

Concentration Hispanic / Latino households over 27%

Low-Income Households

The map illustrates the distribution of low-income households in Arapahoe County, highlighting census tracts where median household income (MHI) falls below 80% of the county's overall MHI of \$97,179. These areas, where households earn \$77,744 or less, are primarily concentrated in the northwestern and western regions of the county. The prevalence of lower-income households in these areas suggests a higher demand for affordable housing, social services, and economic development initiatives to support financial stability and workforce accessibility. Addressing income disparities in these regions may require targeted job training programs, investment in local businesses, and expanded access to affordable housing opportunities. *The areas in the eastern portion of the County that are not shown on this map falls within the same census tract as the easternmost area displayed, with no variation data or tract boundaries.*

What are the characteristics of the market in these areas/neighborhoods?

Low-income neighborhoods in Arapahoe County, particularly in the eastern regions, face several economic and housing challenges that influence their local markets, including older housing stock requiring rehabilitation, significant housing cost burdens, severely overcrowded homes, and increased need for services among low-to-moderate income residents.

Arapahoe County has developed a Market Value Analysis tool in partnership with the Reinvestment Fund to identify housing market opportunities across the county ([2024 Market Value Analysis Map.](#)) The map below shows markets in the County where homes could be attainable to lower to middle income

households. Markets are classified into groupings based on percent owner occupied, median value, sales variance, evictions, age of housing, and density. Orange, gold and yellow markets are naturally occurring affordable housing that is attainable for low to middle income households and have the following basic metrics:

Orange (G) markets: \$431,244 median home value, 70% owner occupied, 90% built before 2000

Gold (H) markets: \$347,836 median home value, 60% owner occupied, 91% built before 2000

Yellow (I) markets: \$257,402 median home value, 28% owner occupied, 77% built before 2000

These markets are concentrated in Sheridan, Englewood, and mostly Aurora, with small pockets dispersed throughout Littleton and Centennial. As previously mentioned, these municipalities have a larger stock of older, small homes in need of rehabilitation or repairs.

Are there any community assets in these areas/neighborhoods?

The Tri-Cities area of Arapahoe County comprising Littleton, Englewood and Sheridan have robust networks of community organizations providing a broad range of services and an active faith network engaged in community service. Each municipality has a well-resourced public library that offers free computer and printing services, and the Sheridan Public Library in the Arapahoe County library network partners with Arapahoe County for housing navigation services. The area is also in close proximity to public transit; both light rail and bus. Educational opportunities include Arapahoe Community College

and workforce development opportunities from Arapahoe Douglas Works! as well as programs organized by the individual municipalities.

Resident responses to the Housing and Community Needs Survey for this Consolidated Plan, however, revealed a difference of neighborhood experience related to community assets between lower and higher income respondents across all categories listed which included access to food, health, jobs, transportation, low crime neighborhoods, and public facilities in good condition.

Are there other strategic opportunities in any of these areas?

Strategic opportunities exist to further invest in and revitalize these areas. Arapahoe County's Strategic Plan emphasizes implementing programs and policies that help break the cycle of poverty, address health-related barriers, and improve financial well-being for families. Additionally, the county's Community Health Improvement Plan aims to leverage community assets to improve conditions associated with access to affordable housing, nutritious food, and healthcare. Investments in infrastructure, such as transportation and utility services, can enhance connectivity and support economic growth. By implementing these strategies, Arapahoe County can promote sustainable community development, reduce economic disparities, and foster long-term resilience in these neighborhoods.

See discussion above.

INSERT AP-50 MAPS HERE WHEN ENTERING IN IDIS.

MA-60 Broadband Needs of Housing occupied by Low- and Moderate-Income Households – 91.210(a)(4), 91.310(a)(2)

Describe the need for broadband wiring and connections for households, including low- and moderate-income households and neighborhoods.

Internet access is a critical component of modern communication and information-sharing, enabling users to benefit from the growing interconnectedness of business, education, commerce, and everyday activities. Reliable internet connectivity has become essential for success in today's economic landscape. Communities without broadband access face significant challenges in keeping pace with the rest of the country. The lack of broadband infrastructure limits residents' ability to access educational and entrepreneurial opportunities, which is especially concerning in low- to moderate-income (LMI) areas where economic opportunities are often limited.

Research from the Pew Research Center underscores the vital role that high-speed internet plays in enhancing educational and employment opportunities, particularly in underserved communities. The center's studies have shown that individuals with reliable broadband access are more likely to engage in online learning, apply for jobs, and participate in economic activities that can improve their quality of life.

Similarly, reports from the Federal Communications Commission (FCC) highlight the direct correlation between broadband availability and economic development. The FCC's findings indicate that regions with robust internet infrastructure experience higher rates of job creation, educational attainment, and overall community growth.

Arapahoe County, Colorado, enjoys comprehensive broadband coverage, with the vast majority of the County offering various internet service provider options, including in LMI areas. The average Arapahoe County household has access to at least three (3) broadband-quality internet service options. Certain areas, particularly cities on the west side of the County, have a higher number of providers available. According to ISPReports.org, Arapahoe County benefits from a variety of infrastructure options, including cable, fiber, and fixed. Ninety-five percent (95%) of households have an internet connection, with broadband service available to 99.70% of the county. Of those households, 84% have fiber, cable, or DSL, 6% have satellite, 0% are still on dial-up. The map below illustrates broadband availability throughout Arapahoe County, defined as advertised internet speeds of 768 kilobits per second or higher.

See map: Broadband Access

Describe the need for increased competition by having more than one broadband internet service provider serve the jurisdiction.

To ensure high-quality broadband service, it is crucial to foster competition among service providers. A lack of competition, where a single provider dominates an area, can diminish the incentive to deliver reliable and consistent services. According to ISPReports.org, Arapahoe County is served by twenty-two (22) Internet providers offering residential service. Among these, Xfinity and CenturyLink stand out as the leading providers in terms of coverage and speed. Internet providers throughout the county include:

XFINITY (Fiber and Cable)
CenturyLink (Fiber and DSL)
Quantum Fiber (Fiber)
Ting (Fiber)
Bijou Telephone Co-Op (Fixed Wireless)
Starry (Fixed Wireless)
Earthlink (Fixed Wireless)
T-Mobile Home Internet (Fixed Wireless)
Verizon (Fixed Wireless)
Aerux Broadband (Fixed Wireless)
Rise Broadband (Fixed Wireless)
BAM Broadband (Fixed Wireless)
AT&T (Fixed Wireless)
Kellin Communications (Fixed Wireless)
Live Wire Networks (Fixed Wireless)
Xtream Internet (Fixed Wireless)
Viaero (Fixed Wireless)
Dish (Satellite)
DirecTV (Satellite)
HughesNet (Satellite)
Viasat Internet (Satellite)
Starlink (Satellite)

The map below shows the number of broadband service providers by census tract. Most of Arapahoe County has access to at least three (3) high speed internet providers. This variety fosters competition and helps ensure reliability and affordability.

See map: Highspeed Internet Providers

MA-65 Hazard Mitigation - 91.210(a)(5), 91.310(a)(3)

Describe the jurisdiction's increased natural hazard risks associated with climate change.

In 2010, Arapahoe County adopted the Regional Hazard Mitigation Plan, which was developed by the Denver Regional Council of Governments (DRCOG). In 2021, the County updated and adopted a new version of the [Arapahoe County Hazard Mitigation Plan](#) (ACHMP). This updated plan addresses both natural and human-caused hazards, serving as a blueprint for coordinating and implementing mitigation policies across the county.

The 2021 Hazard Mitigation Plan identifies a range of potential threats and ranks them according to their associated risks. These include:

- Low Ranking: Active Threat
- Medium Ranking: Cyber Threat, Dam Failure, Drought, Flooding, Hazmat Release, Severe Wind/Tornado, Wildfire
- High Ranking: Pandemic, Severe Summer Weather, Severe Winter Weather

The plan also explores how climate change and development trends may influence the future severity and frequency of these hazards. Drawing on data from the U.S. Global Change Research Program's Fourth National Climate Assessment (NCA4), the plan highlights several climate-related risks specific to the Southwest region, including Colorado. These risks include increased heat, prolonged drought, insect outbreaks, wildfires, and flooding.

From 1950 to 2018, the region experienced some of the fastest warming in the country, outpacing the global average. Projections suggest that summers in Colorado may become as warm or warmer than the hottest 10% of summers recorded between 1950 and 1999. Under a higher emissions scenario, average temperatures in Colorado could rise by 2.5°F to 5.5°F by 2041–2070 and by 5.5°F to 9.5°F by 2070–2099.

These temperature increases are expected to intensify existing hazards, such as droughts, heat waves, and extreme precipitation, ultimately increasing the risk of flooding. The plan raises specific concerns about the loss of snow cover, declining snowpack, and reduced water supplies—all of which could affect agriculture, food security, and water management. Additionally, higher temperatures may limit the effectiveness of precipitation in replenishing water sources, contribute to greater heat stress on public health, and place new demands on infrastructure, including the potential for disruptions in electric power generation.

Addressing climate-related challenges requires proactive planning and resilience-building strategies to mitigate risks and safeguard public health. The Centers for Disease Control and Prevention (CDC) emphasizes that climate change, combined with other environmental and human-induced stressors, exacerbates existing public health threats and introduces new risks, highlighting the need for comprehensive preparedness efforts. The FEMA National Risk Index identifies cold waves, hail, ice storms, and tornadoes as the county's most significant hazards. As Arapahoe County faces hotter, drier summers, more intense storms, and worsening flood risks, these vulnerabilities highlight the need for proactive mitigation strategies to protect infrastructure and communities.

Although Arapahoe County is located approximately 1,000 miles from the coast, climate change impacts elsewhere—such as rising sea levels and stronger coastal storms—may drive population displacement. A potential influx of people could put additional pressure on housing, jobs, and essential resources.

Arapahoe County is building resilience to natural hazards through a combination of proactive planning, infrastructure improvements, inter-jurisdictional coordination, and public outreach. The 2021 Hazard Mitigation Plan emphasizes reducing risk to people and property by addressing vulnerabilities across the county's varied communities. Efforts include protecting critical infrastructure, enhancing emergency warning systems, and implementing flood control and wildfire mitigation projects. The county actively collaborates with municipalities and special districts to align mitigation actions with local capabilities and needs. By regularly updating its mitigation strategies and incorporating hazard resilience into land use and policy decisions, Arapahoe County is taking a forward-looking approach to reduce future disaster impacts and enhance community well-being.

Describe the vulnerability to these risks of housing occupied by low- and moderate-income households based on an analysis of data, findings, and methods.

Low- and moderate-income households, whether renting or owning, are particularly vulnerable to climate change and natural disasters due to limited financial resources. Rising electricity and housing costs can push them into unstable living conditions, increasing the risk of homelessness or substandard housing. The 2024 America's Rental Housing Study from Harvard's Joint Center for Housing Studies highlights how escalating insurance premiums and coverage withdrawals in high-risk areas make securing protection against climate-related losses increasingly difficult, while stagnant operating income further limits property owners' ability to invest in climate resilience. The 2021 EPA study on Climate Change and Social Vulnerability reinforces these concerns, revealing that low-income individuals are more likely to live in areas experiencing rising mortality rates from extreme temperatures and face the highest labor hour losses due to weather exposure. Rural communities are especially disadvantaged, often lacking emergency support and resources for climate-related home repairs. As climate threats intensify, strengthening resilience among low- and moderate-income households is essential to ensuring their safety, stability, and long-term well-being.

According to the ACHMP, the impacts of future conditions pose a threat to people and property. Flooding and severe weather events, such as severe winds and extreme cold, pose significant risks to vulnerable populations in Arapahoe County. Approximately 5,964 people (0.9% of the county's total population) live within the 1% annual chance flood hazard area, with an additional 6,965 residents in the 0.2% flood hazard area. Flooding can particularly impact low-income families who may lack financial resources for preparedness and recovery and are more likely to be uninsured or underinsured. People with disabilities also face added challenges during evacuations, highlighting the need for early and accessible communication through multiple channels.

In terms of severe winds and extreme cold, low-income families are more likely to live in poorly constructed homes that are more susceptible to wind damage, while people with disabilities may need additional support if transportation or utility services are disrupted. The elderly, infirm, homeless, and

low-income households are at heightened risk during extreme cold events, often lacking access to a reliable heat source or the financial means to maintain one. Together, these hazards emphasize the critical need for targeted support and emergency preparedness strategies to protect the most at-risk community members.

FEMA's National Risk Index identifies Arapahoe County as having a relatively high level of community resilience, indicating that its residents have a relatively high ability to prepare for, adapt to, and recover from natural hazards. This assessment encompasses six broad categories: social, economic, community capital, institutional, infrastructural, and environmental factors at the county level. The map below illustrates FEMA's qualitative risk to natural hazards at the census tract level within the county, providing an intuitive way to gauge community risk based on Expected Annual Loss (EAL), Social Vulnerability, and Community Resilience scores.

Risk levels across Arapahoe County range from relatively high to very low, with most areas falling within a moderate risk index. However, risk variation throughout the County suggests the need for targeted mitigation efforts to address specific hazards. These two indexes measure risk from different perspectives—FEMA's risk index evaluates a community's ability to respond to hazards (resilience), while the county's qualitative assessment concentrates on the likelihood and severity of those hazards. This dual approach ensures that resources are allocated where they are most needed, promoting both preparedness and targeted intervention. The County must continue to address these geographic challenges by anticipating, planning, and adapting to the risks associated with climate change and the potential demographic shifts affecting vulnerable communities.

Arapahoe County is dedicated to educating and preparing its community for multi-hazard mitigation through a comprehensive approach. The county provides timely updates and preparedness resources through its Office of Emergency Management website and social media accounts. Arapahoe County uses ArapAlert (opt-in) and Wireless Emergency Alerts (WEA) to notify the public of emergencies. WEA is a federally-managed system that sends brief, source-identified messages to mobile devices during critical events. The Colorado Voluntary Organizations Active in Disaster (VOAD) further enhances community resilience through collaboration and coordinated support efforts. As the impacts of climate change intensify, sustained investment in education, emergency planning, and community partnerships will be essential to strengthen preparedness and adaptation efforts.

See map: Risk to All Natural Hazards

Strategic Plan

SP-05 Overview

Strategic Plan Overview

Arapahoe County's Community Resources Department has a strong connection and partnership with many public and private housing providers through its annual work on supporting housing development projects, assisting with emergency rental assistance, and tenant based rental assistance programs. Through those partnerships, County staff regularly communicate with housing providers on potential projects and emerging trends and needs. By actively participating in the Change the Trend Network, and the Tri-Cities Policy Committee, County staff can effectively coordinate activities and services with a wide range of organizations addressing community needs, particularly unmet needs and trends related to community homelessness, including mental health services and needs.

In preparation of this plan, housing and community development staff from Arapahoe County held 16 interviews with 22 stakeholders including local and regional institutions, affordable housing developers, community and faith-based organizations, and public and nonprofit agencies providing health and human services and 3 resident focus groups facilitated by community organizations representing specific subgroups of the county population. Arapahoe County staff also offered 3 public community meetings in person at 3 locations representing the different geography of the County in the evening. Two public hearings were held with the Board of County Commissioners before and during the 30-day public comment period on June 17, 2025 and July 22, 2025.

A total of 220 residents and stakeholders participated in conversations and activities to identify top community needs; prioritize community development and housing investments; and pinpoint gaps in access to resources and institutional structures. Stakeholders engaged throughout the process include economic development officials from the Tri-Cities (Sheridan, Englewood, Littleton), Centennial and Sheridan, unhoused service providers, workforce development organizations, faith communities, food provision organizations, health organizations, McKinney Vento liaisons, affordable housing developers and public housing representatives.

SP-10 Geographic Priorities – 91.215 (a)(1)

Geographic Area

1	Area Name:	City of Sheridan
	Area Type:	Local Target area
	Other Target Area Description:	
	HUD Approval Date:	
	% of Low/ Mod:	
	Revital Type:	Comprehensive
	Other Revital Description:	
	Identify the neighborhood boundaries for this target area.	Incorporated boundaries of the City of Sheridan.
	Include specific housing and commercial characteristics of this target area.	The City of Sheridan has a lower income population, aging housing inventory, needs for public infrastructure improvements and housing preservation.
	How did your consultation and citizen participation process help you to identify this neighborhood as a target area?	The Sheridan Economic Development office was interviewed for this Con Plan to discuss housing and community needs and plans for affordable housing. ED staff indicated a commitment to increasing affordable housing opportunities and outlined several collaborative projects with affordable housing developers. Staff also indicated a need for updated infrastructure to support housing development. The area has a high inventory of older homes needing repair with low-income home ownership
	Identify the needs in this target area.	Public improvements and housing rehabilitation.
2	What are the opportunities for improvement in this target area?	The City of Sheridan has pursued a many years' long plan to make infrastructure and public improvements to neighborhoods in the city. These improvements have included and will continue to include drainage, sidewalk, curb and gutter improvements to enhance public safety and the walkability of neighborhoods.
	Are there barriers to improvement in this target area?	Lack of resources has forced the city to taper plans to reflect the level of resources available annually.
	Area Name:	Town of Deer Trail
	Area Type:	City

	Other Target Area Description:	City
	HUD Approval Date:	
	% of Low/ Mod:	
	Revital Type:	
	Other Revital Description:	
	Identify the neighborhood boundaries for this target area.	Incorporated boundaries of Deer Trail.
	Include specific housing and commercial characteristics of this target area.	Deer Trail is a small low- and moderate-income community in the eastern part of the County. The community has many unpaved streets lacking drainage, curb and gutter and an aging housing stock.
	How did your consultation and citizen participation process help you to identify this neighborhood as a target area?	A community meeting organized in Deer Trail did not have any attendees. In the previous Consolidated Plan, citizens highlighted the need for drainage improvements related to areas of standing water and the need for mosquito control. The area also has long stretches of unpaved roads in residential areas.
	Identify the needs in this target area.	See above
	What are the opportunities for improvement in this target area?	Deer Trail has worked to build upon the existing paving efforts and drainage improvements completed in recent years. Future improvements will connect paved streets, improve the connectivity and walkability in the public rights-of-ways.
	Are there barriers to improvement in this target area?	Limited resources.
3	Area Name:	City of Englewood
	Area Type:	City
	Other Target Area Description:	City
	HUD Approval Date:	
	% of Low/ Mod:	
	Revital Type:	
	Other Revital Description:	
	Identify the neighborhood boundaries for this target area.	The City limits of Englewood are the boundaries for this area.

Include specific housing and commercial characteristics of this target area.	Englewood is home to many low- and moderate-income households. The City has some of the older and smaller housing stock in the County. There are many homes in need of basic health and safety improvements as well as additions to bring the housing stock to a level that is appealing to younger buyers. Many of the commercial areas are older and in need of upgrades to attract modern consumers. There have been extensive redevelopment efforts made by the city along South Broadway and Hampden on the site of an old shopping center. The city operates its own housing rehabilitation program and this program has been successful for many years. The County has supported Englewood in the past with energy efficiency updates for low-income homeowners.
How did your consultation and citizen participation process help you to identify this neighborhood as a target area?	Through the County Public Participation Plan, Englewood citizens were invited to participate in focus groups, public meetings and to complete a housing and community needs survey. Englewood Economic Development staff and the City Manager's office were interviewed.
Identify the needs in this target area.	Basic infrastructure improvements to assist small business was identified as a need by the economic development office. Continuing rehabilitation efforts are needed for the older housing stock. Englewood has a significant inventory of older rental complexes that are also in need to health and safety and accessibility improvements. Economic development staff indicated there could be non-controversial affordable housing infill potential in downtown Englewood.
What are the opportunities for improvement in this target area?	The County will continue to work with Englewood on ongoing improvement programs to address infrastructure, housing quality, and production of new rental housing.
Are there barriers to improvement in this target area?	Lack of resources limits the scope of annual improvement activities. NIMBY is also a barrier as many residents in Englewood like the rest of Colorado's Front Range are resistant to new development that will increase density and further crowd roads and other public facilities.

4	Area Name:	North Neighborhood-Littleton
	Area Type:	Local Target area
	Other Target Area Description:	
	HUD Approval Date:	
	% of Low/ Mod:	
	Revital Type:	Other
	Other Revital Description:	Sidewalks
	Identify the neighborhood boundaries for this target area.	The "North" neighborhood is bordered by W. Bellview Ave. on the north, S. Windermere Ave. on the east, W. Powers Ave. on the south, and S. Prescott St. on the west.
	Include specific housing and commercial characteristics of this target area.	The neighborhood is characterized by low- and moderate-income households primarily working in jobs in the local area. It has a more varied population than other Littleton areas. Many homes are smaller one-story homes. There is a mix of commercial establishments on the major streets in the neighborhood.
	How did your consultation and citizen participation process help you to identify this neighborhood as a target area?	Ongoing discussions between the County and Littleton government have highlighted the need to focus attention on this area in order to stem disinvestment and improve the quality of life for residents. The needs in the area have been identified by the city through its local planning process and capital improvement plans.
	Identify the needs in this target area.	Continued efforts to improve affordable housing inventory, housing quality and increase public safety through various infrastructure improvements.
	What are the opportunities for improvement in this target area?	The Littleton Economic Development team shared that a considerable affordable housing development opportunity exists within the Mid mod mile redevelopment plan and they will be coordinating with the county to explore this possibility. Additionally, a series of existing one-story units ideal for seniors that were in need of significant repair and occupied by voucher holders (who were relocated to other housing) could be rehabilitated for affordable housing. These units are owned by Littleton.

	Are there barriers to improvement in this target area?	Lack of resources. The City has been forced to undertake these activities on a gradual basis because there is not an adequate resource base to complete the activities in a condensed time frame.
5	Area Name:	Countywide Low/Mod Eligible
	Area Type:	County
	Other Target Area Description:	County
	HUD Approval Date:	
	% of Low/ Mod:	
	Revital Type:	
	Other Revital Description:	
	Identify the neighborhood boundaries for this target area.	Countywide including the unincorporated areas.
	Include specific housing and commercial characteristics of this target area.	Arapahoe County is a fast-evolving area moving from rural neighborhoods and settlements to more a more urbanized land use pattern. There are many homes in the area in need of basic health and safety improvements. There are also infrastructure issues because some of the settlements and neighborhoods are not served by a municipal government and over the years these areas have lacked the improvements that municipal capital improvements plan would incorporate. Low/Mod Eligible areas (LMA) are primarily residential and have at least 51 percent of residents who are considered low- and moderate-income persons as defined at the block group level by HUD Low/Mod Summary Data. The County also provides assistance to low- and moderate-income individuals and households (LMC/LMH) who earn 80% of the Area Median Income (AMI) or less.

	How did your consultation and citizen participation process help you to identify this neighborhood as a target area?	The County key informant interviews, focus groups, and residents survey throughout the County. Citizens in unincorporated areas have participated in public outreach efforts by the County in the past and highlighted problems such as drainage, lack of sidewalks and bike paths and connectivity to commercial centers. The age of the existing housing was also highlighted as needing basic health and safety improvements.
	Identify the needs in this target area.	As highlighted above public improvements and health and safety improvements to existing older housing were listed as top priorities.
	What are the opportunities for improvement in this target area?	Basic infrastructure and housing rehabilitation have been an ongoing need and one the County has addressed with available resources.
	Are there barriers to improvement in this target area?	Limited resources is one barrier to more expansive efforts. Additionally, many rural residents are skeptical of large public works projects and they value the rural atmosphere in the unincorporated areas of the County.
7	Area Name:	City of Littleton
	Area Type:	City
	Other Target Area Description:	City
	HUD Approval Date:	
	% of Low/ Mod:	
	Revital Type:	
	Other Revital Description:	
	Identify the neighborhood boundaries for this target area.	City-wide
	Include specific housing and commercial characteristics of this target area.	Littleton has become a very desirable residential area. It has a very viable downtown area that has benefitted from new development both residential and commercial. There are still older neighborhoods that lack some infrastructure improvements and connectivity with the commercial areas on the main street and Littleton Boulevard. Many of the older houses are need to health and safety improvements.

	How did your consultation and citizen participation process help you to identify this neighborhood as a target area?	Littleton residents were invited to participate in public participation process which gave residents the opportunity to discuss needs and actions to address some of the longstanding challenges facing the older neighborhoods in the face of new development and greater commercial activity in the historic downtown area. Lower income senior citizens in public housing in Littleton and stakeholders identified senior transportation as a community need.
	Identify the needs in this target area.	Continued work on public improvements, and housing rehabilitation are needed. With influx of new employment in Littleton, there is an ongoing need for more affordable rental units that could be available for employees in the commercial businesses in the central part of Littleton.
	What are the opportunities for improvement in this target area?	Public improvements and housing rehabilitation are ongoing parts of Littleton's plan to address these needs. Presently there is little public will to expand the rental housing stock for retail and service employees in the commercial areas.
	Are there barriers to improvement in this target area?	Resistance to new housing options limits the ability of developers to address the shortage of worker housing within walking distance to the commercial areas. Lack of resources forces the community to move in stages to address infrastructure needs and rehabilitation needs of the older housing stock.
8	Area Name:	Rural Arapahoe County
	Area Type:	Local Target area
	Other Target Area Description:	
	HUD Approval Date:	
	% of Low/ Mod:	
	Revital Type:	Comprehensive
	Other Revital Description:	
	Identify the neighborhood boundaries for this target area.	Unincorporated areas of the county

	Include specific housing and commercial characteristics of this target area.	The unincorporated areas have a mix of housing and commercial and industrial establishments. On the eastern end of the County, Strasburg has experienced significant residential development but is not an incorporated area. Infrastructure improvements are needed in some of the older developed areas and there is also a lack of public facilities for children, seniors and those with special service needs.
	How did your consultation and citizen participation process help you to identify this neighborhood as a target area?	The County conducted a survey as part of a vision study for the rural communities in and around Watkins and Bennett.
	Identify the needs in this target area.	Infrastructure, paved roads and water.
	What are the opportunities for improvement in this target area?	Limited. Because of the unincorporated status of the community and push of new residential development, there does not appear to be a comprehensive plan to address the needs.
	Are there barriers to improvement in this target area?	Lack of resources, cost and remote location are barriers to needed infrastructure improvements.
9	Area Name:	City of Centennial
	Area Type:	Entitlement City
	Other Target Area Description:	Entitlement City
	HUD Approval Date:	
	% of Low/ Mod:	
	Revital Type:	
	Other Revital Description:	
	Identify the neighborhood boundaries for this target area.	
	Include specific housing and commercial characteristics of this target area.	In the midtown Centennial corridor between Yosemite to Havana off of 225, there are many older office parks that could be repurposed into affordable workforce housing. There area also many infill opportunities and the city is conducting a land bank analysis to identify opportunities.

How did your consultation and citizen participation process help you to identify this neighborhood as a target area?	
Identify the needs in this target area.	
What are the opportunities for improvement in this target area?	
Are there barriers to improvement in this target area?	Economic development staff indicated that water infrastructure improvement would be needed in order to transition previous commercial properties to housing.

Table 16 - Geographic Priority Areas

General Allocation Priorities

Describe the basis for allocating investments geographically within the jurisdiction (or within the EMSA for HOPWA)

Arapahoe County has a set of priority needs for the County and incorporated areas. The County works closely with both incorporated areas and non-incorporated areas to gain information and cooperation in order to address needs both in the more urbanized areas and rural areas of the County. The needs were gathered through a robust public participation process for this plan as well as ongoing informational meetings held by the Department of Community Resources throughout the County.

SP-25 Priority Needs - 91.215(a)(2)

Priority Needs

Table 17 – Priority Needs Summary

Priority Needs

Table 18 – Priority Needs Summary

1	Priority Need Name	Housing Needs
	Priority Level	High
	Population	Extremely Low Low Moderate Families with Children Elderly Public Housing Residents Rural Chronic Homelessness Mentally Ill veterans Victims of Domestic Violence Unaccompanied Youth Persons with Disabilities Formerly Incarcerated
	Geographic Areas Affected	City of Sheridan Town of Deer Trail City of Englewood North Neighborhood-Littleton Countywide Low/Mod Eligible City of Littleton Rural Arapahoe County City of Centennial
	Associated Goals	Affordable Housing Tenant Based Rental Assistance (TBRA)
	Description	Based on the housing needs assessment data and public participation, the County has a severe shortage of affordable housing (rental properties), need for rehabilitation of existing rental housing, and housing both short term and long term for special needs populations.
	Basis for Relative Priority	The data and public input clearly identifies a shortage of affordable decent housing throughout the County and municipalities.

2	Priority Need Name	Preservation of Existing Housing Stock
	Priority Level	High
	Population	Extremely Low Low Moderate Families with Children Elderly
	Geographic Areas Affected	City of Sheridan City of Centennial North Neighborhood-Littleton Countywide Low/Mod Eligible
	Associated Goals	Affordable Housing
	Description	In some unincorporated areas of the County and in the older neighborhoods in the municipalities, many older homes require basic health and safety improvements to maintain them in the housing stock.
	Basis for Relative Priority	
3	Priority Need Name	Non-housing community development
	Priority Level	Medium
	Population	Extremely Low Low Moderate Non-housing Community Development Seniors
	Geographic Areas Affected	City of Sheridan City of Littleton City of Englewood Town of Deer Trail City of Centennial
	Associated Goals	Community Public Services Public Facility Improvements Public Infrastructure improvements

	Description	Arapahoe County has prioritized community development needs that relate to transportation, navigation of public services and infrastructure improvements to enhance the greater livability, and stability in low-income neighborhoods.
	Basis for Relative Priority	As part of the consultation process used in preparing the Con Plan, the County held interviews with public entities and non-profit organizations to gather data and information on priority non-housing community development needs. The county also meets regularly with service providers and municipalities to solicit input on their needs. The County solicits proposals from eligible entities for financial assistance to address the identified priority needs. The Community Resources Department ranks requests based on the benefits to low-income communities, improvements to accessibility and affordability, and quality of life improvements. That analysis of proposals is then forwarded to the County Commissioners for their approval.
4	Priority Need Name	Homelessness
	Priority Level	High
	Population	Extremely Low Families with Children Elderly Chronic Homelessness Individuals Families with Children Mentally Ill Chronic Substance Abuse Veterans Persons with HIV/AIDS Victims of Domestic Violence Unaccompanied Youth
	Geographic Areas Affected	City of Sheridan City of Littleton City of Englewood City of Centennial Countywide Low/Mod Eligible Rural Arapahoe County
	Associated Goals	Community Public Services Tenant Based Rental Assistance (TBRA)

	Description	County residents experiencing homelessness face a shortage of emergency housing options and are often forced to seek emergency housing in other Metro jurisdictions or remain outdoors. With extremely limited emergency and transitional housing options in the county, service providers are relying more heavily on rapid rehousing options and direct financial assistance to prevent at risk households from losing their current housing.
	Basis for Relative Priority	As part of the Con Plan process, the county consulted with housing and homeless service providers to gather their input on homeless needs. These findings indicate a shortage of emergency options and rapid rehousing options. Homeless prevention support is often the most expedient way to assist a family in preserving the housing they are in. The County's shortage of housing options means service providers are forced to place homeless households in short term congregate dwellings (such as through Family Promise in church congregations and in motels through vouchers) to prevent them from being unsheltered. The County has placed a high priority on supporting homeless support efforts and has significantly contributed to the new Tri-Cities navigation center in Englewood, Aurora navigation center in Aurora and non- congregate sheltering initiatives through Project SAFER, but also believes that ultimately the most effective response is to encourage and support the creation of more affordable rental housing units for low income and homeless populations.
5	Priority Need Name	Program Administration
	Priority Level	High
	Population	Extremely Low Low Moderate Non-housing Community Development
	Geographic Areas Affected	City of Sheridan Town of Deer Trail City of Englewood North Neighborhood-Littleton Countywide Low/Mod Eligible City of Littleton Rural Arapahoe County City of Centennial
	Associated Goals	Program Administration

Description	Effective program management will include general administration and planning of HUD grant programs, monitoring subrecipients, and keeping strict grant-based accounting. Comprehensive planning requirements will include the development of AAPs, an evaluation of the performance of the programs through annual reports, and meeting citizen participation requirements.
Basis for Relative Priority	There is a need to provide effective program management of HUD grant programs that will ensure compliance with each respective grant and their regulations and that programs meet their established objectives.

Narrative (Optional)

SP-30 Influence of Market Conditions – 91.215 (b)

Influence of Market Conditions

Affordable Housing Type	Market Characteristics that will influence the use of funds available for housing type
Tenant Based Rental Assistance (TBRA)	Arapahoe County may spend money on TBRA as part of its strategy to serve very low- and low-income renter households. As there is a scarcity of affordable rental units provided by all agencies serving the County, and market conditions show a very tight rental market, TBRA is an important tool in addressing some of the households that are being served by the affordable market. There are few short-term housing options available and TBRA can provide some time for households to pursue self-sufficiency goals and attain stable housing.
TBRA for Non-Homeless Special Needs	While some very low-income households may not be homeless, they can be at risk of losing their housing for a number of reasons. If a very-low-income household is unable to pay the rent or keep up with other basic expenses, TBRA can provide a bridge until a more permanent solution can be found.
New Unit Production	The Housing Needs Assessments reflects the current housing market conditions in the County. Through both data analysis and community input, expanding the supply of affordable rental housing was identified as the most critical need. There also are a number of low-income households and even some very low-income households that could become homeowners with the proper subsidies and with the assistance of programs.
Rehabilitation	In the older settlements in the County and municipalities, there are many older homes occupied by low-income families and elderly persons, especially in the Tri-Cities area. It is extremely cost effective to keep the existing housing stock viable by providing health and safety improvements. As construction workers are in such high demand to address housing shortages in the County, many households do not have the resources to compete in the private market for contractors who could make health and safety improvements.
Acquisition, including preservation	There are a number of aging rental complexes in the County that could be acquired by non-profit owners to facilitate ongoing viability of the rental housing supply with public assistance for rehabilitation.

SP-35 Anticipated Resources - 91.215(a)(4), 91.220(c)(1,2)

Introduction

Federal dollars leverage additional funds in many of the projects completed as part of the Consolidated Plan. Agencies undertaking projects will often utilize other funds to build the financial package to complete projects and activities. In addition to CDBG and HOME funds, Arapahoe County provides grants to human services, health, and wellness and crisis intervention organizations serving the County's at-risk and underserved populations. Arapahoe County administers the City of Centennial (Entitlement City) CDBG program and Centennial CDBG resources are reflected in the Anticipated Resources table.

Anticipated Resources

Program	Source of Funds	Uses of Funds	Expected Amount Available Year 1				Expected Amount Available Remainder of ConPlan \$	Narrative Description
			Annual Allocation: \$	Program Income: \$	Prior Year Resources: \$	Total: \$		
CDBG	public - federal	Acquisition Admin and Planning Economic Development Housing Public Improvements Public Services	1,283,130	31,000	45,000	1,359,130	5,301,520	The CDBG table, Expected Amount Available Year 1, includes the annual allocation, the anticipated program income received during PY2024, and prior year resources (prior year program income. The expected amount available for the remainder of the ConPlan is the annual allocation and program income for 4x more years.

Program	Source of Funds	Uses of Funds	Expected Amount Available Year 1				Expected Amount Available Remainder of ConPlan \$	Narrative Description
			Annual Allocation: \$	Program Income: \$	Prior Year Resources: \$	Total: \$		
HOME	public - federal	Multifamily Rental new construction Multifamily rental rehab TBRA	557,253.33	0	0	557,253.33	2,229,013.32	The HOME table, Expected Amount Available Year 1, includes the annual allocation. The expected amount available for the remainder of the ConPlan is the annual allocation and program income for 4x more years.

Table 19 - Anticipated Resources

Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how matching requirements will be satisfied

Arapahoe County leverages funds from the City of Aurora, the State of Colorado, the Colorado Housing and Finance Authority and private investors and lenders. Arapahoe County attempts to fund sustainable projects and encourages applicants to apply to the State of Colorado Division of Housing and CHFA for supplemental funding. Private Activity Bonds, Low Income Housing Tax Credits, loans, local subsidies, and grants are all necessary for agencies and developers to receive consideration for funding from Arapahoe County.

If appropriate, describe publicly owned land or property located within the jurisdiction that may be used to address the needs identified in the plan

The County does not own any property that will be used for CDBG or HOME activities.

SP-40 Institutional Delivery Structure – 91.215(k)

Explain the institutional structure through which the jurisdiction will carry out its consolidated plan including private industry, non-profit organizations, and public institutions.

Responsible Entity	Responsible Entity Type	Role	Geographic Area Served
ARAPAHOE COUNTY	Government	Economic Development Homelessness Non-homeless special needs Rental neighborhood improvements public facilities public services	Jurisdiction

Table 20 - Institutional Delivery Structure

Assess of Strengths and Gaps in the Institutional Delivery System

Strengths

The Department of Community Resources is the lead administrative agency for providing federal funds to address low-income needs in the County and works with a variety of local government and non-profit agencies to deliver a package of services to address the multi-faceted needs of low-income populations.

The Community Development, Housing and Homeless Services division within the Community Resources Department administers an annual solicitation process to receive applications from housing and community development entities to support programs and projects to address these needs. As the County has long standing relationships with the full spectrum of service providers focused on the housing needs of lower income and unhoused residents, we are regularly updated on community priorities, particularly through participation in Change the Trend and the Tri-Cities Homelessness Initiative.

For homeless housing and service providers, the County participates in the Metropolitan Denver Homeless Initiative (MDHI) Continuum of Care to support regional homeless solutions efforts as well as to provide support to organizations wishing to provide homeless housing and services in Arapahoe County.

Weaknesses

Stakeholder consultation revealed that many nonprofit organizations and municipalities would welcome even greater coordination and leadership from the County on identifying affordable housing opportunities and better communication (easier navigation) of existing services available through the County, and regionally. Several stakeholders indicated that due to differing policies and goals across municipalities, efficient service delivery, particularly in reference to crisis management for unhoused residents, is complicated and could be improved.

Table 21 - Homeless Prevention Services Summary

Describe how the service delivery system including, but not limited to, the services listed above meet the needs of homeless persons (particularly chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth)

The County oversees a broad network of non-profit and municipal agencies that provide services to special needs and homeless populations. This network provides the continuum of services from outreach and counseling to mental health, job training, limited medical support, rapid rehousing, emergency shelter, behavioral health, food banks, homeless prevention, and youth services. Providers report that growing demands exceed their capacity to serve all needs. The available services are highly utilized.

Describe the strengths and gaps of the service delivery system for special needs population and persons experiencing homelessness, including, but not limited to, the services listed above

County providers have limited capacity and the county has formed agreements with regional organizations to provide a level of service for areas in which there is no local provider. The shortage of both emergency housing and permanently affordable housing places great stress on the service delivery system because providers are often left with no alternative but to refer homeless and special needs populations to service providers in surrounding jurisdictions. Transportation costs and limitations prevent households who find temporary housing in another jurisdiction from accepting and they must seek services in the jurisdiction close to their place of residence. County public housing authorities do not have adequate resources to accommodate new residents on the Section 8 program nor in public housing units.

As previously referenced, the Tri-Cities Navigation Center for unhoused residents will open in 2025, providing transitional supportive housing with 50 beds available at any one point in time. The County was a partner in this project and contributed substantial funding towards its development. Additionally, the County allocated a considerable share of HOME-ARP and ARPA funds to a non-congregate housing project providing wraparound services for justice involved residents with persistent and severe mental illness. The County will continue to actively pursue projects that meet the needs of the unhoused community through strategic partnerships with individual municipalities, behavioral and mental health providers and homeless services providers.

Provide a summary of the strategy for overcoming gaps in the institutional structure and service delivery system for carrying out a strategy to address priority needs

Arapahoe County will prioritize the use of its Community Development Block Grant and HOME Investment Partnerships program funding to meet the priority needs of the County noted in SP-25 Priority Needs - 91.215(a)(2), including extremely low to low- moderate income, families with children, elderly, public housing residents, rural, chronic homeless, mental ill, veterans, victims of domestic violence (including dating violence and stalking victims),unaccompanied youth, persons with disabilities and formerly incarcerated. Given that these sub-populations have barriers to accessing housing and various services, Arapahoe County will provide CDBG funds for housing rehabilitation activities, public facility/infrastructure improvements, and public service activities that improve the quality of life.

Arapahoe County will utilize HOME Investment Partnerships program funds for TBRA, new multi-family housing (rental) construction and housing rehabilitation activities.

SP-45 Goals Summary – 91.215(a)(4)

Goals Summary Information

Sort Order	Goal Name	Start Year	End Year	Category	Geographic Area	Needs Addressed	Funding	Goal Outcome Indicator
1	Affordable Housing	2025	2029	Affordable Housing	City of Sheridan City of Deer Trail City of Englewood North Neighborhood-Littleton Countywide Low/Mod Eligible City of Littleton Rural Arapahoe County City of Centennial	Affordable Housing	CDBG: \$1,347,520 HOME: \$1,811,076.65	Rental units constructed: 15 Household Housing Unit Homeowner Housing Rehabilitated: 265 Household Housing Unit Homeowner Housing Added (CHDO): 5 Housing Household Units

Table 22 – Goals Summary

Goal Descriptions

1	Goal Name	Affordable Housing
	Goal Description	Increase Arapahoe County's affordable housing stock and preserve the existing affordable housing stock. Based on both quantitative and qualitative data gathered there is a need to expand the supply of affordable rental housing units in the County.
2	Goal Name	Community Public Services
	Goal Description	Arapahoe County will support various agencies providing a wide range of community based public services to residents including, but not limited to activities like food assistance, meals on wheels, rent/mortgage/utility assistance, youth services, health care enrollment and navigation, homeless prevention services, shelter supportive services.
3	Goal Name	Tenant Based Rental Assistance (TBRA)
	Goal Description	The County provides TBRA assistance to families at risk of becoming homeless as well as to families in need of immediate shelter after experiencing homelessness.
4	Goal Name	Public Facility Improvements
	Goal Description	Arapahoe County provides assistance to entities, primarily other units of local government, non-profit organizations, and public housing authorities for public facility improvement projects, which typically replace integral components of their facilities and/or provide greater accessibility by removing architectural barriers.

5	Goal Name	Public Infrastructure improvements
	Goal Description	The transition from a rural to a more urbanized County presents a variety of infrastructure needs that exist in the unincorporated areas of the County as well as in some of the older neighborhoods of the municipalities. The County works with a variety of government agencies to address these needs which have been identified at the local level as well as the public participation process.
6	Goal Name	Program Administration
	Goal Description	Effective program management of HUD grant programs will ensure compliance with each respective grant and their regulations and that programs meet their established objectives.

Estimate the number of extremely low-income, low-income, and moderate-income families to whom the jurisdiction will provide affordable housing as defined by HOME 91.315(b)(2)

Based on the goals developed in this section, the County estimates that over the next five years of the Consolidated Plan it will assist low- to moderate-income households with affordable housing activities:

Rental units constructed: 15 Household Housing Units
Homeowner Housing Rehabilitated: 265 Household Housing Units
Tenant-based rental assistance: 100 Households Assisted

SP-50 Public Housing Accessibility and Involvement – 91.215(c)

Need to Increase the Number of Accessible Units (if Required by a Section 504 Voluntary Compliance Agreement)

None of the housing authorities in Arapahoe County are required by a Section 504 Voluntary Compliance Agreement to increase the number of accessible units in their portfolio. The Housing Authorities will continue to make improvements to existing properties to meet accessibility requirements and provide a portion of units as accessible in newly acquired or constructed properties.

Activities to Increase Resident Involvements

All housing authorities in Arapahoe County provide opportunities for resident involvement, including having resident councils, inviting residents to public meetings and hearing, and providing resident activities.

Is the public housing agency designated as troubled under 24 CFR part 902?

No.

Plan to remove the ‘troubled’ designation

N/A

SP-55 Barriers to affordable housing – 91.215(h)

Barriers to Affordable Housing

Arapahoe County has shown a commitment to addressing land use and administrative barriers to affordable housing in the unincorporated areas of the county, which is the only area it can implement land use policies related to housing (municipalities control land use within their boundaries).

Recognizing the increasing need for additional housing. In 2023, Arapahoe County passed an ordinance allowing Accessory Dwelling Units on all single-family zoned parcels of at least 5,000 square feet resulting in a potential increase of 18,000 units in unincorporated areas. Public feedback initially indicated a desire to limit ADUs only to lots of 1 acre which would not yield a sufficient increase in units demonstrating NIMBYism as a barrier to housing in the County. Additionally, in December 2023, the Arapahoe County Department of Public Works and Development proposed multiple changes to the land use code and administrative processes to remove policies hindering affordable housing development and providing incentives to developers. These changes include streamlined Planned Unit Development process that will reduce processing time by 15 days, substantially reduced planning division fees, reduced parking requirements, density bonuses, increased height allowance and reduced open space requirements. These efforts signal that the County understands the critical importance of dramatically increasing its affordable housing inventory and is positioned to take a leadership role in promoting affordable housing policies across the county's many municipalities and unincorporated areas.

Individual municipalities in recent years, namely Centennial, Littleton and Englewood, have conducted Housing Needs Assessments and were provided with strategies to increase affordable housing such as inclusionary housing programs, incentives for housing developers, upzoning to increase density, allowance of Accessory Dwelling Units, expedited approval processes, fee waivers, and land banking. These municipalities are all making steady progress in adopting some of these strategies. These efforts, however, have met with considerable resistance from residents, most notably in Englewood, particularly the strategy of increasing density through upzoning. As is the case across the country, the abundance of single-family housing stock relative to the need for higher density housing types remains a barrier to increasing affordable housing. Inclusionary housing policies have been slightly less controversial although set aside amounts that are palatable to city governments and residents are very low and not likely to create the volume of units needed to address the current shortage of affordable housing.

Individual municipalities that have recently approved ADUs including Littleton, Englewood, Sheridan and Cherry Hills Village. Resident focus group participants for the Centennial Housing Needs Assessment in 2022 expressed a concern, however, that ADUs would be eligible for short-term housing or vacation rentals therefore negating any progress towards increasing affordable housing. Nevertheless, an ordinance allowing ADU's in Centennial will become law in May 2024.

Stakeholders interviewed for this Consolidated Plan indicated that while efforts at coordination between municipalities, agencies and the county exist, and affordable housing has been elevated to high priority (particularly through the Tri-Cities Homelessness Policy Group and the Arapahoe County Strategic Plan), inconsistencies in strategies to increase affordable housing and prevent homelessness

across municipalities are a barrier to maximizing collective power and funding to have the type of impact needed. This, coupled with strong local control in the State of Colorado, complicates strategic coordination efforts for maximum impact. Stakeholders in affordable housing development organizations also expressed an interest in the county taking a proactive approach to identifying affordable housing opportunities.

Stakeholders working in service provision for unhoused residents also identified a need to provide more customized housing products such as transitioning smaller buildings across the county into housing for specific target populations instead of focusing on large scale developments. They also indicated a need to change local ordinances to allow more unrelated family members to share a residence with a caregiver, which would increase affordability and maintain support systems particularly needed by previously unhoused, foster care youth, and individuals with behavioral/mental health challenges. At the state level, Colorado HB24-1007, the Prohibit Residential Occupancy Limits bill has been signed into law in April 2024 and takes effect on July 1, 2024. This bill eliminates discriminatory occupancy limits in Colorado and expands housing opportunities for Coloradans.

Housing development stakeholders interviewed for the 2022 Englewood Housing Needs Assessment identified a multitude of local barriers to building affordable housing including cumbersome and time-consuming approval, parking requirements, and substantial residential power of a few groups in preventing dense housing projects from occurring.

One stakeholder expressed concern with Colorado's construction defect law that protects condominium homeowners from faulty construction but some feel disincentivizes builders due to higher insurance costs thereby reducing the stock of condominiums which are often the most affordable housing type for first time home buyers.¹⁰ Construction of new condominiums in all counties of the Denver region have declined significantly particularly in suburban areas such as Arapahoe County where this housing type could provide an affordable entry into the housing market for many buyers.

Strategy to Remove or Ameliorate the Barriers to Affordable Housing

The Community Resources Department conducts ongoing meetings and consultations with Arapahoe County's Public Works and Development Department planning staff to facilitate more efficient and less painless ways of assisting developers to identify sites and produce plans for more affordable rental developments in the unincorporated areas of the county. The Community Resources Department will serve as a conduit for informing and working with potential developers to assess possible parcels for new development. The County has a strong vision for affordable housing and housing choice in its Comprehensive Plan. By exchanging current information and forming stronger collaborations with local governments and the Public Works Department, the Community Resources Department hopes to motivate great interest and involvement in addressing the affordable housing needs throughout the County. Since fall of 2023, the County has been working with The Reinvestment Fund to develop a Market Value Analysis tool to facilitate identification of affordable housing opportunities in the county.

¹⁰ [r23-1138 create construction defects ip memo from legislator memo .pdf \(colorado.gov\)](#)

This tool has been developed collaboratively with a steering committee representing public housing authorities, real estate professionals, affordable housing developers and municipality economic staff and was finalized in February of 2024. The [Market Value Analysis Map](#) is available online to residents and interested parties.

SP-60 Homelessness Strategy – 91.215(d)

Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs

The County has identified homelessness as a priority need and has laid out homeless assistance and homeless prevention goals which will address the needs. The County administers a variety of housing and non-housing community development resources which are used to support the efforts of a broad-based community network of service providers which provide homeless assistance in the County and the municipalities. Through its planned goals, the County will support the continuum of services needed by both unsheltered homeless and formerly homeless in emergency housing. Service providers supported by the County provide outreach and case management which assess individual needs and link them with the continuum of services available.

Addressing the emergency and transitional housing needs of homeless persons

There is a shortage of emergency and transitional housing in the county with little public support for creation of large congregate shelters. The County and service providers have resorted to a rapid re-housing approach to find shelter for those with limited emergency shelter options. The lack of affordable rental units has required service providers to refer households needing emergency shelter or transitional housing to housing providers in surrounding jurisdictions. The County works with the local public housing authorities to place unhoused households on the Section 8 program but the waiting lists have become so large that there is little capacity to serve new clients.

The County is taking a proactive approach to addressing the shortage of affordable units by working with non-profit and private developers to encourage new developments that would add to the affordable housing inventory. Additionally, the County will be working with the Public Works Department to identify any undeveloped parcels in the county which would be suitable for affordable development. The County will also regularly convene municipal governments to identify development opportunities in their jurisdictions and will be supportive of new affordable developments that municipalities identify. In fall 2023, the County began working with the Reinvestment Fund to develop a Market Value Analysis tool to facilitate identification of affordable housing opportunities county wide.

LIHTC properties are being developed in the Tri-Cities region including a 149 unit building in Sheridan opening in 2024. Lastly, the County has committed substantial ARPA funds to projects with Brothers Redevelopment and HOME ARP Project SAFER for housing of formerly incarcerated with supportive services and contributed funding to a new homeless navigation center in Englewood with capacity to house 50 residents at a time and will provide workforce development services through the Boulder-House Ready to Work program.

Helping homeless persons (especially chronically homeless individuals and families, families with children, veterans and their families, and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again.

Due to the shortage of transitional units combined with supportive services in the county, it is often difficult to move unhoused persons into permanent housing. If service providers are unable to place a household in permanently affordable housing in Arapahoe County, they work with housing and service providers in surrounding jurisdictions to find suitable housing. Service providers employ a strategy to either place homeless households outside the county or provide the necessary financial assistance to keep them in their current housing. If the household obtains stable housing, the service providers funded by the County will provide the necessary supportive services to assist that family in maintaining stability and moving toward independence. The supportive services continue so that the formerly homeless households have less chance of experiencing another episode of homelessness. As previously noted, Arapahoe County has recently committed funding to major development projects that will provide transitional housing for currently unhoused residents who are justice involved who represent a significant proportion of the current unhoused population in the county. The County will continue to provide tenant based rental assistance to families to prevent homelessness, and work closely with county municipal governments, service providers and developers to identify opportunities to provide transitional and affordable housing in the county.

Help low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families who are likely to become homeless after being discharged from a publicly funded institution or system of care, or who are receiving assistance from public and private agencies that address housing, health, social services, employment, education or youth needs

Arapahoe County administers and supports a robust network of service providers which provide homeless prevention services to households in danger of homelessness. By using a prevention strategy, service providers are better able to help households maintain stability in their housing. In order to maintain stability, financial assistance for rent, mortgage, utility and other household necessities is provided. The programs also provide case management and referral services to assist that family in overcoming the challenges that increased their risk of being unhoused.

The County refers to the Continuum of Care, Metro Denver Homeless Initiative (MDHI), for the discharge of individuals from systems of care and/or publicly funded institutions. These may include persons discharged from health facilities, substance abuse or drug rehab centers and correctional facilities. Individuals and families may also access services through the CoC OneHome Coordinated Entry System for the Metro Denver region. Coordinated Entry is a client-centered process that partners with service providers and community members to assess and identify the housing needs of people experiencing homelessness. OneHome Coordinated Entry matches individuals, including those mentioned above, to the appropriate housing resources available while elevating client choice.

A service provided within the County is the Arapahoe County's Alternative Sentencing Programs (ASP), which allow ex-offenders to continue employment, attend school, and receive medical treatment while remaining productive members of society.

SP-65 Lead based paint Hazards – 91.215(i)

Actions to address LBP hazards and increase access to housing without LBP hazards

The cities of Englewood, Littleton, and Centennial have housing rehabilitation programs that test for lead hazards when conducting rehabilitation and achieve clearance from certified inspectors when the rehabilitation is complete. All work is completed in accordance with the Lead Safe Housing Rule.

How are the actions listed above related to the extent of lead poisoning and hazards?

The local Housing Authorities and other Section 8 provider agencies strictly adhere to the Housing Quality Standards (HQS) for public housing and section 8 tenants, and the Lead Safe Housing Rule. Housing Authorities will not allow Section 8 tenants to rent units with lead hazards that are not mitigated by the landlord. In addition, all units owned and purchased and rehabilitated by the housing authorities are mitigated for lead.

How are the actions listed above integrated into housing policies and procedures?

Grantees receiving HOME or CDBG funds to purchase and renovate properties which contain lead-based paint are not responsible for paying for and coordinating detection and mitigation of lead hazards within the property. The mitigation and testing are eligible costs under the program.

By promoting the acquisition and rehabilitation of older multi-family rental properties in Arapahoe County, lead hazards in these properties have to be mitigated. All CDBG and HOME sub-grantees are required to follow the HUD Lead Safe Housing Rule and rule requirements based on the activity that they are undertaking. Grantees involved in leasing, acquiring, rehabilitating, or maintaining housing units must keep files that provide compliance with these rules and regulations. Sub-grantees must provide clients with the “Protect Your Family from Lead in Your Home” pamphlet. Verification of this notification must be maintained in client files. Properties will also be mitigated based on the testing results.

SP-70 Anti-Poverty Strategy – 91.215(j)

Jurisdiction Goals, Programs and Policies for reducing the number of Poverty-Level Families

Arapahoe County has consolidated the various services and forms of assistance it offers residents under the administration of one county department. The Department of Community Resources coordinates a number of anti-poverty programs to realize the ultimate goal of reducing poverty in the county. Community Resources offers assistance to single parent households, families with children, the homeless, disabled individuals and other special needs populations such as the elderly and veterans. Through a vast network of service agencies, the county offers assistance directly and also through contracted services with other providers. There are few neighborhoods in the county with high percentages of poverty, and the county offers outreach to individual households who are below the poverty threshold.

The City of Sheridan is composed of low-income census tracts and investment is directed to address the needs in those census tracts. The county also offers robust job training and education opportunities through Arapahoe/Douglas Works!. The county works with employers to provide entry level jobs and training support to households enrolled in TANF and other support programs. The county funds services for youth who are from low-income households to enhance their educational success and to assist them in developing a career path that will lead to higher education or employment upon graduation from high school. The focus is to provide any short-term assistance that is available to enable a path towards economic and social independence.

How are the Jurisdiction poverty reducing goals, programs, and policies coordinated with this affordable housing plan?

The County's poverty reduction goals are closely integrated with affordable housing and non-housing community development plans. The multi-faceted approach utilized by the Department of Community Resources is designed to provide a stable shelter situation coupled with the necessary assistance and supportive services to help individuals and families achieve greater stability and economic independence. Much of the CDBG investment is directed by the County to support agencies that address housing needs and also provide a range of supportive services to the homeless and other low-income populations. The first priority, for the County, is to provide safe and decent housing so that families can address their other needs without being cost-burdened nor experiencing the destructive effects of an episode of homelessness.

SP-80 Monitoring – 91.230

Describe the standards and procedures that the jurisdiction will use to monitor activities carried out in furtherance of the plan and will use to ensure long-term compliance with requirements of the programs involved, including minority business outreach and the comprehensive planning requirements

Arapahoe County has well-established contracting, procurement, and monitoring policies and procedures to ensure that Arapahoe County and our sub-grantees meet the established goals and outcomes for the project, programs and services supported by the County CDBG and HOME funds.

The County uses a risk-based monitoring system to ensure that subrecipient files contain the necessary documentation to validate that program funds have been expended on appropriate expenses that produce the outcomes specified in contract documents. Based on prior performance, subrecipient files are monitored onsite periodically. For each draw down request and monthly/quarterly reports, the county does a desk audit to verify eligible expenses and monitor performance.

The County monitors subrecipient documentation to ensure that the subrecipient meets the cross-cutting requirements contained in HOME and CDBG regulations including, but not limited to Section 3, Fair Housing, Labor Standards, Uniform Relocation etc.

On an annual basis, Arapahoe County staff submits CDBG and HOME Section 3 reports. County staff work closely with subrecipients during the procurement process for contracts subject to Section 3 requirements, ensuring the bid documents include the required language and documents.

County staff attend trainings and monitoring sessions with HUD representatives regularly and take advantage of online trainings provided by HUD and third part technical assistance providers. County staff also perform long term monitoring of HOME funded rental projects to ensure that the long affordability requirements are in compliance with HOME program regulations.

Expected Resources

AP-15 Expected Resources – 91.220(c)(1,2)

Introduction

Federal dollars leverage additional funds in many of the projects completed as part of the Consolidated Plan. Agencies undertaking projects will often utilize other funds to build the financial package to complete projects and activities. In addition to CDBG and HOME funds, Arapahoe County provides grants to human services, health, and wellness and crisis intervention organizations serving the County's at-risk and underserved populations through the Aid to Agencies Program. Arapahoe County administers the City of Centennial entitlement CDBG program and Centennial CDBG resources are reflected in the Anticipated Resources table.

Anticipated Resources

Program	Source of Funds	Uses of Funds	Expected Amount Available Year 1				Expected Amount Available Remainder of ConPlan \$	Narrative Description
			Annual Allocation: \$	Program Income: \$	Prior Year Resources: \$	Total: \$		
CDBG	public - federal	Acquisition Admin and Planning Economic Development Housing Public Improvements Public Services	1,283,130	31,000	45,000	1,359,130	5,301,520	The CDBG table, Expected Amount Available Year 1, includes the annual allocation, the anticipated program income received during PY2024, and prior year resources (prior year program income. The expected amount available for the remainder of the ConPlan is the annual allocation and program income for 4x more years.

The expected amount available for the remainder of the ConPlan is the annual allocation and program income for 4x more years.

Table 23 - Expected Resources – Priority Table

Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how matching requirements will be satisfied

Arapahoe County leverages funds from the City of Aurora, the State of Colorado, the Colorado Housing and Finance Authority and private investors and lenders. Arapahoe County attempts to fund sustainable projects and encourages applicants to apply to the State of Colorado Division of Housing and CHFA for supplemental funding. Private Activity Bonds, Low Income Housing Tax Credits, loans, local subsidies, and grants are all necessary for agencies and developers to receive consideration for funding from Arapahoe County.

If appropriate, describe publicly owned land or property located within the jurisdiction that may be used to address the needs identified in the plan

The County will not utilize any publicly owned land to address the needs identified in this plan.

Table 24 – Goals Summary

Goal Descriptions

1	Goal Name	Affordable Housing
	Goal Description	Based on both quantitative and qualitative analysis, there is a strong need to expand the supply of affordable housing in the County. Arapahoe County has therefore placed a high priority on creating and maintaining affordable housing units for residents earning up to 80% area median income (AMI) and will prioritize projects that increase inventory for residents needing deeply affordable rents at risk of homelessness, i.e. residents earning less than 30% AMI. The broad goal of providing affordable housing to our residents, includes both rental housing and owner-occupied housing. In that regard, Arapahoe County will work with for profit and nonprofit developers to expand the supply of affordable rental housing units in the County, and work with local agencies to rehab existing affordable housing to ensure it remains available and affordable to residents.

2	Goal Name	Community Public Services
	Goal Description	Arapahoe County supports various agencies providing a wide range of community based public services to residents including, but not limited to activities like food assistance, meals on wheels, rent/mortgage/utility assistance, youth services, health care enrollment and navigation, homeless prevention services, shelter supportive services.
3	Goal Name	Tenant Based Rental Assistance (TBRA)
	Goal Description	Arapahoe County provides Tenant Based Rental Assistance (TBRA) to families at risk of becoming homeless, as well as to families in need of immediate shelter after experiencing homelessness. Currently, Arapahoe County is supporting two TBRA programs, one through Aurora Housing Authority and the other through Family Promise of Greater Denver.
4	Goal Name	Public Facility Improvements
	Goal Description	Arapahoe County provides assistance to entities, primarily other units of local government, non-profit organizations, and public housing authorities for public facility improvement projects, which typically replace integral components of their facilities and/or provide greater accessibility by removing architectural barriers.
5	Goal Name	Public Infrastructure improvements
	Goal Description	Arapahoe County works with our local municipalities to address their public infrastructure needs which have been identified at the local level as well as the public participation process. Public infrastructure improvements typically address architectural barriers by upgrading sidewalks and curb ramps to meet ADA standards and provide all residents with access to those community features regardless of their mobility.
6	Goal Name	Program Administration
	Goal Description	Effective program management of HUD grant programs will ensure compliance with each respective grant and their regulations and that programs meet their established objectives.

Projects

9	HOME: TBRA

Table 25 – Project Information

Describe the reasons for allocation priorities and any obstacles to addressing underserved needs

Arapahoe County's CDBG program uses set-aside allocations for four participating jurisdictions with the remaining balance being awarded on a competitive basis. The amount of each set-aside is a flat-rate based on each jurisdiction's poverty population and includes the following distribution:

1. Englewood - \$ 135,000
2. Littleton - \$ 135,000
3. Sheridan - \$ 22,500
4. Deer Trail - \$ 9,000

Under the set-aside arrangement listed above, municipalities have the opportunity to recommend funding eligible projects specific to their city or town boundaries, or fund projects serving the entire county or other jurisdictions. Although municipalities may direct their set-aside funds to any eligible projects within Arapahoe County, municipalities traditionally utilize their set aside funds for projects that directly benefit their own citizens, or fund projects that serve a significant percentage of city residents but are available outside of their community as well. Not all municipalities recommend

projects annually. As an example Sheridan and Deer Trail often recommend projects every few years due to the limited capacity of set-aside funds to fully support the cost of a project. Because most projects support residents countywide, the geographic distribution of funds does not align directly with the set-aside allocations, as not all set-aside municipalities utilize their funds annually.

After allocating funds to the four set-aside jurisdictions, which typically fund projects within their city/town boundaries, the remaining balance is awarded on a competitive basis tied to the formal application process. Applications typically benefit Arapahoe County residents as a whole, and aren't specific to a geographic location, with a few exceptions based on the specific nature and scope of the proposed project. Therefore, non-jurisdictional set-aside funds tend to serve residents county-wide.

	Goals Supported	Affordable Housing
	Needs Addressed	Housing Needs Preservation of Existing Housing Stock
	Funding	HOME: \$139,313
	Description	Arapahoe County provides Tenant Based Rental Assistance (TBRA) to families at risk of becoming homeless, as well as to families in need of immediate shelter after experiencing homelessness. Currently, Arapahoe County is supporting two TBRA programs, one through Aurora Housing Authority and the other through Family Promise of Greater Denver.
	Target Date	9/30/2026
	Estimate the number and type of families that will benefit from the proposed activities	Tenant-based rental assistance: 20 Households

	Location Description	Countywide, eligible. This project will focus on TBRA for all County residents.
	Planned Activities	Tenant-Based Rental Assistance

AP-50 Geographic Distribution – 91.220(f)

Description of the geographic areas of the entitlement (including areas of low-income and minority concentration) where assistance will be directed

Arapahoe County's CDBG program uses set-aside allocations for four participating jurisdictions with the remaining balance being awarded on a competitive basis. The amount of each set-aside is a flat-rate based on each jurisdiction's poverty population and includes the following distribution:

1. Englewood - \$ 135,000
2. Littleton - \$ 135,000
3. Sheridan - \$ 22,500
4. Deer Trail - \$ 9,000

By using set-aside allocations for participating jurisdictions, the municipalities are provided an opportunity to use grant funds in a manner that is consistent with both County plans and goals, as well as local municipal needs, plans and goals. Given this arrangement, municipalities often designate grant funds for certain geographic areas based on eligible census block group data and/or citizen requests and community capital improvement plans.

Arapahoe County has few areas within the jurisdiction with 51% or more LMI residents, which is the standard threshold for conducting area benefit projects under the CDBG program. Because of this, Arapahoe County is considered an exception area by HUD, which lowers the threshold to 46.83% LMI. Given this exception, any project specific to a geographic area must meet the 46.83% LMI population criteria as determined by HUD. Therefore, directing CDBG funds to specific geographic areas is limited by the 46.83% LMI population threshold for area benefit projects. However, other projects outside of area benefit projects, e.g. public service projects benefiting limited clientele, may be directed toward specific geographic areas without census block group restrictions.

Under the set-aside arrangement listed above, municipalities have the opportunity to recommend funding eligible projects specific to their city or town boundaries, or fund projects serving the entire county or other jurisdictions. Although municipalities may direct their set-aside funds to any eligible projects within Arapahoe County, municipalities traditionally utilize their set aside funds for projects that directly benefit their own citizens, or fund projects that serve a significant percentage of city residents but are available outside of their community as well.

Centennial receives their own allocation that is administered by Arapahoe County on their behalf.

Geographic Distribution

Target Area	Percentage of Funds
City of Sheridan	2
Vista Verde-Centennial	0

Target Area	Percentage of Funds
North Neighborhood-Littleton	
Englewood	12
Littleton	12
Deer Trail	1
Countywide	73
Centennial	
Rural Arapahoe County	0

Table 26 - Geographic Distribution

Rationale for the priorities for allocating investments geographically

After allocating funds to the four set-aside jurisdictions, which typically fund projects within their city/town boundaries, the remaining balance is awarded on a competitive basis tied to the formal application process. Applications typically benefit Arapahoe County residents as a whole, and aren't specific to a geographic location, with a few exceptions based on the specific nature and scope of the proposed project. Therefore, non-jurisdictional set-aside funds tend to serve residents county-wide.

Discussion

There are two cities that annually allocate their set aside as a part of the Urban County. The City of Littleton has historically used their set aside for medical care and infrastructure improvements. The City of Englewood historically funds an Energy Efficiency Program and Homeless services.

Low-Income Households

A household is considered low-income if it earns less than 80% of the area median income. A tract is considered to have a concentration of low-income households if the tract median household income is less than 80% of the area median household income. The County's area median income is \$140,100 and low-income is estimated at \$104,200 for a household of four. Based on this criteria, there are a concentration of low-income tracts surrounding the cities of Sheridan, Englewood and Littleton to the west of the County. There are also several scattered tracts with a concentration near Centennial, and one large tract on the northern border along Dwight D. Eisenhower Highway. The majority of low/mod tracts are located in the northwest part of Arapahoe County surrounding Aurora.

Race/Ethnicity

For the purposes of this analysis, a concentration is any census tract where the racial or ethnic minority group makes up 10% more than the county-wide average. More information about race/ethnicity concentrations in the County can be found in the MA-50. Data was taken from the most recent 2018-2022 ACS.

For Black, non-Hispanic households, the county-wide rate was 10.6% and a tract with a concentration would be 20.6% or more. A majority of the tracts with a concentration of Black, non-Hispanic households are found in the northwest part of the County surrounding Aurora. There is also one large tract with a concentration just east of the C-470 Express Lane.

For Asian, non-Hispanic households, the county-wide rate was 6.1% and a tract with a concentration would be 16.1% or more. There are several tracts with a concentration just north of Centennial and Foxfield. There is also one tract near Buckley Space Force Base with a concentration.

For Hispanic households, the county-wide rate was 20.2% and a tract with a concentration would be 30.2% or more. The majority of tracts with a concentration are located in the northwest part of Arapahoe County surrounding Aurora. There are also a concentration of tracts near and around the cities of Sheridan, Englewood and Littleton to the west of the County. Finally, there is one large tract on the northern border along Dwight D. Eisenhower Highway.

There were no other minority groups (racial and ethnic) in Arapahoe County with a concentration of the population living in a census tract. In general, tracts with a concentration of both Black non-Hispanic, and Hispanic minority groups were in line with tracts that had a concentration of low-income households. A full detail of areas with low-income households is located in the MA-50. A set of maps with a concentration of minority groups and low/mod tracts is also found in the MA-50.

Concentration of Low-Mod Households

Concentration of Black, non-Hispanic Population

Concentration of Asian, non-Hispanic Population

Concentration of Hispanic Population

Affordable Housing

AP-55 Affordable Housing – 91.220(g)

Introduction

Affordable housing is an issue that affects all residents, especially in an area such as metro Denver with a good local economy and attractive amenities that appeal to a wide range of individuals and families that generally find the metro Denver area as one of the top places to live in the United States. Denver and its surrounding communities are therefore experiencing significant population growth and rising housing costs.

The housing market and supply, particularly affordable housing, has not kept pace with population growth. In addition to supply and demand concerns with housing, and affordable housing in particular, stagnant wages and/or wages not increasing at rates similar to cost of living increases are also affecting the ability to afford housing in the current market. Due to these factors, vacancy rates for rental units and homes are very low and many previously affordable units are no longer renting for affordable rates. This scenario is creating an environment where individuals and households are being priced out of housing, or if they can find decent rental units, they are paying more than 30% of their income (and often much more), on housing which dramatically affects their ability to afford other essentials and common expenses and leaves them burdened by unsustainable housing costs.

Due to the aforementioned housing conditions and factors affecting the supply of affordable housing, Arapahoe County Community Development, Housing and Homeless Services is making a proactive and concerted effort to preserve existing affordable housing and replace affordable housing being lost to market forces in a variety of ways. Through the use of CDBG and HOME funds, Arapahoe County is supporting and investing in affordable units and helping to close funding gaps and leveraging funds to ensure the feasibility of projects. Funds are also being used to support rental assistance programs to help residents afford and remain housed; existing affordable properties and units are being assisted to ensure more long-term affordability; alternative housing options are being pursued like home-sharing and matching programs that will incorporate unutilized opportunities for mutually beneficial housing.

One Year Goals for the Number of Households to be Supported	
Homeless	0
Non-Homeless	92
Special-Needs	0

One Year Goals for the Number of Households to be Supported	
Total	92

Table 27 - One Year Goals for Affordable Housing by Support Requirement

One Year Goals for the Number of Households Supported Through	
Rental Assistance	20
The Production of New Units	4
Rehab of Existing Units	68
Acquisition of Existing Units	0
Total	92

**Table 28 - One Year Goals for Affordable Housing by Support Type
Discussion**

"One Year Goals for the Number of Households to be Supported" describes the type of households supported (homeless, non-homeless and special needs) through affordable housing projects; whereas "One Year Goals for the Number of Households Supported Through" describes how the households identified in the first table will be supported.

Note, the above "production of new units" will be leveraged with other funds and only accounts for HOME assisted units (3), not the total number of units in the affordable housing development. This also includes an estimated 1 homeowner household assisted by CHDO housing development activities.

One Year Goals for the Number of Households Supported, includes the following breakdown:

Rental units constructed: 3 Household Housing Unit
 Homeowner Housing Rehabilitated: 68 Household Housing Unit
 Homeowner Housing Added (CHDO): 1 Housing Household Units
 Tenant-based rental assistance: 20 Households

AP-60 Public Housing – 91.220(h)

Introduction

The County only nominally operates its own Public Housing Authority. The County works with the three municipal housing authorities to support their programs including South Metro Housing Options (Littleton Housing Authority), Aurora Housing Authority, and Innovative Housing Concepts (Englewood). The County places the preservation of existing public housing and affordable housing as its first priority in supporting the public housing authorities in the county. The County has worked each year with the housing authorities to provide financial support for projects and improvements which preserve and improve the quality of their housing stock. The second priority for public housing in the county is to expand the inventory of affordable units owned by the authorities. The County has provided support for new construction and acquisition/rehabilitation efforts. The third priority for the county is to promote greater coordination and cooperation among the municipal housing authorities to ensure that resources are used efficiently, and duplication of effort does not occur.

Actions planned during the next year to address the needs to public housing

Arapahoe County Community Development, Housing and Homeless Services staff will continue working with our local public housing authorities to identify opportunities and resources for the new development of affordable rental units both for low and very- low-income households, special needs households and elderly households.

Arapahoe County is working with South Metro Housing Options and Innovative Housing Concepts to identify potential future projects in the City of Littleton, Sheridan and Englewood. South Metro Housing Options Montview Flats project is currently underway and plans are in the works for the next project, Starlight.

Actions to encourage public housing residents to become more involved in management and participate in homeownership

The local public housing authorities promote options to ensure that residents are represented on housing authority boards. The County provides extensive public participation opportunities for public housing residents to participate in planning discussions centered on housing needs and provides public housing residents with housing services through Community Development, Housing and Homeless Services staff. Lastly, the County works with public housing authority residents to refer them to CHFA down payment assistance programs, and other appropriate referrals

If the PHA is designated as troubled, describe the manner in which financial assistance will be

provided or other assistance

None of the PHAs in Arapahoe County are designated as troubled.

AP-65 Homeless and Other Special Needs Activities – 91.220(i)

Arapahoe County Department of Community Resources provides funding for a variety of programs that help people experiencing homelessness as well as assisting those about to become homeless remain housed. Special needs activities are addressed through housing developments that target persons with special needs.

Describe the jurisdictions one-year goals and actions for reducing and ending homelessness including:

Reaching out to homeless persons (especially unsheltered persons) and assessing their individual needs

The county is an active member of Metro Denver Homeless Initiative (MDHI) and works to collaborate region wide on programs and strategies to prevent, and end, homelessness. The County is also a lead member of the Tri-Cities Homelessness Initiative and Policy Group and the Change the Trend Network addressing homelessness across the Tri-Cities area by connecting non-profits and local municipalities in sharing resources and policy goals. Additionally, Arapahoe County leads the County's Homeless Coordinating Committee and is also a co-chair on the Aurora at Home Board.

Arapahoe County takes the lead on conducting the annual Point in Time (PIT) survey for Arapahoe County (excluding Aurora). The County works closely with the City of Aurora staff and homeless coordinator to ensure that we are not duplicating services and that we work as partners.

The County's One Year Goals:

- Continue to support HOME TBRA funded programs to help get homeless people into housing and stabilized.
- Continue to strengthen the PIT survey to get a better representation of the number of homeless people in Arapahoe County.
- The county is a member of the HMIS system, to help track all of the homeless persons served by Community Resources and has a goal to increase entry into HMIS countywide.
- This year we will continue to strengthen our relationships with our local partners: Café 180, Change the Trend, SAFER, Safe Parking Initiative, Doctor Care, IFCS, Love Inc, ARC, ect.
- The county will also continue to strengthen relationships with landlords so that they are more willing to take people who have experienced homelessness.
- County staff will also provide staff and assistance to anybody displaced by fire or a natural disaster. Staff has housed multiple Red Cross stations in the past to help rehouse people whose

homes were destroyed by a fire or natural disaster.

Addressing the emergency shelter and transitional housing needs of homeless persons

The county works closely with the two TBRA funded programs: Aurora Housing Authority and Family Promise of Greater Denver. When space is available in either of the programs, the county will refer a household unit into that program.

When the county assists an affordable housing development with HOME and/or CDBG funds, we ask that the County supported units be available to families/individuals that the County refers at initial lease-up. The County will then refer homeless families/individuals to these programs, thereby providing secure affordable housing.

This year, Family Tree- GOALS is operating and will house 12 families experiencing homelessness and work to help the families reach self-sufficiency.

Transitional housing is provided by Family Tree and House of Hope.

Comitis, located in Adams County, is an emergency shelter supported by Arapahoe County, which serves families. HAAT Force will provide motel vouchers for families, residents with disabilities, and people with pets who cannot be served elsewhere on nights when the weather is below 32 degrees.

Helping homeless persons (especially chronically homeless individuals and families, families with children, seniors, people with disabilities and unaccompanied youth) make the transition to permanent housing and independent living, including shortening the period of time that individuals and families experience homelessness, facilitating access for homeless individuals and families to affordable housing units, and preventing individuals and families who were recently homeless from becoming homeless again

Chronically homeless residents are more traditionally served through programs in Denver and the City of Aurora. Arapahoe County does not currently have any specific programs targeted at the chronically homeless, however, has recently allocated ARPA and HOME-ARP funds to Project SAFER which provides non- congregate housing to formerly incarcerated residents with persistent mental illness who are unhoused and often chronically unhoused. ARPA funding was also provided to the Aurora Navigation Center, Tri-Cities Navigation Center for emergency and transitional housing as well as Ridgeview for transitional housing project.

Change the Trend (CTT) is continuing the work of helping the chronically homeless in the Littleton.

Englewood and Sheridan municipalities. While at this time, housing is not yet provided for the chronically homeless, mentors assist those that are chronically homeless to secure housing and temporary shelter through motels. A new navigation center for unhoused residents just opened in Englewood in 2025 and will provide supportive housing with workforce development to chronically unhoused residents.

Families with Children: As previously referenced, the County has two TBRA programs specifically targeted to families that provide rent support with wrap around services to help the family obtain self-sufficiency. Family Tree's House of Hope and Family Promise of Greater Denver help to provide transitional housing and support in order to help stabilization. Additionally, Arapahoe County Human Services, along with Family Tree have partnered to create GOALS; a two-generational housing program. This program provides families with housing and services while working towards self-sufficiency and assists 12 families per year. Comitis, located in Adams County, is an emergency shelter supported by Arapahoe County, which serves families.

Homeless Prevention: Arapahoe County was a core partner in the development and funding of the navigation center in Englewood previously mentioned. This project will house 50 residents at a time and provide services including workforce development and housing assistance to transition residents to permanent housing and self-sufficiency.

Helping low-income individuals and families avoid becoming homeless, especially extremely low-income individuals and families and those who are: being discharged from publicly funded institutions and systems of care (such as health care facilities, mental health facilities, foster care and other youth facilities, and corrections programs and institutions); or, receiving assistance from public or private agencies that address housing, health, social services, employment, education, or youth needs

Assisting individuals being discharged from both institutions (both medical and incarceration) has been a priority for Arapahoe County. The County has allocated funds to Project SAFER and Brothers Redevelopment for supportive housing projects specifically targeted to residents exiting or involved with the criminal justice system. Project SAFER will focus on formerly incarcerated residents with mental health histories while Brothers Redevelopment will serve residents with mental health needs. They will coordinate intake based on the needs of the individual client.

Discussion

The County continues to collaborate with organizations interested in ending homelessness, including the

City of Aurora, and will continue to look for viable programmatic solutions.

AP-75 Barriers to affordable housing – 91.220(j)

Introduction:

The County is committed to identifying and addressing barriers that limit access to affordable housing. This section describes the County's actions to remove or reduce these barriers.

Actions it planned to remove or ameliorate the negative effects of public policies that serve as barriers to affordable housing such as land use controls, tax policies affecting land, zoning ordinances, building codes, fees and charges, growth limitations, and policies affecting the return on residential investment

The County has initiated educational efforts to acquaint County residents with the need for more affordable housing opportunities for low/moderate income households in Arapahoe County. The County will continue to utilize opportunities to educate residents, service providers and other organizations to increase support and awareness of the need to address priority housing needs in the County. The Community Resources Department will continue to work with the Public Works and Development Department to identify areas of opportunity for new affordable housing development. In some areas of the unincorporated parts of the County, there is less NIMBY resistance from neighbors than in some of the older municipalities such as Littleton and Englewood.

The county has a robust set of policies and strategies in its County Comprehensive Plan that provide a range of tools available to lower the cost and difficulty associated with affordable development in unincorporated Arapahoe County.

Municipalities within the county have different policies and goals related to encouraging affordable housing. The County will work with interested municipal governments to enhance their affordable housing policies so that developers have stronger incentives for new development. The County will also work with municipalities to consider policies that will allow for more innovative land uses including small lot single family development, infill development, shared housing for specific groups, and accessory dwelling unit policies in areas where the infrastructure can support more intensive uses. Several municipalities are currently in the process of adopting policies to incentivize affordable housing including reducing fees, approval timelines, approval of ADU's, and some are considering inclusionary

zoning (Littleton has already approved this) and land banking (in consideration in Centennial).

Discussion:

The unincorporated areas of the county are starting to be explored for development of affordable complexes. There are fewer parcels still available in the incorporated areas of the county, however, where the necessary infrastructure improvements would make development possible for new, large scale multifamily development. The Community Resources Department will work with the Public Works and Development Department office to inventory sites of opportunity for future affordable development. The County plans to initiate ongoing discussions among interested local governments and affordable developers to identify areas of opportunity and to discuss incentives that communities may be willing to offer in order to reduce risk and increase affordability. Lastly, as previously mentioned, the County is working with Reinvestment Fund to identify parcels with potential for affordable housing development across the county including Aurora.

AP-85 Other Actions – 91.220(k)

Introduction:

The County is committed to identifying and addressing obstacles to meeting underserved needs, reducing the number of poverty-level families in the County, and promoting institutional structure and collaboration between the public and private sector. This section describes the County's efforts.

Actions planned to address obstacles to meeting underserved needs

Arapahoe County Community Development, Housing and Homeless Services (CDHHS) staff will continue to work with local public housing authorities, non-profits, for-profits, service providers and interested parties to better understand the needs of our residents, particularly those underserved and underrepresented, as well as the obstacles facing these populations. In doing so, we can better address those needs and plan accordingly.

Discussion regarding housing that is accessible to residents with criminal histories have resulted in 2 major projects during the past funding cycle previously mentioned. The County will continue to build upon this work and support the lead organizations in this effort.

Actions planned to foster and maintain affordable housing

Arapahoe County has made new construction of affordable rental housing and preservation of existing affordable housing priorities for HOME and CDBG funds. HOME and CDBG funds may be used to fund new rental housing, preserve existing affordable rental housing, purchase and rehabilitate older rental units. Arapahoe County works with the local housing authorities, nonprofit housing agencies and private developers to expand and preserve the affordable housing stock throughout the county.

Actions planned to reduce lead-based paint hazards

The two housing rehabilitation programs receive funding for lead base paint testing and remediation. These funds have covered the costs for multiple years and as the agencies need new infusion of funds, which will be provided by the County.

All test for lead hazards when conducting rehabilitation and achieve clearance from certified inspectors when the rehabilitation is complete. All work is completed in accordance with the Lead Safe Housing

Rule.

The local Housing Authorities and other Section 8 provider agencies strictly adhere to the Housing Quality Standards (HQS) for public housing and section 8 tenants, and the Lead Safe Housing Rule. Housing Authorities will not allow Section 8 tenants to rent units with lead hazards that are not mitigated by the landlord. In addition, all units owned, purchased and rehabilitated by the housing authorities are mitigated for lead.

When completing the Site-Specific Environmental review for housing rehab projects, properties built prior to 1978 are identified and subrecipients are notified that the property is subject to lead-based paint requirements and owners are provided appropriate lead-based paint information and hazard mitigation.

Actions planned to reduce the number of poverty-level families

Arapahoe County will concentrate on three components essential to decreasing poverty within the Urban County; 1) self-sufficiency; 2) expansion of the economic base; and 3) affordable housing.

The County operates many social service programs that help extremely low- and low-income residents better their lives and become self-sufficient. Arapahoe County also funds a county position, through CSBG funding, to provide coordination with housing programs and anti-poverty and support and assistance programs.

Additionally, Arapahoe County's Senior Resources Division of the Community Resources Department provides many services to low-income seniors, including chore and homemaker services. Senior Resources receives a variety of funds, including Community Services Block Grant (CSBG) from the U.S. Department of Health and Human Services, and County General funds.

The Arapahoe County Human Services Department supports antipoverty activities through their major benefit programs, including: Temporary Aid to Needy Families (TANF), food assistance (SNAP), Low Income Energy Assistance program (LEAP), Medicaid, Adult Financial assistance, and Child Care Assistance Program (CCAP). They also provide information and referrals for Social Security

Insurance/Social Security Disability Insurance.

Arapahoe County is also working to increase the number of households in the TBRA program, providing households with a stable environment where they can work to increase their self-sufficiency and avoid the threat of homelessness.

Actions planned to develop institutional structure

Arapahoe County is committed to expanding the economic base of the community. This is accomplished through promotion of a wide-ranging business community, viable wages and a skilled workforce. The Southeast Business Partnership (SEPB), the South Metro Chamber of Commerce (SMCC), and the I-70 regional economic group (REAP), continue to pursue attracting industries and businesses that pay moderate to high wages. Arapahoe County is also committed to the continued need for job skills enhancement programs, such as Arapahoe/Douglas Works! (AD Works!). AD Works! maintains a close relationship with the business community and aids the unemployed in enhancing skills required by local businesses.

Actions planned to enhance coordination between public and private housing and social service agencies

Arapahoe County CDHHS Division advocates for affordable housing wherever possible. The CDHHS Division encourages developers to build housing for the low-income market, with the goal of providing everyone the opportunity to live close to where they work and understanding that a sustainable community should provide a full spectrum of housing choices. The local transitional shelter for women and children, House of Hope, has a 90-day possible stay with mandatory counseling, which aids their clients in breaking the cycle of poverty where they often find themselves trapped.

Finally, CDHHS continues to coordinate with public and private agencies to produce and preserve affordable housing as described in the housing component of the plan.

Discussion:

Program Specific Requirements

AP-90 Program Specific Requirements – 91.220(l)(1,2,4)

Introduction:

Arapahoe County and its Sub-Grantees/Subrecipients receive CDBG/HOME program income and recaptured funds from loan payments and payoffs that are reallocated to CDBG/HOME eligible projects. Program income and recaptured funds received directly by the County are outlined below. No funds are expected to be placed in or generated by revolving loan accounts, and no float-funded activities are included in this plan.

In addition to receiving federal grant funds, CDBG/HOME program income and recaptured funds from loan payments and payoffs are reallocated to CDBG/HOME eligible projects. County Sub-Grantees/Subrecipients also receive program income and recaptured funds from single family housing rehabilitation and previous first-time home buyer programs loan payments or payoffs, which are returned to the County. These amounts are reflected in the anticipated resources section of this report.

Community Development Block Grant Program (CDBG)

Reference 24 CFR 91.220(l)(1)

Projects planned with all CDBG funds expected to be available during the year are identified in the Projects Table. The following identifies program income that is available for use that is included in projects to be carried out.

1. The total amount of program income that will have been received before the start of the next program year and that has not yet been reprogrammed	124,746
2. The amount of proceeds from section 108 loan guarantees that will be used during the year to address the priority needs and specific objectives identified in the grantee's strategic plan.	0
3. The amount of surplus funds from urban renewal settlements	0
4. The amount of any grant funds returned to the line of credit for which the planned use has not been included in a prior statement or plan	0
5. The amount of income from float-funded activities	0
Total Program Income:	124,746

Other CDBG Requirements

1. The amount of urgent need activities	0
---	---

2. The estimated percentage of CDBG funds that will be used for activities that benefit persons of low and moderate income. Overall Benefit - A consecutive period of one, two or three years may be used to determine that a minimum overall benefit of 70% of CDBG funds is used to benefit persons of low and moderate income. Specify the years covered that include this Annual Action Plan. 95.00%

**HOME Investment Partnerships Program (HOME)
Reference 24 CFR 91.220(l)(2)**

1. A description of other forms of investment being used beyond those identified in Section 92.205 is as follows:

HOME projects will be used for multi-family housing development and for Tenant Based Rental Assistance Programs (TBRA). If other eligible projects are identified, a substantial amendment will be submitted.

2. A description of the guidelines that will be used for resale or recapture of HOME funds when used for homebuyer activities as required in 92.254, is as follows:

The County no longer funds a homebuyer program. The State and the Colorado Housing Finance Authority have very successful programs that residents are referred to for down payment assistance.

3. A description of the guidelines for resale or recapture that ensures the affordability of units acquired with HOME funds per 24 CFR 92.254(a)(4) are as follows:

The HOME Rule allows the use of either resale or recapture provisions on homes purchased with HOME assistance. The County has opted to use the recapture provision on its direct homeowner assistance program. The following recapture provisions will be provided in an addendum to the County-approved form of Deed of Trust.

The entire HOME investment, including principal and interest must be immediately repaid if, during the period of affordability, which has been established as five years, the home is transferred or is no longer occupied by the borrower as his/her principal place of residence. This includes ownership transfer by sale or by deed, or if the home is used as rental property. (The homeowner may have a roommate who shares household expenses, provided that the homeowner continues to live in the

home.)

If there are insufficient net proceeds* from the sale of the home to repay the entire HOME investment, then a portion of the HOME investment will be required to be repaid as follows:

Amount of HOME loan divided by the sum of the HOME loan and owner's investment. The quotient is multiplied by the amount of available net proceeds to arrive at the amount that must be repaid.

HOME investment

HOME investment + owner investment

x Available net proceeds = Amount of recapture

Example:

\$10,000

$\$10,000 + \$2,000 = .83 \times \$5,000 = \$4,166$

\$2,000 represents the amount of the buyer's own cash that was provided at the time of purchase

*Net proceeds are defined as the sales price minus superior non-HOME loan repayments and any closing costs.

The County's form of Promissory Note and Deed of Trust are maintained in the County's electronic files.

Identifying Program Income, Repaid Funds and Recaptured Funds

As stated in the introductory paragraph of this section, the County permits sub-recipients who are administering the County's down payment assistance program to retain program income to provide additional loans while the Sub Recipient's contract is in force. The following activities are included as program income for this program:

- Periodic loan repayments of principal and interest (the owner remains in the property)
- Loan payoff of principal and interest (there is no sale or transfer of the property)

Funds collected for reasons other than the above are not considered program income and must be returned to the County upon receipt. These include:

- The owner voluntarily sells the home during the period of affordability and the loan is paid off at closing from sale proceeds. These funds are considered "Recaptured" funds and are subject to the County's Recapture Provision. Funds must be returned to the County.
- The home is foreclosed and sold to another owner. These funds are considered "Recaptured" funds and are subject to the County's Recapture Provision. Funds must be returned to the County.

- The owner moves out of the property but retains ownership. This is a violation of the program and the entire loan amount is due, minus any principal payments previously paid on the loan. These funds are considered “Repaid” funds and must be returned to HUD. (Remit funds to the County for remittance to HUD.)

Upon termination of the contract between the County and Sub-Recipient, all program income is to be returned to the County at the end of the month in which it was received.

HOME compliance information is provided at the following website:

<http://www.hud.gov/offices/cpd/affordablehousing/training/web/checkup/performance/monitoringtools.cfm>

4. Plans for using HOME funds to refinance existing debt secured by multifamily housing that is rehabilitated with HOME funds along with a description of the refinancing guidelines required that will be used under 24 CFR 92.206(b), are as follows:

Existing debt on a property may be refinanced when HOME funds will be used for rehabilitation and when refinancing is necessary to permit or continue affordability under 24 CFR 92.252. In addition the application for rehabilitation and refinancing must, at minimum:

- Demonstrate that rehabilitation is the primary eligible activity and ensure that this requirement is met by establishing a minimum level of rehabilitation per unit or a required ratio between rehabilitation and refinancing;
- Require a review of management practices to demonstrate that disinvestment in the property has not occurred, that the long term needs of the project can be met and that the feasibility of serving the targeted population over an extended affordability period can be demonstrated;
- State whether the new investment is being made to maintain current affordable units, create additional affordable units, or both;
- Specify the required period of affordability, whether it is the minimum 15 years or longer;
- Specify whether the investment of HOME funds may be jurisdiction-wide or limited to a specific geographic area, such as a neighborhood identified in a neighborhood revitalization strategy under 24 CFR 91.215(e)(2) or a Federally designated Empowerment Zone or Enterprise Community; and
- State that HOME funds cannot be used to refinance multifamily loans made or insured by any Federal program, including CDBG.

5. If applicable to a planned HOME TBRA activity, a description of the preference for persons with special needs or disabilities. (See 24 CFR 92.209(c)(2)(i) and CFR 91.220(l)(2)(vii)).

Arapahoe County does not have a preference for any specific category of disability when receiving an application for rental assistance for the first time. If the need for assistance remains, for a second application to be accepted the County includes a preference for families with children, seniors and disabled individuals for these households to receive assistance a second time.

In general, Arapahoe County will process applications with the following priorities:

- Households that have received a summons from the Arapahoe County Court showing a date for an eviction hearing.
 - Households that are applying for the first time.
 - Households with income less than 80% of area median income at the time of applying.
 - All other households at risk of housing instability.
6. If applicable to a planned HOME TBRA activity, a description of how the preference for a specific category of individuals with disabilities (e.g. persons with HIV/AIDS or chronic mental illness) will narrow the gap in benefits and the preference is needed to narrow the gap in benefits and services received by such persons. (See 24 CFR 92.209(c)(2)(ii) and 91.220(l)(2)(vii)).

The County has provided a preference for the elderly and persons with a disability, but only for those applying for assistance for a second time with HOME program funds. This preference is needed to narrow the gap in benefits for this group as it will prevent homelessness and allow them to be stably housed and continue living independently in place while working towards self-sustainability.

7. If applicable, a description of any preference or limitation for rental housing projects. (See 24 CFR 92.253(d)(3) and CFR 91.220(l)(2)(vii)). Note: Preferences cannot be administered in a manner that limits the opportunities of persons on any basis prohibited by the laws listed under 24 CFR 5.105(a).

In accordance with 24 CFR 92.253(d)(3), an owner of the rental housing assisted with HOME funds must comply with the affirmative marketing requirements established by Arapahoe County (PJ) pursuant to 24 CFR 92.351(a). The owner of the rental housing project must adopt and follow written tenant selection policies and criteria, which include that it may give a preference to a particular segment of the population, if permitted in its written agreement with the PJ, such as persons with a disability or other special needs. However; at this time there is no limit to eligibility or preference given to any particular segment of the population with rental housing projects funded by the County's HOME funds. HOME funds however must target low- to moderate-income households. The County does not discriminate and provides equal access to all eligible households in the HOME program.

The County currently doesn't fund a single-family homeowner down-payment assistance program, nor a single-family homeowner rehab program with HOME funds. HOME funds are not used for refinancing existing debt from other federal funds. HOME funds are only used for multi-family property development, including acquisition, construction, rehabilitation as well as Tenant-Based Rental Assistance (TBRA) programs.
